Greg Snyder  
PCTest Laboratories  
6660-B Dobbin Rd.  
Columbia, Md. 21045

Dear Greg;

TandD has developed a new wireless data logger that we call the RTR-52Pt. This model is identical to our model RTR-52 which was tested by your lab about two years ago, except that the external temperature sensor is a Pt100 type instead of a thermistor. The RF portion of the product is exactly the same.

Sincerely,

By:   
Stephen Knuth
