7435 Oakland Mills Rd.
Columbia, MD 21046

The product identified as FCC: SWX-UAPACM, Model: **UAP-AC-M** has been approved by the Bureau.

This is to request a Class II Permissive Change for FCC ID: SWX-UAPACM, Model: **UAP-AC-M**

We, UBIQUITI NETWORKS, hereby declare that this allows the installer to choose a fixed power level across all frequencies the device might operate on.

The device will apply this limit in addition to the regulatory limits from the grant.

In other words, the output power will be limited to the lower of the user entered maximum and the level allowed under the grant.

The device will not operate above the limits of the grant for compliance with the EIRP limits when the device is used with the 10/15 dBi antenna (2.4 GHz and 5 GHz, respectively).

In this case, we would like to add the following antennae in this Class II Permissive Change application.

Antenna type	Antenna gain (dBi)	Antenna Name
Sector	15 (5 GHz)	UMA-D
Sector	10 (2.4 GHz)	UMA-D

If you have any questions regarding this application, please feel free to contact me.

Sincerely,

Mark Feil
