**Overall Assessment Letter for Wanlida Group Co WIFI-9002
FCC id: SMFWIFI9002**

I have reviewed this Class 2 Permissive change and find it compliant.

This is an application to permit installation of this module in a Laptop in portable configuration.

Please note the following:

SAR Report

Table 3 in the report provides the liquid parameters for the fluid used for system validation using head fluid. The targets are not those of IEEE/OET65. Although this is the case, because the deviation of the measured permittivity and conductivity is within the allowed tolerances (5%) of the targets specified in the standard, the results are deemed to be valid.

I underwent the FCC RF exposure training with the FCC in October 2009.

Yours sincerely

A handwritten signature in blue ink, consisting of a series of fluid, overlapping strokes that form a stylized 'V' and 'K'.
