

## Appendix D: SAR Test Setup

<p>Photo 1: Measurement System SATIMO</p>	<p>Photo 2: Left Cheek</p>
 A photograph showing a white KUKA robotic arm mounted on a yellow stand. The arm is positioned over a white mannequin head. In the background, there is a computer monitor and other electronic equipment on a table.	 A close-up photograph of the left cheek area of the white mannequin head. A black circular antenna is mounted on the cheek, and a red string is visible near the base of the antenna.
<p>Photo 3: Left Tilt 15°</p>	<p>Photo 4: Right Cheek</p>
 A close-up photograph of the left cheek area of the white mannequin head, tilted at a 15-degree angle. The black circular antenna and red string are visible.	 A close-up photograph of the right cheek area of the white mannequin head. The black circular antenna and red string are visible.
<p>Photo 5: Right Tilt 15°</p>	<p>Photo 6: Face upward 10mm</p>
 A close-up photograph of the right cheek area of the white mannequin head, tilted at a 15-degree angle. The black circular antenna and red string are visible.	 A close-up photograph of the right cheek area of the white mannequin head. A vertical ruler is placed next to the antenna, showing a measurement of 10mm.

<p>Photo 7: Back Upward 10mm</p>  A photograph showing the back of a white container with a ruler placed vertically against it. The ruler is marked from 1 to 10 cm, and the container's back edge is aligned with the 10 cm mark.	<p>Photo 8: Edge A 10mm</p>  A photograph showing the front edge of a white container with a ruler placed vertically against it. The ruler is marked from 1 to 10 cm, and the container's edge is aligned with the 10 cm mark.
<p>Photo 9: Edge B 10mm</p>  A photograph showing the side edge of a white container with a ruler placed vertically against it. The ruler is marked from 1 to 10 cm, and the container's edge is aligned with the 10 cm mark.	<p>Photo 10: Edge C 10mm</p>  A photograph showing the front edge of a white container with a ruler placed vertically against it. The ruler is marked from 1 to 10 cm, and the container's edge is aligned with the 10 cm mark.
<p>Photo 11: Edge D 10mm</p>  A photograph showing the side edge of a white container with a ruler placed vertically against it. The ruler is marked from 1 to 10 cm, and the container's edge is aligned with the 10 cm mark.	<p>Photo 12: Liquid deep(15cm)</p>  A close-up photograph of a ruler placed vertically against the side of a white container. The ruler is marked from 8 to 20 cm, and the liquid level inside the container is visible at the 15 cm mark.
