Dear Lucy,

I saw below comment and I send the revised report.
Thank you,
Yang.

Dear Mr. Yang,

Please address following issues.

Q#1: Test report and test setup photos show some ferrite cores were clamped to the RJ45, RJ11 cables and power adapter during the test.

However, according to user manual, these cables and adapter are included in the packing but none of them ferrite core on.

Please issue a modification report by indicating the such ferrite cores will be added to RJ45, RJ11 and DC power cable on every unit sold in the U.S.

Best Regards,

Lucy
