

Mr. William Graff  
ATCB  
RE: NiVIS  
FCC ID: SQB-NIVISP9050103

Bill,

This cover letter is provided to state the purpose and reason for the request for a Class II Permissive Change to the above named FCC ID.

The Equipment Under Test (EUT) is the Nivis Amplified Radio Modem RF-P9-05-01-03. The EUT is a Spread-Spectrum Frequency Hopping RF Modem operating in the 902-928 MHz ISM band. The radio modem is designed for remote data acquisition systems.

## **1.2 Related Submittal(s)/Grant(s)**

The EUT has been previously approved under FCC ID: SQB-NIVISP9050103 on 3/16/2005 under Part 15C and revised on 4/27/2005.

The EUT will be co-located with another transceiver (currently submitted and pending approval under FCC ID: SQB-NIVISCM42).

A separate Class II Permissive Change application for SQB-NIVISCM42 will be submitted under U.S. Technologies Project Number: 05-0232. This permissive change will include Intermodulation Test results as presented in this report for use with the Nivis RF-P9-05-01-03 module.

Please contact me with any questions or comments. Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'L. Feudi', is written over a horizontal line.

Louis A. Feudi  
Operations and Engineering Manager
