Re: FCC ID: SBQ-NIVISVN400

To Whom It May Concern:

The following application is submitted on behalf of our client, Nivis, LLC, for evaluation of their model VersaNode 400 for certification under FCC Part 15.247 for a class II permissive change.

The purpose of this permissive change is to add a $\frac{1}{4}$ wave monopole antenna.

The VersaNode 400 is a transceiver module that operates in the 902-928 MHz band. Multiple modes of operations and available data rates are available and were evaluated for this certification.

The VersaNode 400 was tested in full to the requirements of the aforementioned rules, as applicable to the class II permissive change, and was found to be in compliance.

Sincerely,
