Do not scratch the screen of the LCD monitor with sharp materials such as nails and pens.

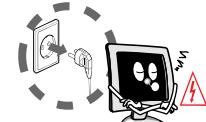

The interior part of the monitor is composed of electric elements. If the monitor is broken, do not try to disassemble it, because it is necessary to contact appropriate technical services in order to have the product repaired.

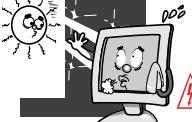

Take care of the LCD monitor so that it is not damaged by the external impact.

Take care not to use damaged cords and keep this product out of reach of children and persons who are not involved in using the product.

Disconnect the power cable when the monitor is not used during a long period of time while you are away from home.

Do not use this product near the windows receiving direct sunlight or direct natural light.

Choose a fresh and dry area and protect the monitor from extreme conditions of temperature and humidity, dust and smoke. Adequate temperature = 0-40°C. Adequate humidity = 30-80 RH

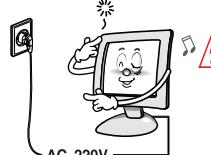

The LCD monitor screen can be damaged in the case that you clean the surface by using acetone, ethyl alcohol or acid detergent.

Do not install the monitor in a sloping place that is not safe due to the fact that the product can fall down and be broken, thus doing harm to other persons.

### Note

This product uses the TFT LCD panel produced using state-of-the-art technology. The TFT LCD panel consists of millions of pixels and there is much probability of occurrence of bad pixels. Due to this reason, red, blue and green pixels may seem to shine and some black pixels may be visible. But this does not mean that the quality of this product is bad. You can use this product without worrying about the worsening of product performance.

Check the power voltage before connecting to the AC power cable.

Take care so that the monitor is not in contact with magnetic materials, metals and inflammable substances.

### ▶ Introduction

Thank you for buying our TFT LCD monitor.

Our monitor is a high-resolution monitor that has features of electromagnetic wave blocking, reduction in electricity consumption, and efficient use of space. In view of the fact that this user's manual is prepared for helping you to adequately use the product, it is recommendable to read the user's manual before using the product.

### ▶ Product features

- 1) This product has a 19-inch flat surface (Color Active Matrix TFT LCD) with a pixel size of 0.294 mm (H) x 0.294 mm (V) for displaying an ultra-precision, high-resolution image.
- 2) This product uses 19"(Thin Film Transistor) LCD panel and supports a maximum of 1280 x 1024.
- 3) This product is a monitor whose deflection frequency is automatically transformed up to 30 - 80 kHz horizontally and up to 56 - 75 Hz vertically.
- 4) This product is compatible with IBM PC and Apple Macintosh (a different adapter is necessary for Apple Macintosh).
- 5) This product has a power-saving function less than 37 W in ON mode, less than 2 W in stand-by mode, less than 2 W in pause mode and less than 1 W in OFF mode in comparison with other monitors.
- 6) This product supports DDC and allows you to use 'Plug and Play'.

In the case of some system requirements, it may not be compatible with Plug and Play.

▶ Registered as a device whose electromagnetic wave-blocking capacity is adequate (B Class)

This product is registered as a device whose electromagnetic wave-blocking capacity is adequate and can be used in all places (including homes).

### ► Checking the product

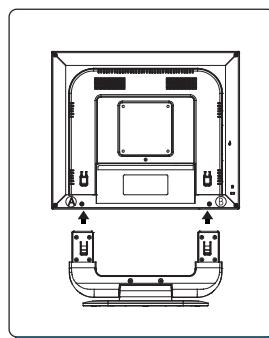

Please check if the product contains the following items. If there are some items missing, please contact the technical services.

1. TFT LCD monitor
2. User's manual (including product warranty).
3. AC to DC adapter.
4. Power cable (the power cable can be different according to use environment).
5. Signal Cable ( Monitor Connection Cable )
6. Monitor Base
7. Audio cable } Option
8. USB cable } Option

### ► How to connect Base part into Monitor Stand Part

How to install the monitor stand

1. Lay the monitor on a flat surface.
2. Attach the monitor to the connecting parts as shown in the picture.
3. Push and pull A and B to detach and attach the monitor.

### ► Installation

1. Turn off the power connected to the monitor before connecting to an external device.
2. Power connection  
Connect the adapter to the DC jack connected to the signal cable of the monitor and connect the power cable.
3. Signal connection  
This signal input terminal is a D-SUB connector. Connect the signal cable to the signal input of the computer.
4. Turn on the power of the monitor.
5. Turn on the power of the system that you want to use.
6. Continue with the operation when the screen appears. You can adjust the desired status of the screen using control buttons at the bottom of the monitor.
7. Up/Down Monitor Angle should not be over 15/20 degree.
8. If you want to finish the operation, turn off the system power and then turn off the power of the monitor.

### ► USB installation (option)

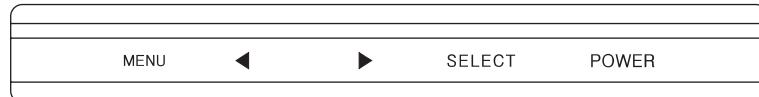

1. Connect the monitor to the PC with signal cable and turn on the PC.
2. Connect USB-compatible PC or other hub to the upstream port on the left of the monitor with USB cable.
3. When the USB cable is connected, the USB function is automatically set.
4. After setting, you can connect USB-compatible accessories to the downstream port on the monitor's USB hub.

**Note**

-  - USB hub function may not work correctly according to PC, OS or accessories. Consult the manufacturer for information on USB support.
- Use of USB Rev. 2.0-compatible PC and accessories is recommended.
- When the monitor is turned off, the accessories connected to the downstream port do not work.
- Even when the monitor is in power save mode, the device connected to the monitor's USB will work.

## ► Names and operation of control buttons

This monitor has several control buttons. They can be used according to the user preference.

## ► Function of the buttons

### ◆ Power button (⊕)

If you press the power button, the indicator lamp is turned on, and the operation of the monitor is initiated. If you do not want to start the operation of the monitor, press the power button again.

### ◆ Power indicator lamp (green)

Considering that this product has a power-saving function, if the power cable is connected, the power indicator lamp is shown as follows.

Mode	On	Stand-by	Suspend	Off
Power indicator lamp	Green	Green (blinks every second)		Dark
Screen	Active	Blanked	Blanked	Blanked

### ◆ MENU

If you press the menu button, the OSD (On-Screen Display) menu window appears.

### ◆ SELECT

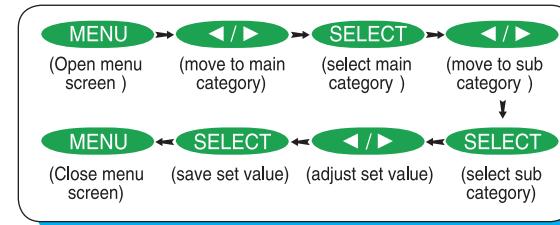

If you press SELECT button in the screen status, it is automatically adjusted for the optimal size and optimal position, and if you press the OSD button, it functions as a selection button.

### ◆ (◀/▶)

You can choose the desired item using the button ▲ (decrease) / ▼ (increase) in the OSD menu, or you can modify the selected values.

 11 - Speaker volume adjustment (Option) Adjust the volume with ▲/▼ button (0-100).

You can select the OSD menu in the OSD window using all the control buttons at the bottom of the screen. To change the current settings or adjust them for the desired settings, follow the following steps.

1. Press the Menu button to open the OSD menu window.
2. Press the ▲ / ▼ button to move the item of desired main menu.
3. If you highlight the desired menu item, press the Select button.
4. Press the ▲ / ▼ button to move the desired submenu item.
5. If you highlight the submenu item, press the Select button.
6. Press the ▲ / ▼ button to modify the current value.
7. Press the Select button to save the modified value.
8. Push MENU button to exit to sub category, main category and menu screen in this order.

The OSD window will disappear within a few seconds if there is no input in the OSD window. It does not appear when there is no input signal.

Main menu is configured as follows.

### 1. Screen

Factors in the brightness of the environment at the vicinity to automatically adjust the brightness of monitor, and also adjusts to the level desired by user. Manually/automatically adjusts screen location, modulation and frequency.

### 2. Color

Manually/automatically adjusts screen brightness, luminosity, color temperature and color proportion.

### 3. OSD

Adjusts the language used, the position of the menu screen, the display time of the menu screen and the saturation of the menu screen.

### 4. Others

Adjusts the language on the menu screen, and initializes menu value. User is able to select input signal, and adjust On/Off and value of audio function.

### Picture

Picture	1280×1024	60 . 2Hz
	Brightness	▼ 70 ▲
	Contrast	▼ 70 ▲
	H Position	▼ 69 ▲
	V Position	▼ 88 ▲
	Phase	▼ 58 ▲
	Clock	▼ 49 ▲
	Auto Adjust	No

**Brightness** \_ Adjusts brightness. 0 ~ 100

**Contrast** \_ Adjusts contrast. 0 ~ 100

**Horizontal position** \_ Adjusts the horizontal position of the current screen. 0 ~ 100

**Vertical position** \_ Adjusts the vertical position of the current screen. 0 ~ 100

**Phase** \_ Adjusts the center of the current screen. 0 ~ 100

**Clock** \_ Increases or decreases the number of pixel to adjust the horizontal size.

**Auto-Adjust** \_ Configures Auto-Position, Auto-Phase, Auto-Clock and

Auto-Color at the same time.

### Color

Color	1280×1024	60 . 2Hz
	Color Temp	User
	Red	▼ 50 ▲
	Green	▼ 50 ▲
	Blue	▼ 50 ▲
	Auto Color	No

**Color template** \_ Adjusts the color desired by the user. 19300. 6500. 5000. User.

**Red** \_ Adjusts color saturation. 0 ~ 100

**Green** \_ Adjusts color saturation. 0 ~ 100

**Blue** \_ Adjusts color saturation. 0 ~ 100

**Auto-Color** \_ Adjusts the colors of the screen automatically.

Misc	1280×1024	60 . 2Hz
	Language	English
	Recall	No
	Input Select	RGB
	Audio	ON
	volume	▼ 50 ▲

#### Language

Configures the language used in the OSD menu. The languages are as follows: English, German, French, Italian, Spanish, Chinese Simplified, Chinese Traditional and Japanese.

**Recall** \_ Resets all the functions.

**Input Select** \_ User can select input signal depending on installed device.(RGB,DVI)

**Audio** \_ Turns audio function On/Off.

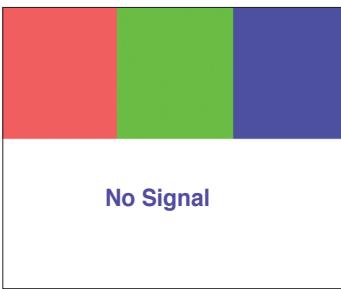

**Volume** \_ Adjusts size of sound.(0-100)

} Option

## Auto Adjust

## ◆ Auto Adjust

Appears when automatic screen adjustment is executed on RGB mode.

## Video Mode Not Supported

## ◆ Video Mode Not Supported

Appears when Video Mode Not Supported the permissible range.

## Power Saver Mode

## ◆ Power Saver Mode

Appears when PC input signal is absent.

This message disappears automatically after five seconds.

Check PC power

## ► Timing guide

This product is a multi-frequency monitor. It functions in horizontal frequencies from 30 kHz to 80 kHz and vertical frequencies from 56 Hz to 75 Hz. Due to its design based on microprocessor, it offers the functions of automatic synchronization and automatic size. This monitor is equipped with 10 programmed configurations that are shown in the timing table. The followings are the ten configurations.

Preset		Resolution		Frequency		Clock [MHz]	Polarity (H/V)
		Horizontal	Vertical	Horizontal	Vertical		
VESA	M1	720	400	31.5KHz	70Hz	28.322	- / +
	M2	640	480	31.5KHz	60Hz	25.175	- / -
	M3	640	480	37.5KHz	75Hz	31.500	- / -
	M4	800	600	37.9KHz	60Hz	40.000	+ / +
	M5	800	600	46.9KHz	75Hz	49.500	+ / +
	M6	1024	768	48.4KHz	60Hz	65.000	- / -
	M7	1024	768	60.0KHz	75Hz	78.750	+ / +
	M8	1280	1024	64.0KHz	60Hz	108.000	+ / +
	M9	1280	1024	80.0KHz	75Hz	135.000	+ / +
	M10	832	624	49.7KHz	75Hz	57.284	- / -

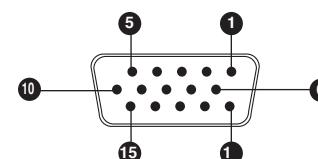

## ► Signal connection

This signal input terminal is a D-SUB connector. Connect the signal cable to the signal input of the computer.

Disconnect the power connected to the monitor before connecting the signal output of the system.

Pin number	Description	Pin number	Description
1	Red	9	No connection
2	Green	10	Ground
3	Blue	11	Ground
4	No connection	12	SDA
5	Ground	13	Horizontal - Sync
6	Red ground	14	Vertical - Sync
7	Green ground	15	SCL
8	Blue ground		

## Product specifications

ENG

### Product specifications

LCD	Type	19" diagonal viewable screen TFT (Thin Film Transistor). Active Matrix Panel 0.294 mm (H) x 0.294 (V).
	pixel pitch	R. G. B. vertical stripe.
	Surface Color	16,194.277 colors.
	Display Condition	anti-glare coating.
Angle of view	H/V	150°/135°
Contrast ratio	Type	700:1
Brightness	Type	300 cd/m <sup>2</sup>
Response Time	Type	8ms
Compatibility	PC	IBM XT, AT, 386, 486, Pentium or PS/2 and compatibles (from VGA up to 1280x768 @ 75Hz NI).
Refresh rate	Maximum	1280x1024 @ 75 Hz N (60 Hz for optimal display)
Connectors	Input signal	15-pin D-SUB, DVI-D
	Power	Jack type DC+12 V In
Voltage/Power	Input Output Consumption	AC 100-240 V , 50-60 Hz DC 12 V 37W(MAX)
Screen size	Maximum	337.920 mm(H) x 270.336 mm(V)
Features	Temperature Humidity Altitude	33°F ~ 104°F (0°C ~ 40°C) 20%RH-90%RH (no condensation) Up to 10,000 feet
Storage conditions	Temperature Humidity	-14°F ~ 104°F (-20°C ~ 40°C) 5%RH-90%RH(no condensation)
Dimension		420 mm (width) x 408 mm (height) x 180 mm (depth)
Weight	unit/box	4.9 kg / 6.6 kg
Option	Speaker	Built-in type
	USB Hub	USB 2.0 4-Port Hub

★ The design and specifications of the product are subject to change without previous notice to improve the quality of the product.

12

## Troubleshooting

### No power.

- Flip the power switch ON. The Power LED turns on.
- Make sure AC power cord is securely connected to the power jack and to a power outlet.

### Power on but no screen image.

- Make sure the video cable attached with this monitor is tightly secured to the video output port on the back of the computer
- Adjust the brightness and contrast.

### Image is unstable, unfocused.

- Use AUTO-TUNE to adjust automatically.
- If the image is still unstable after AUTO-TUNE processing, please adjust PHASE manually to get image focused.
- Check whether the resolution or refresh rate in windows display setting is beyond supported range (please refer to the specification of supported mode.)

### Flickering

- Not enough power is being supplied to the Monitor. Connect the Monitor to a different outlet. If a surge protector is being used, there may be too many devices plugged in.
- See Timing Guide in this manual with a list of refresh rates and frequency settings showing the recommended setting for the Monitor.

### Wrong or abnormal colors.

- If any colors (Red, Green, or Blue) are missing, check the video cable to make sure it is securely connected. Loose pins in the cable connector could cause a bad connection.
- Connect the Monitor to another computer.
- Check the graphics card for proper sync scheme (or sync polarities) to match the Monitor's specifications.

### Double (split) screen image

- Make sure your graphics card is set to Non-Interlaced mode.

### Entire screen image rolls (scrolls) vertically.

- Make sure the input signals are within the LCD monitor's specified frequency range. (Maximum : VESA, MAC 1280 X 1024 @ 75Hz)
- Connect the video cable securely.
- Try the Monitor with another power source.

13

- ▶ Control buttons do not work.
  - Press only one button at a time.

### ABOUT THE LCD

The LCD contains over 3,932,160 thin-film transistors (TFTs). A small number of missing, discolored, or lighted dots on the screen is an intrinsic characteristic of TFT LCD technology and is not an LCD defect. If you display a fixed pattern for more than 10 hours, its image may remain on the screen in overlap mode when you display something else.

## **FCC NOTE**

:This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES.**

**OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS:**

**(1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND**

**(2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED,**

**INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION**

**THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE**

**CAUSED UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH**

**MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.**
