

Appendix D: SAR Test Setup

<p>Photo 1: Measurement System SATIMO</p>	<p>Photo 2: Liquid deep(15cm)</p>
	
<p>Photo 3: Left Cheek</p>	<p>Photo 4: Left Tilt 15°</p>
	
<p>Photo 5: Right Cheek</p>	<p>Photo 6: Right Tilt 15°</p>
	

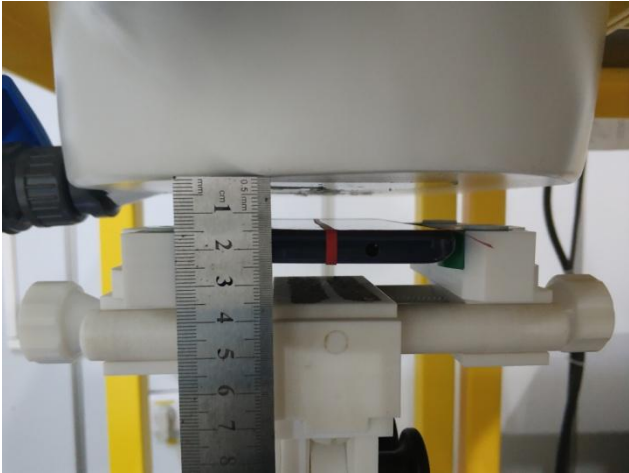

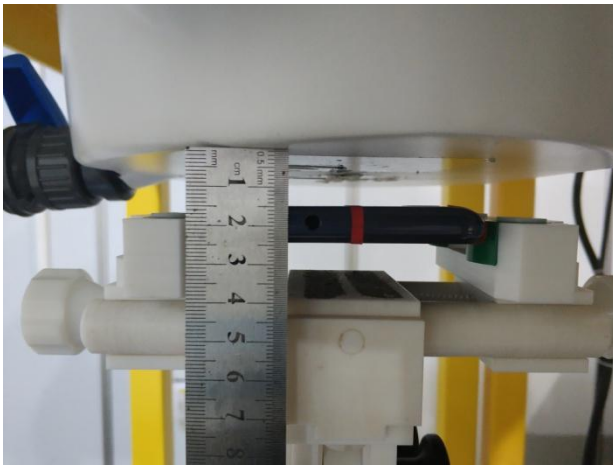

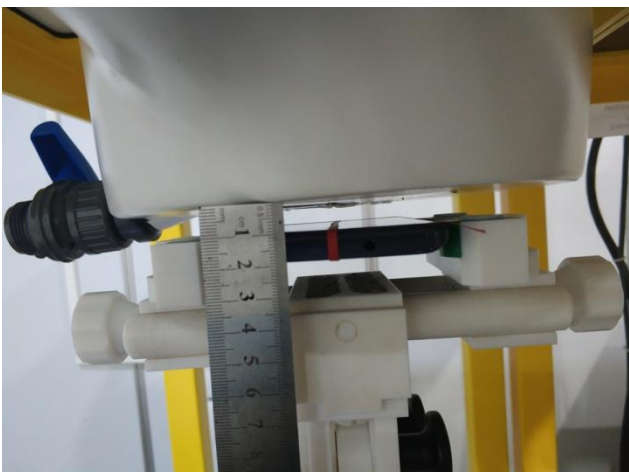

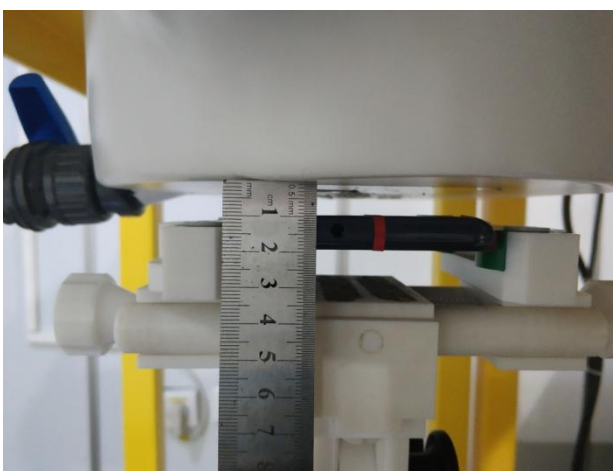

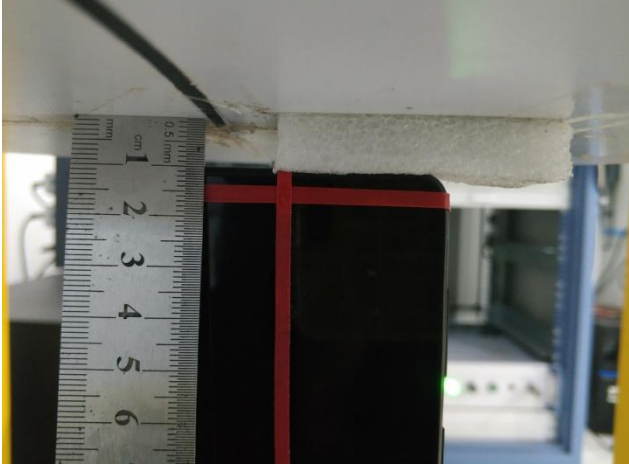

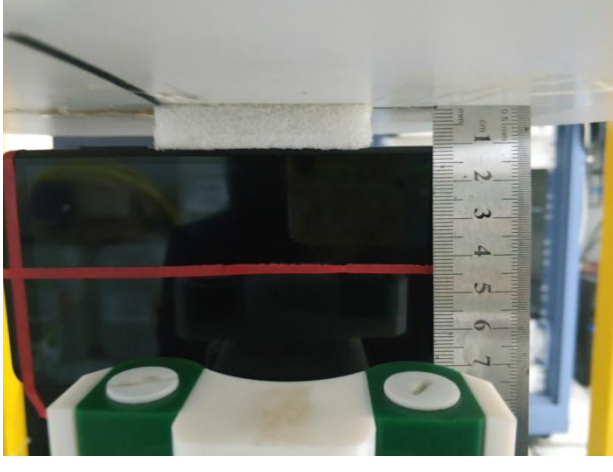

<p>Photo 7: Face Upward 15mm</p>	<p>Photo 8: Back Upward 15mm</p>
 A photograph showing a white plastic component with a ruler placed vertically against its side. The ruler is marked in centimeters and millimeters, showing a measurement of approximately 15mm. The component has a blue cap on the left and a black cable on the right.	 A photograph showing the back of the white plastic component with a ruler placed vertically against its side. The ruler is marked in centimeters and millimeters, showing a measurement of approximately 15mm. The component has a blue cap on the left and a black cable on the right.
<p>Photo 9: Face Upward 10mm</p>	<p>Photo 10: Back Upward 10mm</p>
 A photograph showing a white plastic component with a ruler placed vertically against its side. The ruler is marked in centimeters and millimeters, showing a measurement of approximately 10mm. The component has a blue cap on the left and a black cable on the right.	 A photograph showing the back of the white plastic component with a ruler placed vertically against its side. The ruler is marked in centimeters and millimeters, showing a measurement of approximately 10mm. The component has a blue cap on the left and a black cable on the right.
<p>Photo 11: Edge A 10mm</p>	<p>Photo 12: Edge B 10mm</p>
 A close-up photograph of the edge of the white plastic component. A ruler is placed vertically against the edge, showing a measurement of approximately 10mm. A red string is tied around the component.	 A close-up photograph of the edge of the white plastic component. A ruler is placed vertically against the edge, showing a measurement of approximately 10mm. A red string is tied around the component.

Photo 13: Edge C 10mm

Photo 14: Edge D 10mm
