**Re: Extended Frequency Justification:  
FCC ID: STZSDP600AC**

To Whom It May Concern:

Simoco Australasia Pty Ltd would like to submit the following justification to show the frequency range as 150 – 174 MHz on the Grant of Equipment Authorization for STZSDP600AC equipment.

This frequency range is applicable to FCC Part 90 radiocommunication systems that would include federal and public agencies, emergency services, commercial, business and industrial services etc. These services account for the majority of users on this band (refer to the list below).

| Frequency:         | Application:                   |
|--------------------|--------------------------------|
| 150.050 – 150.800  | Federal Government             |
| 150.800 – 156.2475 | Part 90                        |
| 157.1875 – 161.575 | Part 90                        |
| 161.625 – 173.400  | Federal Government and Part 90 |
| 173.400 – 174.000  | Federal Government             |

Also the frequency of operation of the STZSDP600AC portable radio cannot be programmed by the operator to transmit on frequencies other than those programmed by service or maintenance personnel. From the FCC KDB634187 guide, it is noted that FCC rules would be violated if the STZSDP600AC equipment were programmed and operated on unauthorized frequencies.

Thank you for your attention to these matters.

Yours sincerely,

Simoco Australasia Pty Ltd

Robert Stowell
