To change the backlight time:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-\!\!\!\!\int}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-\!\!\!\!\int}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Handset Setting** option.
5. Press the left function key $\boxed{-\!\!\!\!\int}$ to select it.
   The handset setting menu is displayed.
6. Use the joystick key to highlight the **Display** option.
7. Press the left function key $\boxed{-\!\!\!\!\int}$ to select it.
8. Use the joystick key to highlight the **Backlight time** option.
9. Press the left function key $\boxed{-\!\!\!\!\int}$ to select it.
   The backlight time menu is displayed.
10. Use the joystick key to highlight an option from the list.
11. Press the left function key $\boxed{-\!\!\!\!\int}$ to select it.

9.3.3 Clock

The clock setting includes time zone, local time, date time format, date format, display on/off, daylight saving, and second time zone.

To set the clock features:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-\!\!\!\!\int}$ to display the menu screen.

72

3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Handset Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
   The handset setting menu is displayed.
6. Use the joystick key to highlight the **Clock** option.
7. Press the left function key $\boxed{-}$ to select it.
   The clock menu is displayed.
8. Use the joystick key to highlight any of the individual fields.
9. Press the right function key $\boxed{-}$ to select it.
10. Use the joystick key to adjust the setting of the selected field.
11. Press the left function key $\boxed{-}$ to save the new settings.

9.3.4 Greeting

The greeting option can be used to display a greeting when the phone is turned on.

To set a greeting:
1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Handset Setting** option.
5. Press the left function key $\boxed{-}$ to select it.

The handset setting menu is displayed.
6. Use the joystick key to highlight the **Greeting** option.
7. Press the left function key $\boxed{-}$ to select it.
The current greeting screen is displayed.
8. Type a greeting using the keypad.
9. Press the left function key $\boxed{-}$ to save the new greeting.
The new greeting will be displayed next time the phone is turned on.

9.3.5 Auto keylock

The auto keylock function locks the keypad after a period of inactivity to prevent accidental pressing of the keys. This setting can only be set to on or off.

To set auto key lock:
1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
The settings menu is displayed.
4. Use the joystick key to highlight the **Handset Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
The handset setting menu is displayed.
6. Use the joystick key to highlight the **Auto Keylock** option.
7. Press the left function key $\boxed{-}$ to toggle the setting on or off.

Handset setting

74

9.3.6 PLMN display

The PLMN display function can be set to display network information from your service provider. This setting can only be set to on or off.

To set the PLMN display function

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-\!\!\!\!/}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-\!\!\!\!/}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Handset Setting** option.
5. Press the left function key $\boxed{-\!\!\!\!/}$ to select it.
   The handset setting menu is displayed.
6. Use the joystick key to highlight the **PLMN Display** option.
7. Press the left function key $\boxed{-\!\!\!\!/}$ to toggle the setting on or off.

9.3.7 Scheme

The scheme option is used to activate one of the preloaded display schemes for the main menu.

To activate a scheme:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-\!\!\!\!/}$ to display the menu screen.

Handset setting

75

3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Handset Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
   The handset setting menu is displayed.
6. Use the joystick key to highlight the **Scheme** option.
7. Press the left function key $\boxed{-}$ to select it.
   The scheme menu is displayed.
8. Use the joystick key to highlight an option from the list.
9. Press the left function key $\boxed{-}$ to select it.

9.3.8 Reset setting

The reset setting is used to restore all factory default handset settings. When this option is used, all current settings are lost and cannot be recovered.

To reset default handset settings:
1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Handset Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
   The handset setting menu is displayed.
6. Use the joystick key to highlight the **Reset Setting** option.

7. Press the left function key ⌐| to select the option.
   A message asks you to confirm that you really want to reset default settings and key in the phone password.
8. Press the right function key |⌐ to confirm.

9.4 Call setting

Use the call setting menu to configure answer mode, call waiting, call diverting, call barring, hide number, and minute minder.

9.4.1 Answer mode

Answer mode can be set so that only the send/answer key ⌐| can be used to answer a call, or any key (Key Answer). The phone can also automatically answer a call (Auto Answer).

To set the answer mode:
1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key ⌐| to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key ⌐| or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Call Setting** option.
5. Press the left function key ⌐| to select it.
   The call setting menu is displayed.
6. Use the joystick key to select the **Answer Mode** option.

Call setting

7. Press the left function key $\boxed{-}$ to select it.
   The answer mode menu is displayed.
8. Use the joystick key to highlight any option you want to change.
9. Press the left function key $\boxed{-}$ move through the available settings.

9.4.2 Call waiting

Call waiting enables you to receive calls while you are already connected to a previous caller.

To activate, cancel, or check the status of call waiting:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Call Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
   The call setting menu is displayed.
6. Use the joystick key to select the **Call Waiting** option.
7. Press the left function key $\boxed{-}$ to select it.
   The call waiting menu is displayed.
8. Use the joystick key to highlight any option.

9. Press the left function key $\boxed{-}$ to confirm the selection.
   If you activate call waiting, you will be able to take a second call will already connected. Switch between calls using the send/

   answer key $\boxed{\smallsetminus}$. If you cancel call waiting, you will only be able to receive once call at a time and a caller will receive a busy signal if they call will you are already connected. The status option displays your current setting.

9.4.3 Call diverting

Call diverting is a way of sending your voice calls to another number if you are busy or unreachable. You can also check the status of your call forward options.

To divert voice, data, or fax calls:
1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
   The settings menu is displayed.
   The handset setting menu is displayed.
4. Use the joystick key to highlight the **Call Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
   The call setting menu is displayed.
6. Use the joystick key to select the **Call Diverting** option.
7. Press the left function key $\boxed{-}$ to select it.
   The call diverting menu is displayed.

Call setting

79

8. Use the joystick key to highlight the **Voice Calls, Data Calls, Fax Calls** or **Cancel All** option.
9. Press the left function key $\boxed{-}$ to select it.
10. Use the joystick key to highlight a condition, **Unconditional**, **When Busy**, **Not Reachable**, or **No Reply.**
11. Press the left function key $\boxed{-}$ to select it.
    Calls are diverted after settings are entered.

Notes:	• Use the **Cancel All** option to cancel all diverts
	• Use the **Check Status** option to check the current call divert settings.

9.4.4 Call barring

Call barring is a way of blocking incoming or outgoing calls, or messages in certain circumstances. When you change the call barring settings, the change is made on the network and calls will be barred by the network.

To change call barring settings:
1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
   The settings menu is displayed.
4. Use the joystick key to highlight the **Call Setting** option.
5. Press the left function key $\boxed{-}$ to select it.

The call setting menu is displayed.

6. Use the joystick key to select the **Call Barring** option.
7. Press the left function key $\boxed{-}$ to select it.
   The call barring menu is displayed.
8. Use the joystick key to highlight a barring option.
9. Press the left function key $\boxed{-}$ to select it.
10. If a submenu appears, use the joystick key to highlight a second option.
11. Press the left function key $\boxed{-}$ to select it.
12. When the on/off screen is displayed, use the joystick key to highlight the **On** or **Off** option.
13. Press the left function key $\boxed{-}$ to select it.

Note:	You may be asked for a password when you make changes to call barring options and your service provider may not support all options. See you service provider for more details.

9.4.5 Hide number

The hide number option enables you to make calls without sending your number to the person you are calling. You can choose to hide your number, send your number, or let the network set the option.

To change your hide number setting:
1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.

3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it. The settings menu is displayed.

4. Use the joystick key to highlight the **Call Setting** option.

5. Press the left function key $\boxed{-}$ to select it.

6. Use the joystick key to select the **Hide Number** option.

7. Press the left function key $\boxed{-}$ to select it. The hide number menu is displayed.

8. Use the joystick key to highlight an option from the list.

9. Press the left function key $\boxed{-}$ to select it.

9.4.6 Minute minder

The minute minder option keeps a record of how long you spend on each call. This option can only be turn on or off.

To change the minute minder setting:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.

2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.

3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it. The settings menu is displayed.

4. Use the joystick key to highlight the **Call Setting** option.

5. Press the left function key $\boxed{-}$ to select it.

6. Use the joystick key to select the **Minute Minder** option.

7. Press the left function key $\boxed{-}$ to toggle the setting on or off.

9.5 Network setting

The network setting option is used to determine which network and line your phone uses.

9.5.1 Select network

Use the select network option to select your network.

To select your network:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it. The settings menu is displayed.
4. Use the joystick key to highlight the **Network Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
6. Use the joystick key to highlight the **Select Network** option.
7. Press the left function key $\boxed{-}$ to select it. The select network menu is displayed.
8. Use the joystick key to highlight the **Automatic** or **Manual** option.
9. Press the left function key $\boxed{-}$ to select it.

9.5.2 Select line

Use the select line option to select your line. This can only be used if you have multiple lines associated with your phone.

Network setting

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\fbox{$-$}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\fbox{$-$}$ or the joystick key to select it. The settings menu is displayed.
4. Use the joystick key to highlight the **Network Setting** option.
5. Press the left function key $\fbox{$-$}$ to select it.
6. Use the joystick key to highlight the **Select Line** option.
7. Press the left function key $\fbox{$-$}$ to select it.
8. Press the left function key $\fbox{$-$}$ to toggle between line 1 and line 2.

9.6 Security setting

The security setting option enables you to set PIN codes, the phone lock, and fixed dialing.

9.6.1 PIN codes

The PIN code option lets you turn the protection features on or off and lets you change PIN codes.

To enter the PIN code option:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\fbox{$-$}$ to display the menu screen.

3. Use the joystick key to highlight the **Settings** icon and press the left function key ⌐ or the joystick key to select it. The settings menu is displayed.
4. Use the joystick key to highlight the **Security Setting** option.
5. Press the left function key ⌐ to select it.
6. Use the joystick key to select PIN codes, phone lock, or fixed dialing.
7. Press the left function key ⌐ to select it.
8. If you selected the PIN codes or phone lock option you can turn the protection function on or off by selecting it with the joystick key and using the left function key ⌐ to toggle the function on or off. You can also use the joystick key to select the change PIN/code option and select it with the left function key ⌐.
9. Turn the fixed dialing function on or off by selecting it with the joystick key and using the left function key ⌐ to toggle the option on and off.

Security setting

9.7 Bearer setting

The bearer settings are to change the GPRS settings and the CSD settings. These settings should be set according to the service offered by your provider and should not be changed unless your service provider advises you to do so.

To enter the bearer settings:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Settings** icon and press the left function key $\boxed{-}$ or the joystick key to select it. The settings menu is displayed.
4. Use the joystick key to highlight the **Bearer Setting** option.
5. Press the left function key $\boxed{-}$ to select it.
6. Use the joystick control to highlight either the **GPRS** or **CSD** option and use the left function key $\boxed{-}$ to select it.
7. Press the right function key $\boxed{-}$ to display the options menu.
8. Use the joystick key to highlight an option from the options menu and press the eft function key $\boxed{-}$ to select it.

10. Mobile

Use the mobile function to select the mobile service provided by your service provider. Consult your service provider before making changes to this setting.

10.1 Selecting a mobile service

To select a mobile service:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key $\boxed{-}$ to display the menu screen.
3. Use the joystick key to highlight the **Mobile Service** icon and press the left function key $\boxed{-}$ or the joystick key to select it.
4. The mobile service menu is displayed.
5. Use the joystick key to highlight your mobile service from the list.
6. Press the left function key $\boxed{-}$ to select it.

10.1.1 Launching the browser

When you have selected a mobile service you can launch the browser to view your home page, to view a predefined bookmark, or to go to a specific URL.

To launch the browser:

1. Select a mobile service as described in "Selecting a mobile service" on page 87.
2. Use the joystick to highlight **Launch Browser** from the displayed list.
3. Press the left function key ⌐ to select it.
   The Internet Services page is displayed.
4. Use the joystick to highlight **Homepage**, **Bookmarks**, or **Go to URL**.
5. Press the left function key ⌐ to select it.

   If you selected **Homepage**, the browser will open and display your homepage.

   If you selected **Bookmarks**, a list of your bookmarks is displayed. Use the joystick key to highlight a bookmark and press the left function key ⌐ to select it. The browser will open and display the page you selected.

   If you selected **Go to URL,** you will be prompted to enter a URL. Press left function key ⌐ when the URL is complete. The browser will open and display the page you selected.

Selecting a mobile service

10.1.2 Changing the WAP profile

You can change the WAP profile to suit your own requirements.

To change the WAP profile:

1. Select the WAP mobile service as described in "Selecting a mobile service" on page 87.
2. Use the joystick to highlight **Profile Setting** from the displayed list and press the left function key ⌐ to select it.
3. Use the joystick key to highlight a profile from the displayed list.
4. Press the left function key ⌐ to select it.

Note: You can add a new profile of your own, or edit an existing profile using the options menu in the Profile Settings menu.

10.1.3 WAP push messages

When you receive a WAP push message you can view it or delete it from the WAP push in-box.

To view or delete a WAP push message:

1. Select the WAP mobile service as described in "Selecting a mobile service" on page 87.
2. Use the joystick to highlight **WAP Push** from the displayed list and press the left function key ⌐ to select it.

Selecting a mobile service

3. Use the joystick key to highlight **Inbox** from the displayed list and press the left function key ⌐ to select it.
    The WAP push inbox is displayed.
4. Use the joystick key to highlight a message.
5. Press the left function key ⌐ to view it or the right function key ⌐ to select the options menu.

Note:	The options menu enables you to delete, edit, or forward messages.

11. Gallery

Use the gallery function to display your album of pictures, video clips, sounds, pictures (preloaded), or other files.

11.1 Selecting a gallery

To use the gallery:

1. If the phone is turned off, turn it on as described in "Turning the phone on and off" on page 9.
2. When the idle screen appears, press the left function key ⌐ to display the menu screen.
3. Use the joystick key to highlight the **Gallery** icon and press the left function key ⌐ or the joystick key to select it.
4. The gallery menu is displayed.
5. Use the joystick key to highlight a gallery from the list.
6. Press the left function key ⌐ to select it.
   - Album   Displays thumbnail pictures from your album.
   - Video   Displays a list of your video clips.
   - Sounds   Displays a list of your sounds.
   - Pictures   Displays thumbnails of preloaded pictures.
   - File viewer   Displays a list of all other files on your phone.
12. Shortcuts and fast access key

You can set a page of shortcuts on your mobile phone to access all your most commonly used functions fast. To access the shortcuts page, press the joystick key. Use the joystick key to highlight a shortcut. Press the left function key $\boxed{-}$ to select it.

You can also program the fast access key (right function key $\boxed{-}$) to start a specific function with a single key press.

12.1 Shortcuts

You can define which shortcuts appear on the shortcuts page.

To define a shortcut:

1. From the idle screen, press the joystick key.
   The shortcut page is displayed.
2. Use the joystick key to highlight an existing shortcut. This shortcut will be replaced with the new one you are defining.
3. Press the right function key $\boxed{-}$ to set a new shortcut.
4. Use the joystick key to highlight a new shortcut function from the list.
5. Press the left function key $\boxed{-}$ to select it.
   The new shortcut will replace the original.

12.2 Fast access key

You can set the right function key $\boxed{-}$ to start a specific function of your choice with a single key press.

To set the fast access key:

1. From the idle screen, press and hold the right function key $\boxed{-}$. The FAK menu is displayed.
2. Use the joystick key to highlight a function from the list.
3. Press the left function key $\boxed{-}$ to select it.

   The right function key $\boxed{-}$ will start the selected function with a single key press from now.

Troubleshooting

Appendix

Most problems with your mobile phone can be solved by reading this section. If you have a problem that isn't covered here, or the advice here doesn't solve the problem, contact your dealer for more help.

Cannot dial a call.

- Call barring may be preventing you from calling certain numbers, see "Call barring" on page 80.
- The SIM card may not be properly installed or may have dirty contacts. Use Alcohol to clean the SIM card contacts and reinstall. See "Installing a SIM card" on page 5.
- If the SIM card is a "pay as you go" type, there may be no money left to make calls.
- There may be no service in your area. Try calling from near a window or outside.

Cannot answer a call.

Call barring may be preventing you from answering certain numbers, see "Call barring" on page 80.

Battery life is getting very short.

- Your battery may need replacing. See you dealer for advice.
- You have spent time playing games and run the battery down. Recharge the battery.
- The area may have poor signal coverage which reduces battery life. Use the phone in areas with good coverage for the best battery life.
- The backlight may be set to be on for to long. See "To change the backlight time:" on page 72.

Cannot use some features

Some features such as call barring, voice mail, WAP, and MMS require internet functions or network enabling. Check with your service provider.

Cannot save contact to the phone book

The phonebook memory may be full. Try saving new contacts in the handset memory, or move contacts in SIM card memory to handset memory. See "Editing, deleting, or moving a contact" on page 18.

Cannot receive any short messages

Check if message memory is full. Delete old messages to save memory space. See "Messages" on page 27.

Appendix

Cannot save pictures, video, or sounds.
Possibly there is no memory space left for saving new items. try deleting any files you no longer need. See "Saved file locations" on page 105.

Cannot play any MP3 files.
MP3 files must be saved in the correct folder or you won't be able to play them. Save all MP3 files in **media\sound** in the mini SD card, or in the internal handset memory. See "Saved file locations" on page 105.

Cannot access the mini SD card.
The mini SD card must be formatted FAT-16. FAT-32 and NTFS formats are not supported. Reformat your card FAT-16.

Cannot connect to the internet.
• Consult your service provider and ask about your WAP service and set up. • Ensure that you are attempting to connect in an area with good service coverage.
