Re: Notice of Professional Installation

PROFESSIONAL INSTALLATION

The MSR RADIO MODULE will be installed into its system only by VideoComm. The system once assembled will be known as an RT Wave (family of products)

The RT^{WAVE} wireless system is designed and marketed for professional installation. This is ensured by VideoComm through the very nature of its marketing strategies and distribution network.

All of VideoComm's marketing and sales are directed to the professionals within the many industries we supply. These include Law enforcement, Government, Military, Industry, Manufacturing, Education and Industrial to name a few.

VideoComm sells its products to Master Distributors and Dealers only. These dealers and distributors sell only to industry professionals who have experience in the installation of products like those manufactured by VideoComm. VideoComm's distributors do not sell to the general public. These distributors are generally trade only.

Please contact us if you have any additional questions.

Best Regards

Jeff Johnson
President

A handwritten signature in black ink that reads 'Jeff Johnson'.
