4. SET-UP for Bluetooth SPP connection

Connect CN2 connector on MBH-SAKURA2 and the USB port on PC with USB cable to control Bluetooth SPP module (Figure 4-1).

To work with the USB serial port (UART over USB), first download the FTDI FT232R driver (D2XX and VCP) from:

<http://www.ftdichip.com/Drivers/VCP.htm>

Install the driver according to the installation guide available on the FTDI web site.

After the driver is installed, go to *My Computer->Properties->Hardware->Device Manager->Ports* to identify the COM port to which the USB serial port is assigned.

-The baud rate is set to 115.2kbps (Default setting)

5. Required Software

“BlueSuite” test tool by CSR.

Account registration is required to download from the support website of CSR.

When there is no account, please contact your local sales.

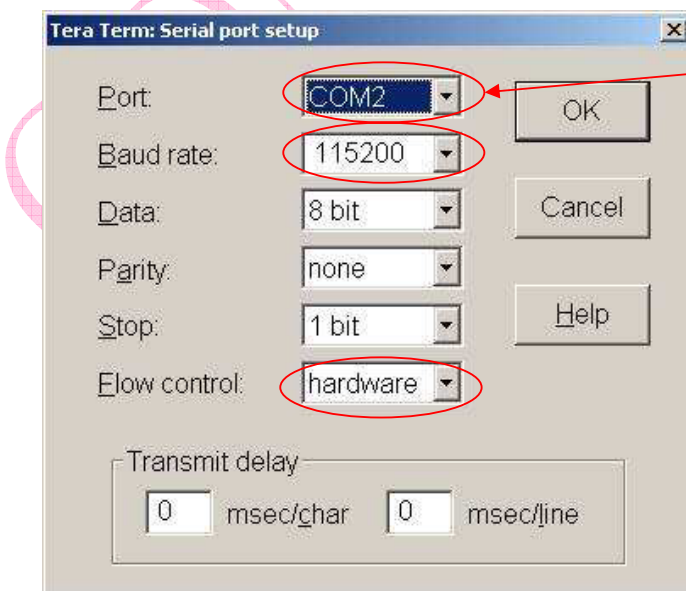

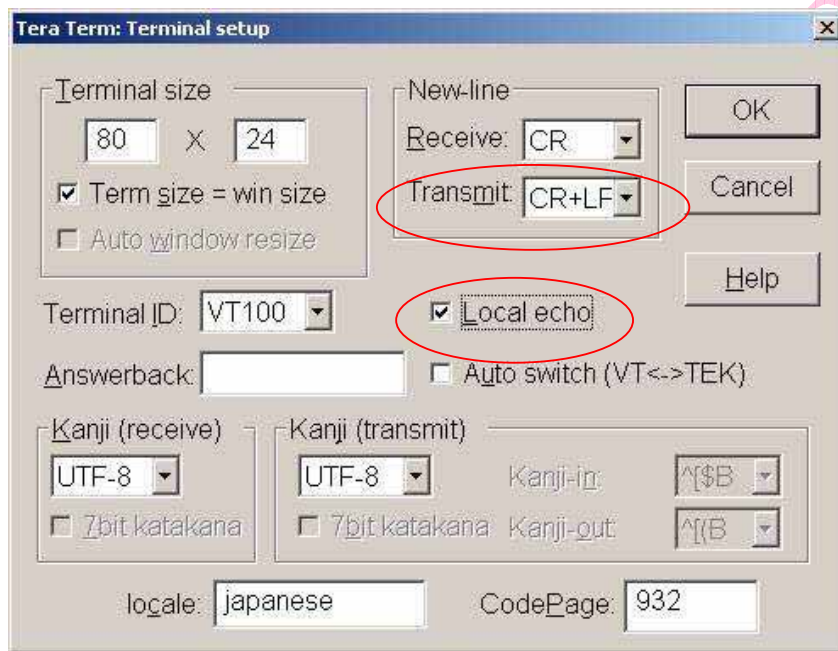

“Tera Term” is terminal software to control Bluetooth SPP module.

Tera Term is downloadable from the following website.

<http://tssh2.sourceforge.jp/>

6. Setting of Tera Term

When you use Tera Term, please change the setting as below.

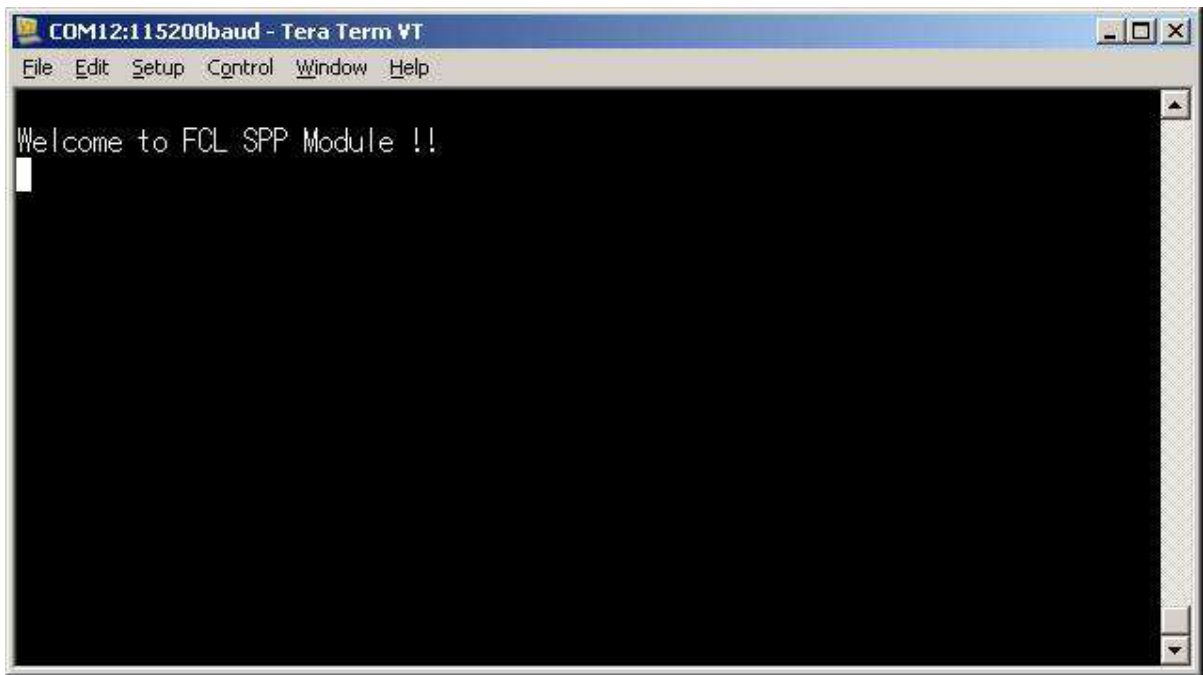

Select COM Port No which is assigned USB Serial port

7. Operating Procedure for Tx/Rx mode control

7.1 Mode change of the SPP Bluetooth module

Connect CN2 connector on MBH-SAKURA2 and the USB port on PC with a USB cable to control Bluetooth SPP Module.

And, launch the Tera Term.

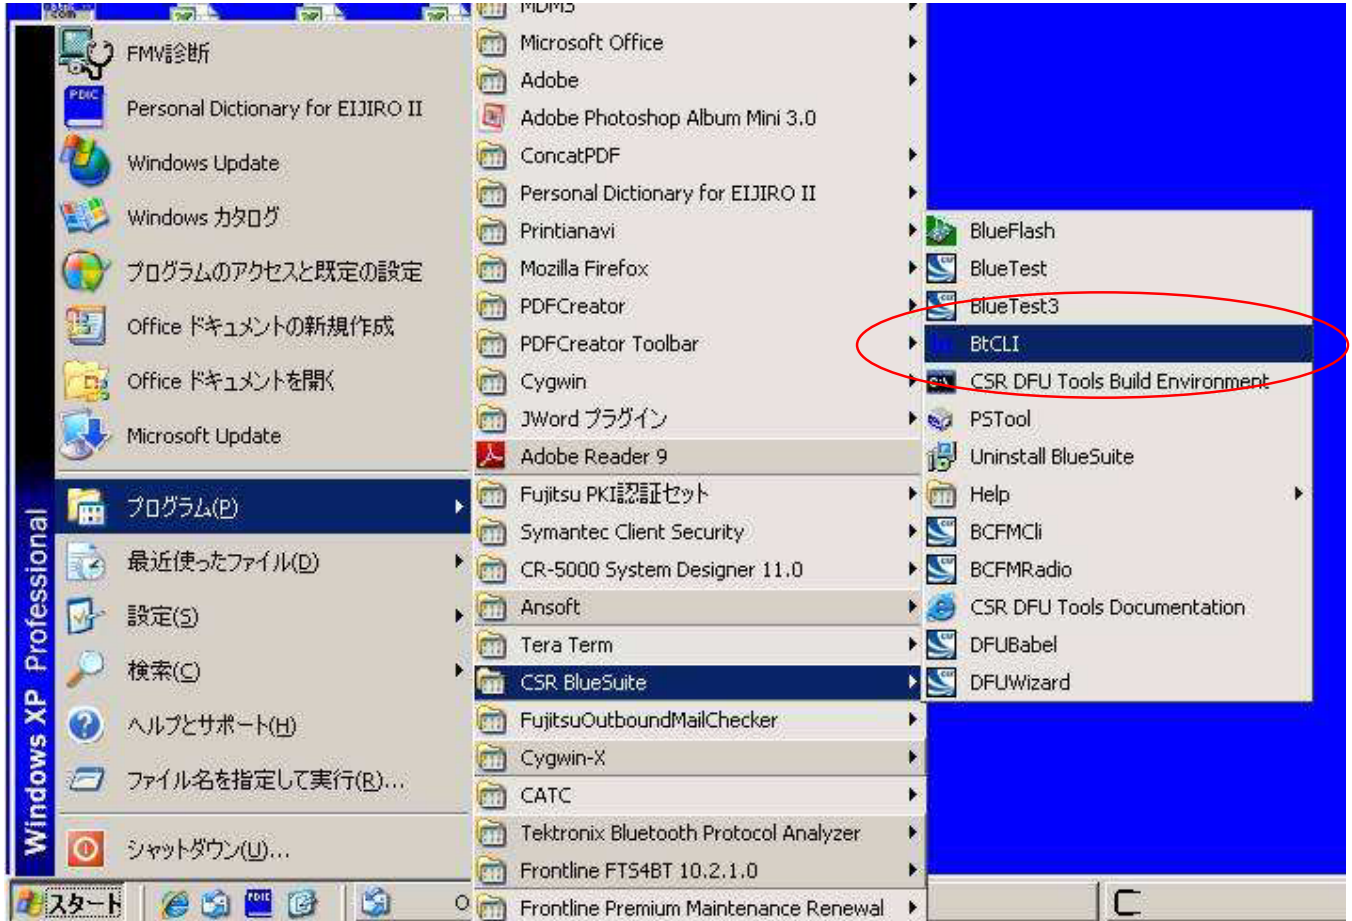

Input the BCSP_MODE command to change from SPP mode to BCSP mode.

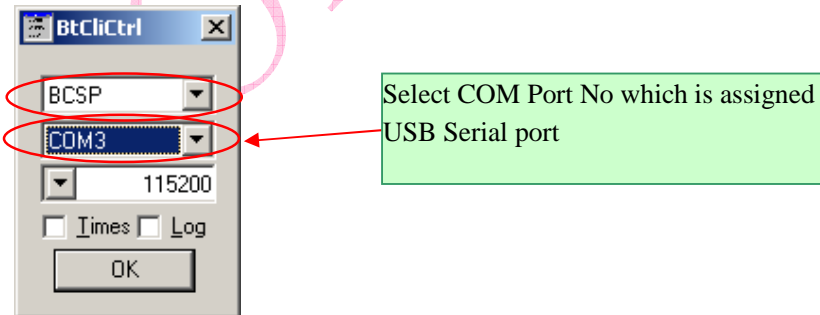

***Note: Since it is temporary, this module will operate SPP mode after reset (or power on).**

7.2 Operation of Test tool by CSR

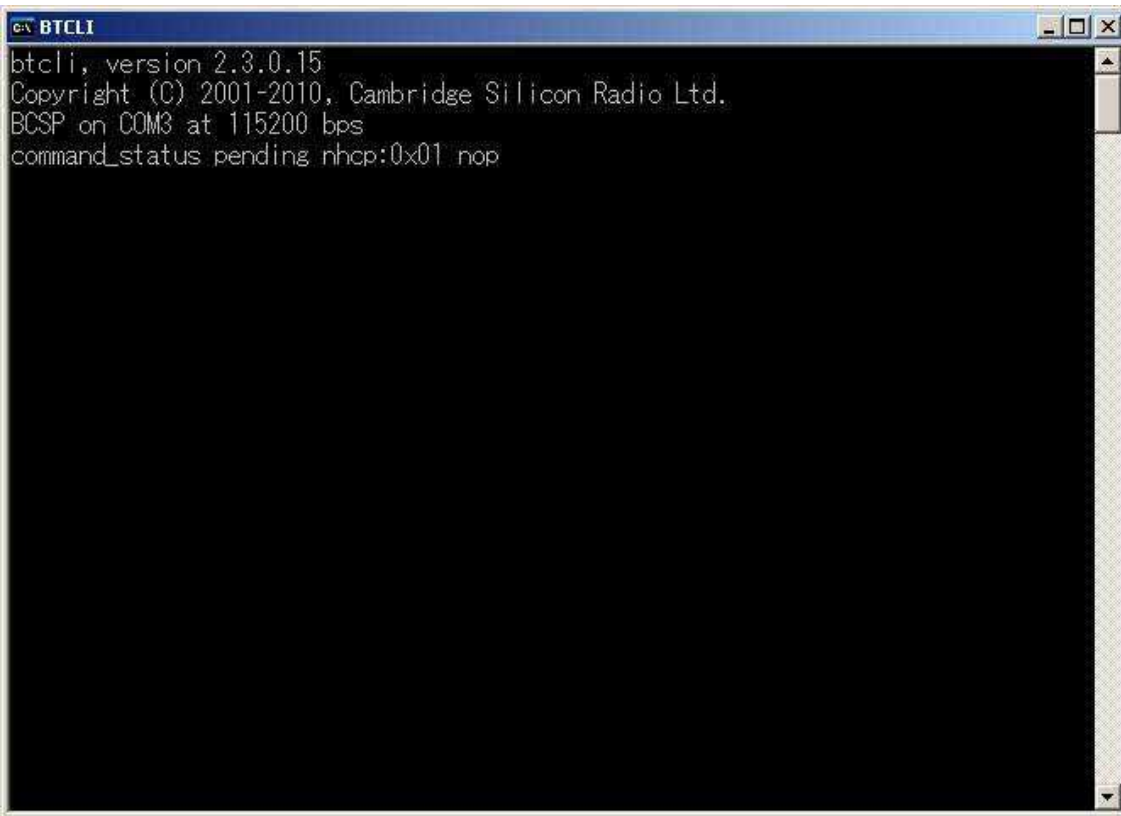

Close Tera Term after changing SPP Bluetooth module to BCSP mode.
And, execute "BtCLI" from Windows start menu.

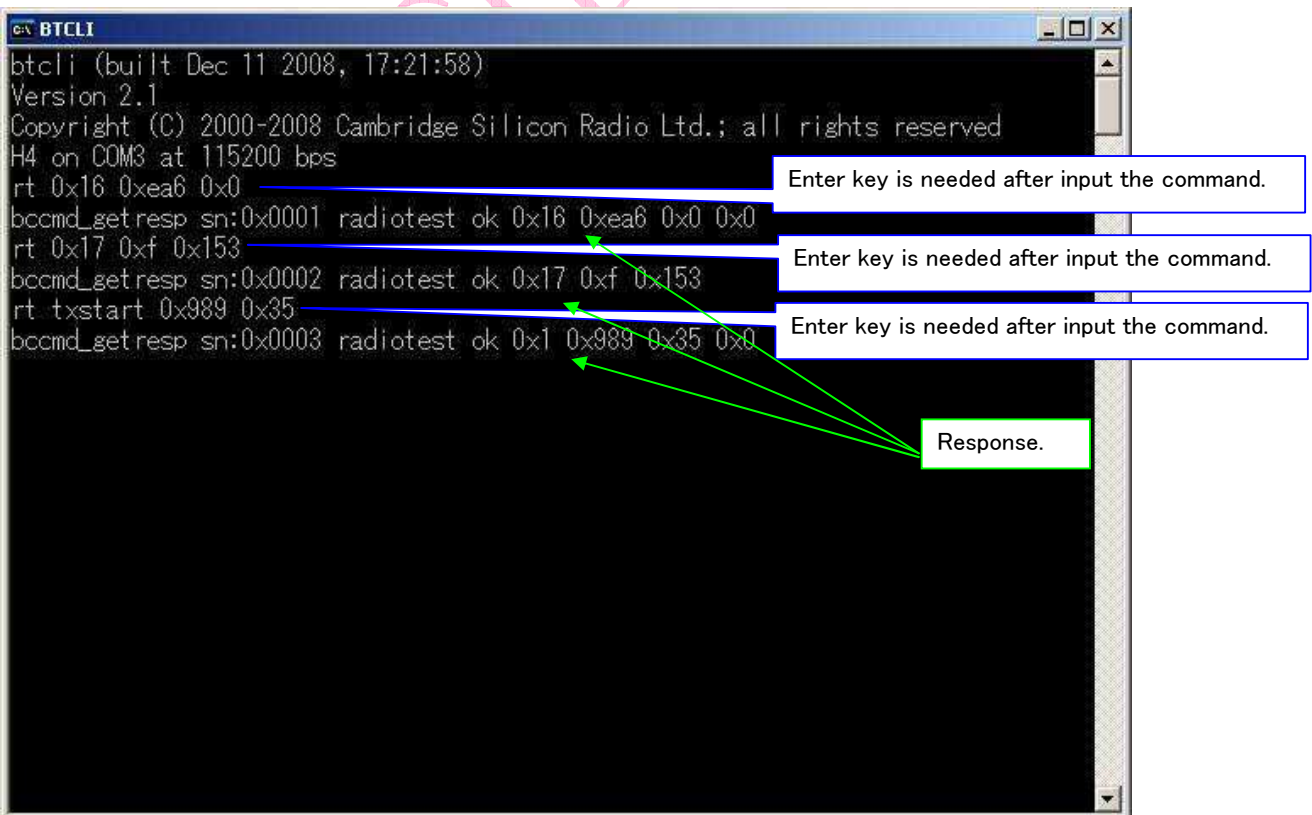

Set up as follows and click "OK".

The command prompt window is opened as follows.

SPP Bluetooth module is controlled by command line interface. Refer to the following page for the details of a command. (The following is example for the setup of unmodulated, BasicRate, DH5 packet.)

Notice:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Caution:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Responsible party: Fujitsu Components America, Inc.

Address: 250 E. Caribbean Drive, Sunnyvale, CA 94089 U.S.A.

Telephone number: 408-745-4900

This device complies with part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Note to users in Canada

Note:

This Class B digital apparatus complies with Canadian ICES-003.

Remarque concernant les utilisateurs au Canada Avertissement:

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Note to users

It is strictly forbidden to use antenna except designated.

This equipment must not be co-located or operated in conjunction with any other antenna or transmitter.

This equipment complies with FCC/IC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules.

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement émet une énergie RF très faible qui est considérée conforme sans évaluation de l'exposition maximale autorisée.

Note to users in Canada

This device complies with RSS-Gen of IC Rules.

Operation is subject to the following two conditions;

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Remarque concernant les utilisateurs au Canada

Ce dispositif est conforme à la norme CNR-Gen d'Industrie Canada.

L'utilisation de ce dispositif est autorisée seulement aux deux conditions suivantes: (1)il ne doit pas produire de brouillage et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.
