Subject: Re: C4Line, FCC ID: SUIC4LINE-USB, Assessment NO.: AN05T4648, Notice#1

Question #1: The test report shows the limit (QP) for 0.535-1.705MHz is 60 dBuV, please advise the frequency range this carrier current system is operating on as a unintentional radiator.

This Unit use carrier current system between 4 MHz ~ 25 MHz
so, we apply to the FCC 15.107 (C)

Question #2: The Test setup does not show the back view of the setup. Please do provide the additional photos for both radiated emission and powerline conducted emission.

we took pictures which you request an additional one.
The additional photos is attached in this mail.
please check for the files

Question #3: This is for your information only. Verification is required to satisfy FCC15.113 requirement. We will not review the verification report, please just keep the verification report for record.

Thanks, we already know it

Best regards

Jeong-Min KIM
