## Overview

This application is for a class II permissive change to FCC ID: SPD003, which uses a Mitsumi Bluetooth transceiver model WML-C40. This radio has full modular approval. This change is to add another antenna configuration, which will be used with the CyberOptics wireless gap sensor model WaferSense AGS200. No changes have been made to the radio. This antenna has an increased gain and will be used as a mobile configuration. MPE estimates have been provided to show compliance to the exposure conditions for mobile use.

## Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
