=====

Dear Geoffrey Do,

I have reviewed the application and submission documents for the referenced FCC ID. The following questions must be addressed to continue processing:

1. The test report shows the FCC ID to be "SYSIPM". The correct FCC ID is "SY5IPM". Please forward a corrected test report showing the correct FCC ID.

[Geoffrey] I revise FCC ID from RF Test Report and upload via CCS web site.

2. Was the loop antenna rotated about both the vertical axis and horizontal axis when searching for maximum received emissions, as is required?

[Geoffrey] I tested both vertical axis and horizontal axis for EUT. And I checked maximum value from

9/2/2007

horizontal axis.

3. Please submit a revised user manual that includes the information required by section 15.21 of the Rules

[Geoffrey] I added Section 1521 of the Rules to user manual page 11.

4. There are some issues regarding your confidentiality request that need to be resolved: Your letter requesting confidentiality asks that the block diagram, schematic, parts list, and operational description be kept from public view. However, the block diagram and theory of operation are reproduced in the user manual which is not a confidential document. One of the following corrections will be required:

- a. Remove the block diagram and theory of operations from the user manual.
- b. Include the user manual as one of the confidential exhibits. This can be done only if the user manual is supplied to the automobile manufacturer and is not included in the documentation supplied to the final user. Include a new request for confidentiality letter with justification for keeping the user manual confidential.

[Geoffrey] I revise confidentiality letter.(Add : User Manual / Delete : Parts list)

5. FCC does not require parts list as one of the submissions for Part 15 devices. The revised confidentiality request should not include parts list as one of the exhibits

[Geoffrey] I revise confidentiality letter.

Add : User Manual / Delete : Parts list

6. Please submit a new label with the two-part statement required by 15.19(a)3. Alternatively, please supply a user manual that contains this statement

[Geoffrey] Same as above No.2

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
