Dear Madam or Sir,

We, FUJITSU COMPONENT LIMITED, hereby declare that:

1. Our Bluetooth Module models listed in the table are essentially the same device except for the difference that showed in the table.
2. This difference doesn't affect the radio characteristics. Antenna gain is different for two models, so band edge compliance and spurious emission test were conducted.
3. The electrical characteristics among those models are identical to each other.

Model	Mounted type to the host device	Antenna gain
MBH7BTZ45	Surface-mount	-3.6dBi
MBH7BTZ46	Connector	-6.4dBi

Thank you for your attention to this matter.

Best regards,

Tohru Muramatsu
