

Appendix 10. RF Exposure statement

RF Exposure requirement per FCC Rules and Regulation CFR 47 Part 1.1307

Per the FCC Rules and Regulations as described in the OET Bulletin 65, this equipment is categorically excluded from routine evaluation because this equipment's donor antenna is used at fixed installations with antenna mounted on outdoor, permanent structurers.

"The service antenna is built in front of the repeater. It is a dipole antenna. The donor antenna is connected via cable. It is a patch antenna."

This transmitter is intended for use at fixed station sites only, and is not to be marketed for mobile use.

Under the Section 1.1307 of the FCC Rules, this transmitter is not subject to the Commission's environmental rules pertaining to the Routine Evaluation for RF exposure prior to equipment authorization.
