***RF exposure analysis for the Zoning Box Control Board AZDZKCB1 (FCC ID: SVS-DZK-CB)***

The output power of the device is extremely low (90.48 dBuV/m at 3 m, equivalent to 0.33 mW) and far below the  $60/f(\text{GHz}) \text{ mW}$  ( $60/2.45 \text{ mW} = 24.48 \text{ mW}$ ) threshold. For that reason the equipment is categorically excluded from routine environmental evaluation for RF exposure and it is deemed to comply with FCC limits for exposure to electromagnetic fields.

Sincerely,

By:
