Hello Jennifer,

The FCC has issued approval to use average method in your group of filings that was submitted in the Test Plan for KDB 194449. Please upload this approval and your explanation (below) to the exhibits.

As previously mentioned, we will require testing at the FCC Lab for your next application in this series so that we can look at the performance of the various HT modes and BWs. The remaining applications in this series will be approved for expedited review based on the results of these tests.

Regards,

Andy Leimer

FCC/OET/EACB
