RE: FCC Part 15 Class 2 Permissive Change for FCC ID: SQB-NIVISMOD0001

Dear Applications Examiner:

Enclosed please find Nivis, LLC.'s file copy of the Part 15 Class 2 Permissive Change Application for Nivis, LLC's module model 2.4GHz Mod2.

This Application is requested because Nivis, LLC is adding an additional antenna to be used with this module. The additional antenna is of a different type and gain.

Per FCC Permissive Change Policy, Section 4c, we declare that:

1. There has been no design change to the product, only an antenna has been added and software changed.
1. The output power on the product with the new antenna is lower (through software function), but the original product with the original antenna will continue to be sold with no changes in the maximum output power.
3. No power limit has been exceeded.

Further information about the antenna can be found in the report herein.

If you have any questions, please don't hesitate to call.

Sincerely,

A handwritten signature in cursive script, appearing to read "Alan Ghasiani", is written over a light gray rectangular background.
