Declaration of the minimum separation distance between antenna and the end user for all host devices

The minimum separation distance between the antenna, installed in the cavity of the host devices, and the place where the hand of the end user is intended to be located is 25 cm for following hosts:

H6780-2BP

H6880-2BP

H6780-2BP2

H6880-2BP2

HR1622-2

HR1924-2

HR1934-2

HR1935-2

HR1936-2

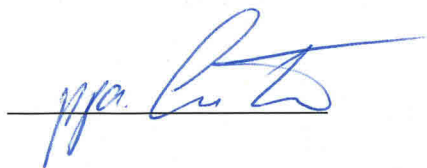

HR1954-2

HR1955-2

HR1956-2

The nearest place from antenna to the hand or body of the end user is the door outer glass pane or the buttons on the user interface.

Remark: According to test report "CETECOM_TR18-1-0081401T03a.pdf" at that distance the exposure is less than 0,1% of the applicable limit of 1mW/cm².
