2. Beginning Use

Statement: The software updates sporadically since we continuously devote to product quality improvements. When operation for the product(s) your purchased differs from that described in this manual, please follow your product(s).

2.1 Charge the battery

AN7HG3 comes with a built-in polymer rechargeable battery and is designed to use only manufacture-specified original batteries and accessories. When the battery is low, please charge it timely.

Charge by Charger

Plug one terminal of the charger into the power adapter socket, and the other to the power jack of the device to charge it.

2.2 Use the storage card

Insert the storage card

The storage card slot is on the right panel, just insert the TF Flash card with its gold contacts facing down and push it in until it clicks into place.

Browse files in the storage card

To browser the files in the storage card, do one of the following:

- run “File Manager to view files in the storage card
- you can also install and run any other third party file browser applications

Remove the storage card

Simply push the storage card in to eject it from its slot.

To avoid data loss or damage, please stop using files/ programs in the storage card before remove the T-Flash card, and then tap **Settings> Storage> Unmount SD card** to remove it safely.

[Note]:

1. Make sure the location and direction of the storage card is correct when inserting, otherwise it is easy to cause damage/destroy to the storage card.
2. To avoid incompatibility or unrecognized of the storage card, major brands of storage card are recommended.

2.3 Hot plug of storage card

Please do not hot plug the storage card when using or browsing its files.

For example, when you are running the Music/Video Player/ Gallery, the storage card may damage if you push out the storage card directly and the running program will stop automatically to protect the device. As for details of inserting/removing storage card, see **2.2 Use the storage card**.

2.4 Memory space

The device contains 2 memory spaces: local storage & extended storage card. Local storage appears as “Local” and extended storage card as “EXTSD” in the device. The capacity of built-in flash varies from 4GB, 8GB and 16GB because of different model of the AN7HG3 series. The built-in flash capacity of your device depends on the model your purchased. AN7HG3 series support extended storage card of capacity maximum 32GB.

2.5 Power on/off

1. **Power on:** press down the Power Button to turn on the device when the battery is full enough
2. **Power off:** press down the Power Button for about 3 seconds and then a menu with options will popup, select **Power Off** to turn off the device
3. **Screen Lock:** tap Settings>Security>Screen lock and a menu with options will popup, select a screen lock pattern to shutdown the screen to save battery life. Press down the Power Button again to activate the locked Home 12
4. Screen. After unlocking, the device will resume the screen before locking the screen.

2.6 Connect to wireless networks

To connect to a wireless network, you should follow:

1. tap **Settings** on the Home screen;
2. tap **Wi-Fi**;

3. select ON;
4. the network names and security settings of detected Wi-Fi networks are displayed in the Wi-Fi networks section;
5. tap a Wi-Fi network to connect. If you selected an open network, you will be automatically connected to the network. If you selected a network that is secured with WEP, enter the key and then tap **Connect**.
Depending on the network type and its security settings, you may also need to enter more information or choose a security certificate.
6. after successful connection, the Wi-Fi connected icon will appears on the status bar.

3. Home Screen

The Home screen is your starting point to access all the features on your device. It displays application icons, widgets, shortcuts, and other features. You can customize the Home screen with different wallpaper & widgets and display items you want. See the *Personalizing* chapter.

When you sign in, the Home screen opens.

Sleep mode

Sleep mode suspends your device to a low power state while the display is off in order to save battery power. You will still be able to receive messages and calls while the device is in Sleep mode.

[Note]: If the device is in sleep mode more than 30 minutes, the device will automatically turn off to save electricity.

Switch to sleep mode

tap Settings>Display>Sleep and select a time interval for Sleep Mode in the option menu prompted. The device will automatically shutdown the display screen when there is no operation on the screen for a period of time.

Wake up from sleep mode

To wake up your device manually, press the Power Button. You will then see that the device has locked the screen.

Unlocking the screen

Press the bar on the lock screen and then slide your finger leftwards/rightward to unlock the screen.

Browse Home Screen

You can go to the extended Home screen by sliding your finger horizontally across the screen to go to the left or right side of the Home screen. Tap the icon  to view all applications on your device.

3.1 Status and notifications

Status and Notification Icons may appear

The status bar (as the above) presents media volume, networks condition, battery condition, time and so on. When an application is running, corresponding notification icon will appear in the notification area. Icons you may often see are listed as follows:

Status icons and its meanings		Notification icons its meanings	
	Tap to go to the Home screen		New Gmail/Google Mail message
	Back		New Email message
	Recently windows viewed		Music player is ongoing
	Menu icon		SD card is mounted
	Notification		USB Connected
	Connected to a Wi-Fi network and display the signal strength		Airplane mode
	Battery is charging		Settings

Open notification panel

When a new notification icon displays in the status bar, press and hold the status bar, then slide your finger upward to open the Notifications panel as follows:

If you have several notifications, you can scroll down the screen to view more notifications.

In the dropdown notification panel, there are shortcut buttons for turning on/off Wi-Fi, airplane mode, auto-rotate screen and for adjusting screen brightness.

Close the Notifications panel

Do one of the following:

- Simply press the Back button on the device panel.
- Tap any other area on the display screen

3.2 shortcuts to Add widgets

To add widgets to Home screen, you can

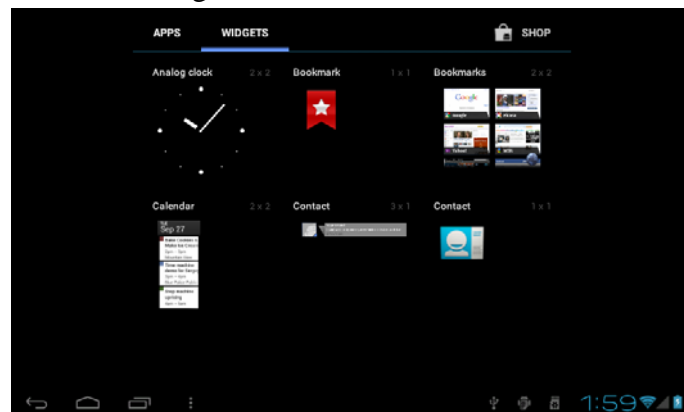

1. tap  on the home screen to enter into all apps interface as follows

2. tap **WIDGETS**

3. select one item.

Slide your finger horizontally on the home screen to check widgets that can be added to the home screen. Widgets selectable are as follows:

3.3 Finger gestures

Tap: When you want to type using the keyboard, select items onscreen such as application and settings icons, or press onscreen buttons, simply tap them with your finger.

Press and hold: To open the available option for an item (e.g. contact or link in a web

page), simply press and hold the item.

Swipe or slide: To swipe or slide means to drag your finger vertically or horizontally across the screen.

Drag: Press and hold your finger with some pressure before you start to drag. While dragging, do not release your finger until you have reached the target position.

Rotate: For most screens, you can automatically change the screen orientation from portrait to landscape by turning the device sideways. When entering text, you can turn the device sideways to bring up a bigger keyboard. Refer to Settings chapter for more details.

3.4 Coping files to and from the storage card

You can copy music, photos/pictures and others to your device to personalize your device.

1. Use the USB cable that came with your device to connect it to a USB port on your computer.
2. when the icon  appears in the notification area, open the notification panel and tap **USB Connected** to popup the following screen:

3. tap **Turn on USB storage**, when the notification icon  turns yellow, the computer will recognize your device as a removable disk;
4. find the removable disk and open it. Do one of the followings:
 - Copy the files from the computer to the storage card's root folder.
 - Copy the files from the storage card to a folder in your computer or computer desktop.
5. after copying the files, unmount the removable disk (that is, your device) as required by your computer's operating system to safely remove your device.

6. disconnect your device from the computer.

If you want your device remain connecting to the computer and enable reading its storage card, you can open the Notifications panel and tap

Turn off USB storage.

[Note]: you can also realize communication between the device and the computer by tapping Settings> Developer options>USB Debugging.

3.5 Searching the device and the web

You can search for information on your device and on the Web by using the Quick Search Box.

1. press  on the home screen to enter into all apps interface;
2. tap **Search** and then enter the search item in the Quick Search Box
As you type, matching items on your device and suggestions from Google web search are shown as a list. The suggested items that appear will depend on the options that you have selected in the search settings.
3. Do one of the following:
 - If what you're searching for is in the list of suggestions, tap it in the list. The item opens in the appropriate application.
 - If what you're searching for is not in the list, tap  to open the search option menu. Tap Web and then tap  to search the Web. The web browser opens, displaying results of a Google search on the Web

4. Personalizing

4.1 Change the Notification ringtone

Choose from the available selections of notification ringtones on your device. You can also download or copy notification ringtones or songs to your device' storage card and choose one to use as your notification ringtone. To find out how you can copy files to your storage card, see “Coping files to and from the storage card”.

1. In the Home screen, tap Settings > Sound > Notification ringtone.
2. Tap the notification ringtone you want to use. The notification ringtone briefly plays when selected.
3. Tap **OK**.

4.2 Change your wallpaper

Personalizing your Home screen wallpaper with your favorite photo is a quick and easy way to change the feel of your device and give it a fresh look. Browse the collection of wallpapers included in your device or choose from photos that you have taken with the camera.

To change your Home screen or lock screen wallpaper:

1. on the Home screen press  to prompt the **Choose wallpaper from** menu as follows,

[Note]: you can also press and hold the home screen to prompt the **Choose wallpaper from** menu

2. and then tap **Wallpaper**.
3. choose source of wallpaper

you can do one of the following:

- Tap **Super-HD Player** to select a photo/picture that you have taken using the camera or copied to your storage card. Tap **Crop** to crop the photo/picture

and set the cropped picture as wallpaper.

- Tap **Wallpapers** gallery to choose from preset wallpapers and then tap **Set wallpaper**.
- Tap **Live Wallpapers** gallery to choose from preset wallpapers and then tap **Set wallpaper**.

4.3 Personalize your Home screen with widgets

Widgets put at-a-glance important information and media content up front on your Home screen. Some widgets are already added to your Home screen for your convenience. You can add more from the available selections of widgets, or download more widgets.

① adding a widget to your Home screen

A wide selection of widgets is available for you to choose from, such as Calendar, Music, Photo Album, and more.

1. go to the part of the Home screen where there's space to add a new shortcut. To find out how, see "***Browse the Home screen***".
2. press and hold on the Home screen to open the **Add to Home screen** options menu.
3. Tap **Widgets** and then select a widget that you want.

[Note]: To remove a widget, press and hold the widget until the icon  appears, drag the widget onto it and release your finger.

② Adding folders on your Home screen

Use folders to group related applications and other shortcuts to keep your Home screen tidy and organized.

Press and hold the application shortcut and drag it onto another shortcut to create a folder for the applications you want to file together, and then release your finger to finish creating a folder. You can drag any other application shortcut into the new folder.

To rename a folder:

1. Tap the folder to open it.
2. Tap **Unnamed Folder** to prompt the keyboard.
3. Enter a new folder name and then tap **OK**.

4.4 Rearrange or remove widgets and icons on your Home screen

Rearrange the widgets and icons on your Home screen to give room for adding more items to the Home screen. You can also remove widgets and icons that you don't frequently use.

① Moving a widget or icon

1. Press and hold the widget or icon you want to move.
You'll see a yellow box around the widget or icon. Don't release your finger.
2. Drag the widget or icon to a new location on the screen.
Pause at the left or right edge of the screen to drag the widget or icon onto another Home screen panel.
3. When the widget or icon is where you want it, release your finger.
If you've released your finger but a message shows that there's no space to place the widget or icon, drag it right or left again to another Home screen panel.

② Removing a widget or icon

1. Press and hold the widget or icon you want to remove. You'll see a yellow box around the widget or icon. Don't release your finger.
2. Drag the widget onto the cross icon  in the middle of the screen top.
3. When the widget or icon also turns red, release your finger.

5. Web browsing

User can connect to the network via the browser.

Tap the browser icon  on the Home screen to open it as follows:

6 Manage Applications

You can personalize and enrich your AN7HG3 by installing a wide variety of free and paid apps ranging from productivity apps, entertainment, to games. When you find a program you want, you can easily download and install it on your AN7HG3 with just a few steps as follows:

How to install Android third-party programs

1. download the programs you want from web sites and store them into your storage card or local memory. You can also copy programs downloaded on your computer into your storage card or local memory;
2. run the application File Manager
3. find the third-party program you want, and then use functions of File Manager to install it to your device.

How to uninstall Android third-party programs

To dismount the program, you can also use functions of File Manager And you can also by tapping **Settings > Apps> Downloaded** to uninstall a third-party application.

7. Typical applications introduction

7.1 Music Player

Enjoy listening to songs and music on your AN7HG3 using the Music application. You need to copy music files to your storage card first to use the Music application to play music. To find out how to copy files, see “*Copying files to and from the storage card*”. Audio formats supported include/wav/ac3/aac/ogg /ra/amr/m4a/wma and so on.

Tap the icon **Music** on the Home screen to enter the following screen:

Your music is organized into different categories such as Artists, Songs and Albums. Tsp one of the category tabs to view a category.

Select a song in the playlist and tap on it to start playing as follows:

Tap to go to the previous song.

Tap to play, pause, or resume playing the song

Tap to go to the next song

	Tap to go to the now playing list
	Tap to switch the following repeat modes: repeat all songs; repeat current songs; .do not repeat
	Tap to shuffle the current playlist.

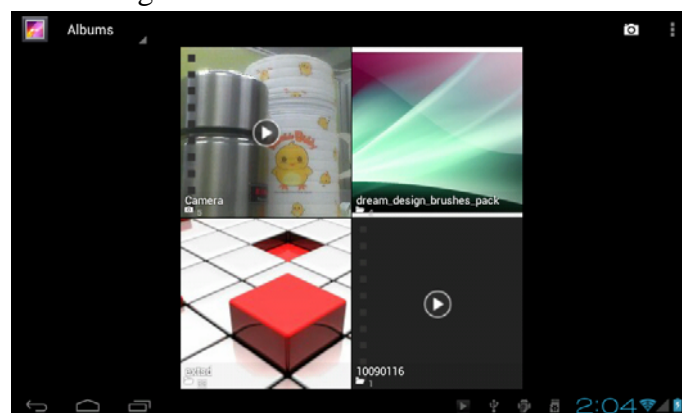

When you are playing music and the screen turns off, you can control the music playback right from the Lock screen when you “wake up” the device by pressing POWER button. If you do not see the playback controls on the Lock screen, tap anywhere on the screen to display the playback controls.

7.2 Video Player

Tap the launcher icon  on the Home screen and the tap the Super-HD player icon

to go to the following interface:

When there are multiple video files in the player, tap  to display all video files in thumbnail mode or in details display mode. Double tap on a video file to start playing it.

On the video playing screen, tap on the screen to popup the control bar as follows:

	volume down
	volume up
	Tap to play the previous video file in the video list
	Tap to play/pause the Now playing video file
	Tap to play the next video file in the video list
	Tap to unfold the control bar for personalizing the play mode, such as video track, zoom mode and so on
	Tap this icon to go back to the video file list interface
	Drag the slider to adjust playing progress

To quit the video playing screen, press the Back icon in the status bar directly.

7.3 Gallery

You use Gallery to view pictures and play videos that you've taken with Camera, downloaded, or copied onto your SD card. You can perform basic editing tasks on pictures and set them as your wallpaper or contact picture. You can also share your pictures and videos with friends.

On the Home screen tap the Super-HD player icon, photos and videos are classified automatically for easy view. the gallery application will run and the interface is as follows:

Browse & edit pictures/photos

Tap an album to open it and view its contents;

Tap  on upper right corner of the screen to browse all photos/pictures in slideshow mode.

Select a picture to view it in full screen mode; drag left or right to view the next or previous picture in the album; move you fingers inward/outward to zoom out/zoom in the selected photo/picture. Tap  to share it with friends via email, tap  to delete/cancel deleting it, tap  to pop up the following control bars:

Tap **Slideshow** to slide show all pictures in the album;

Tap **Edit** to edit it. When the picture is zoomed in, drag the picture to view parts that

are not in view. When the picture is zoomed to fit the window, drag left or right to view the next or previous picture in the album.

Tap **Rotate left** or **Rotate right** to rotate the picture/photo 90° anticlockwise or clockwise;

Tap **Crop** and then the following cropping rectangle will appear on top of the picture/photo:

Drag from the inside of the cropping tool to move it; drag an edge of the cropping tool to resize it to any proportion; drag a corner of the cropping tool to resize it with a fixed proportions.

Tap **CROP** to save a copy of the picture as you cropped it. The original uncropped version remains on your SD card.

Tap **Set picture as** to set the current picture/photo as wallpaper/ contact icon;

Tap **Details** to more details about the current picture/photo;

Browse & play music/video

Use Gallery to play videos/music or that in your SD card. And you can also share them with others.

Open a Gallery album containing videos /music and tap one to play it.

During playing, tap on the screen to popup the playback controls.

To quit the playing screen, press the power button, and tap Back icon in the status bar.

Share a video/music

When browsing the video/music in the gallery, you can tap  to share the video/music with your friends; tap  to delete the selected video/music; tap  to get more details about the video/music.

7.4 File Manager

① Introduction to File Manager

On the Home screen, tap the file manager icon to open it as follows:

Tap to back to the previous interface

Tap to display files in local storage card

Tap to display files in T Flash card

Tap to display files in other external storage device

Tap to display all pictures/photos

Tap to display all video files

Tap to open the tool box for process info and application backup

Tap to open/shutdown multiple choice of items

② File Management

In the above screen, you can search a wanted file quickly and you can also manage your files in the local disk and your storage card. In addition, you can create/rename file folder(s) and uninstall a third party application.

Paste: press  to select an item/multiple items in the list and tap **Copy/Move**, and then go to the file folder where you want to copy/move the item(s) in, then press and hold the folder until the **Folder operation** menu popup, select **Paste into Folder**.

Delete: press  to select an item/multiple items and tap **Delete** to delete the

item(s) directly.

Folder operation

Press and hold any folder in the local disk or your storage card until the **Folder operation** menu pop up as follows:

You can select an option to execute corresponding operations.

Search: when you do not know the definite location of an item or there are many items in the list, to find it quickly, you can tap the Menu icon  and then tap  to open the keyboard to search it.

7.5 Instant Messaging tools

You can download and install chat tools on your device such as Fring, MSN Massager and so on.

7.6 Emails

Tap the launcher icon  on the Home screen to display all icons, tap the Email/Gmail icon to run it. You can:

1. set mail accounts
2. create new mails
3. receive and send mails
4. download or open the attached files

[Note]: press the menu icon can popup the shortcut menu.

8. Settings

Control and customize your device settings on the Settings screen.

To open the Settings screen, simply tap the Settings icon  on the Home screen.

You can scroll on the screen upwards/downwards to check the rest setting items.

8.1 Wireless & networks

Configure your device's wireless connections, e.g., Wi-Fi, enable the Airplane mode, or set the options for mobile networks, Virtual Private Networks, and more.

Wi-Fi

To turn on/off Wi-Fi, simply slide your finger rightward/leftward on the control bar.

8.2 Sound

Set the device and notification ring tones, volume adjust, vibrate and silent mode operation.

Volume

To adjust the volume for media, ringtone, notification and alarms:

1. tap Settings > Sound > Volume;
2. drag the control bar leftwards/rightwards to turn down/up the volume for media and notification;
3. tap **OK**.

Notification ringtone

To set a notification ringtone:

4. tap Settings > Sound > Notification ringtone
5. tap a ringtone to listen to it
6. enable a ringtone as notification ringtone by tapping **OK**.

Audible selection

To enable playing sound when making screen selection, simply check it.

8.3 Display

Set the screen brightness, auto-rotate, animation and screen timeout.

Brightness

Use the slider to set a brightness level you want at all times when using the AN7HG3. For the best battery performance, use the dimmest comfortable brightness.

Wallpaper

Tap to select source of wallpaper and set wallpaper for the device.

Auto-rotate screen

Check to automatically switch the orientation of the screen as you turn the device sideways or even upside down.

Sleep

Opens a dialog where you can set how long to wait after you tap the screen or press a button before the screen darkens. For the best battery performance, use the shortest convenient timeout.

Font size

Opens a dialog where you can set font size.

Accelerometer coordinate system

Open a dialog where you can set the coordinate system for the device.

Screen adaption

Check to enable screen adaption.

8.4 Storage

Check the usage condition of the storage space on the internal l& external storage card. You can erase all data on the SD card and unmount the external SD card for safety removal.

Unmount the SD card: tap settings > storage > unmount SD card > OK.

8.5 Apps

Manage applications and installation of new programs.

Apps

Opens a list of all the applications and other software installed on your AN7HG3, along with their sizes. By default, only downloaded applications are shown, and they

are sorted in alphabetical order. Press  and tap **Sort by size** to display applications in order by size. Tap an application to open its Application Info screen.

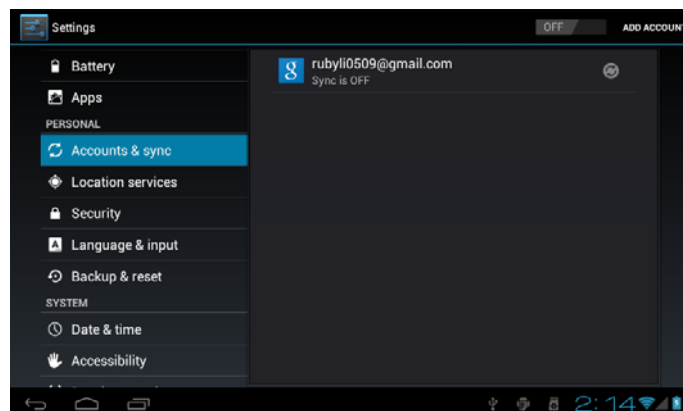

To manage and /or remove uploaded applications, tap Settings > Apps > Downloaded.

Running services

To check and control running service, tap Settings > Apps > Running services.

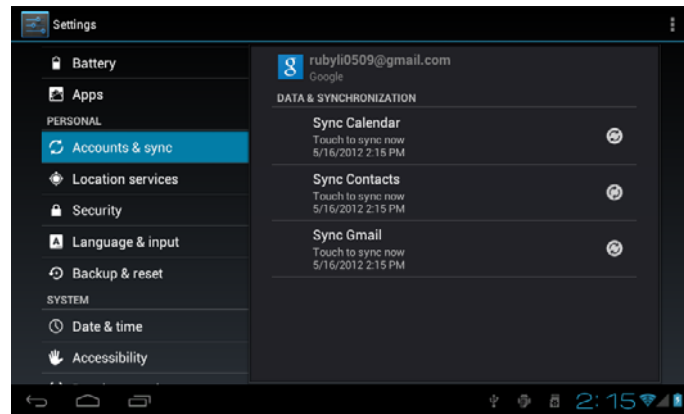

8.6 Accounts& Sync

Log in or out from your social network accounts, Google Account, and Exchange ActiveSync account. You can also manage synchronization and other settings for your accounts.

Tap  to turn on/off account sync . Tap **ADD ACCOUNT** in the above

screen to add new accounts by following onscreen instructions. Tap the icon  to prompt the following screen to manage your accounts:

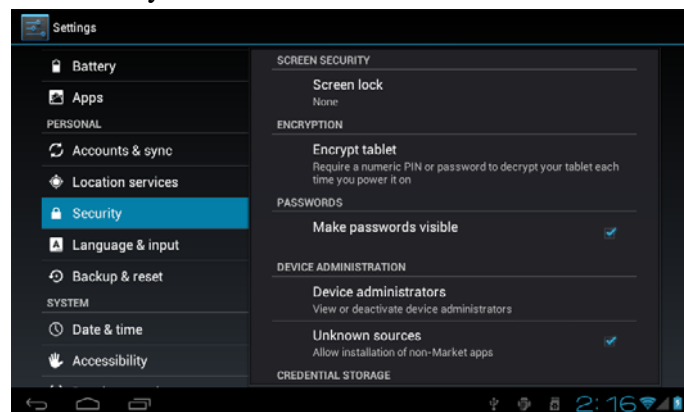

Check  to turn on/off data synchronization, press the menu icon  and then tap **Remove account** to remove the selected account from your device.

8.7 Location service

Enable applications using data from sources such as Wi-Fi and mobile networks to orientate your location and improve Google search results via check the options.

8.8 Security settings

Set the screen lock mode and owner information, encrypt your device, manage password and administrate your device.

To set screen lock mode, tap **Settings > Security > Screen lock** to personalize the screen lock mode for you device.

Unknown source

Check to permit installation of applications that you obtain from web sites, email, or other locations other than Android Market.

When the storage card remains in your device, you can tap **SD1 > Mount SD card** to mount and read data in the storage card.

8.9 Language & Keyboard setting

Set the operating system language and region. You can also set onscreen keyboard options.

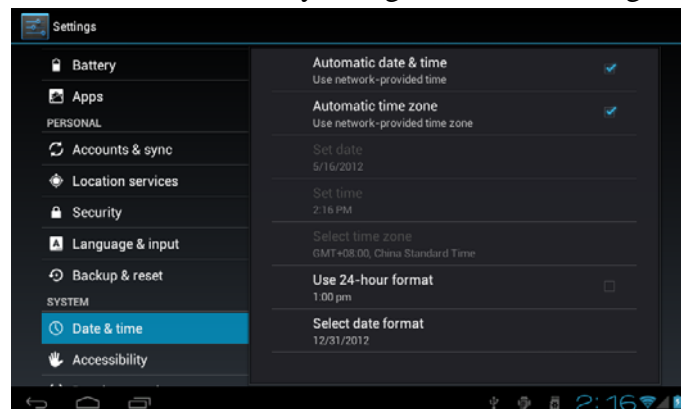

8.10 Backup &reset

You can enable or disable the automatic backup feature of the device and reset the device.

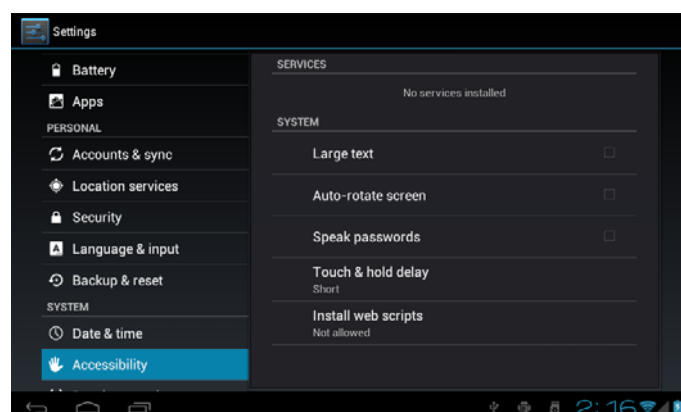

[Note]: after factory data reset, you personalizing settings and the installed third-party applications will be removed from your device. Before restoring default settings, it is suggested to backup data/applications you want and remove your storage card safely in case of data loss or damage during restoring factory default settings.

8.11Date & Time setting

Set the date and time, time zone, and date or time format. To turn off auto time synchronization and be able to manually change time zone settings.

8.12Accessibility

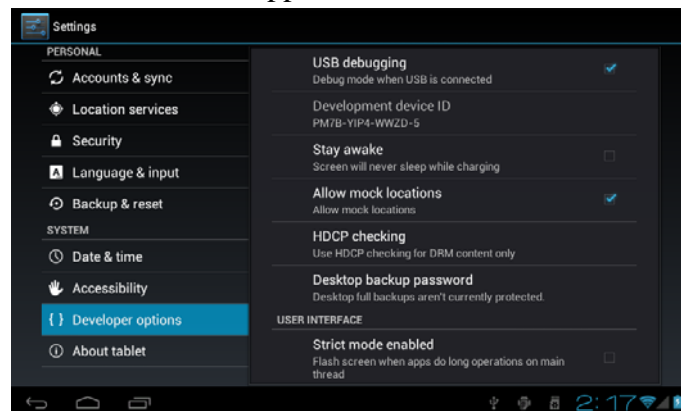

Large text: check to enlarge text

Auto-rotate screen: Check to automatically switch the orientation of the screen as you turn the device sideways or even upside down.

Speak password: check to enable speak password

8.13 Developer options

You can set the USB debugging mode, select screen stay awake and so on. And you can also manage user interface and apps.

USB debugging: Check to permit debugging tools on a computer to communicate with your AN7HG3 via a USB connection.

Stay awake: Check to prevent the screen from dimming and locking when the AN7HG3 is connected to a charger or to a USB device that provides power. Don't use this setting with a static image on the AN7HG3 for long periods of time, or the screen may be marked with that image.

Allow mock locations: Check to permit a development tool on a computer to control where the AN7HG3 believes it is located, rather than using the AN7HG3's own internal tools for this purpose.

8.14 About Device

View the device status such as the network type, battery power level, and network name. You can also check the battery use of individual applications or view the legal information and software version of your AN7HG3.

9. Troubleshooting

9.1 Force shutdown

Press the Power Button for about 5 seconds and the device will be forced shutdown

9.2 Restore default settings

To restore the factory default settings, you can tap Settings > Backup& reset> Factory data reset.

Warning: data of your Google account, your personalized settings, installed applications will be removed from your device once you execute factory default settings, so please make a careful decision whether to restore default settings. Before restoring default settings, it is suggested to backup data/applications you want.

9.3 System updating

After system update/upgrade, it may occur that the uploaded third-party can not run or its data loss/damage. This is normal phenomena rather than system fault. You just need to upload and installed the third-party applications again in the device. It is recommended to backup data of the third-party applications before system update/upgrade.

9.4 Reset

When the system halts accidentally or does not response, please press the Reset key to restart the system or press and hold the power button for 8 seconds to turn off the device forcibly.

[Note]: it is normal for the device feels hot during charging, please use at ease.

10 FCC statement

1. This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without RF strictio
