SPECIFICATIONS

Bluetooth version:	5.0
Driver spec:	Φ5.25in 2Ω/15W
Size:	246*156.5*342 mm
Net weight:	1900 g +/- 50 g
Frequency response:	100HZ - 20KHZ
Sensitivity:	80dB
S/N ratio:	≥85dB
Distortion:	≤1% @ 10W
Working distance:	about 33 feet/ 10M
Transmission Power:	Class2, ≤4dbm

Bluetooth profiles:	A2DP, AVRCP, HFP
Working current:	≤1200mA
Working voltage:	3.3 - 4.2V
Charging voltage:	DC 5V
Charging current:	≤1000mA
Battery capacity:	3600mAh
Static standby current under shutdown status:	≤2μA
Static standby current under power on status:	≤170mA
Charging time:	about 4-5 hours
Playtime at full volume:	about 2.5 hours
Playtime at 60% volume:	about 7 hours
Waterproof:	IPX6

Notice:

IPX6, this speaker is fully water resistant and dust proof. Do not soak it under water.

The company reserves the right to the product modification for appearance and function, which is subject to change without prior notice.

FCC WARNING >>>

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
