Dear Sir/ Madam,

We, Advanced Compliance Laboratory, as EMC testing lab and agent, would like to represent the applicant, Remote Play, Inc. to apply for your approval on product authorization under **Class II Permissive Change**. The investigation for the EMC performance of the EUTs, **Laptop Tag, Model No. TA-100/TA-150** were performed in June, 2006 on behalf of Remote Play, Inc. It was found that EUTs comply with the requirements of FCC Part 15, Sec. 249. The system was configured as the typical condition during the test. Enclosed please find the test data/report with application forms.

The major differences between new models and the approved model are given as the following:

1. The antennas are different – see EUT pictures
2. An RF switch was added such that bursts can be transmitted each time on a different antenna.

The measurement facility used to collect the test data is located at Hillsborough, New Jersey. This testing site has been listed by FCC (Refer to: 31040/SIT 1300F2) since 1992 and also recognized under NVLAP by NIST (Lab code 200101-0) since 1997.

Should you need more information, please contact me at (908) 392-3378 or email me to weili@ac-lab.com. Your attention is highly appreciated.

Sincerely,

Wei Li
Manager
Advanced Compliance Laboratory, Inc.
