Re: Referencing Test Data, KDB 484596

To Whom It May Concern:

Per the guidance given in Draft KDB 484596, Compliance Testing confirms the requirements outlined below in Section 3 have been met:

(a) Introduction:

- a. The certification being sought for NS-5ACL (SWX-NS5ACL) contains the same RF circuitry as previously certified model SWX-NBE5ACG2. The Gen2 device (SWX-NS5ACL) incorporates the 2.4GHz emissions which were turned off via software in the previous certification (SWX-NBE5ACG2).

(b) Explain the Differences:

- b. The Gen2 device (SWX- NS5ACL) incorporates the 2.4GHz emissions which were turned off via software in the previous certification (SWX- NBE5ACG2). Testing was performed to FCC Part 15.247 to address the different emissions. This report is included under the 15.247 certification for FCC ID SWX- NS5ACL

Please let us know if any further information is needed.

Sincerely,

Poona Saber
Test Engineer
