- 1) Address Question #6: Certified and tested cable length is 80 cm as we show on the manual. The cable length will be provided with HSB1 during marketing.
- 2) Address Question #2: The operational configuration of the HSB1: HWBA54G Wireless Access Point, HPP Cable, HSB1 and 2dBi Dipole Antenna, used as a single kit
Compliance with 15.204 d1
 - NDD9572030410 is the ID of the Access Point approved for use as a kit with the HSB1.
 - The language in the user manual and all marketing material have been revised to comply with the FCC regulations and requests as of 11/30/2004.
 - The advice that only the cable provided with the device can be used is noted and the appropriate additions to the manual will be made.
- 3) Address Question #2: The language in the marketing material for the HSB1 as well as the user manual and package contents have been adjusted to comply with the regulations set by the FCC. The operational description stating that “adapters are available for multibrand operation” has been removed as of 11/30/2004.
