

The image shows the back of a black, rectangular electronic device. The device has a textured, rubberized surface. There are four circular mounting holes, one in each corner. On the left side, there is a small circular port. On the right side, there is a larger rectangular port. A white rectangular label is placed in the center of the device, with the text "FCC ID" on the top line and "Label Location" on the bottom line. The device is set against a plain, light-colored background.
