

Single Bulb Pairing Instructions

1. Power on the bulb. The bulb will automatically initiate pairing mode.

2. Using a compatible Bluetooth device, search for "10-SYNC SPEAKER BULB".

3. Wait for the bulb to blink twice (that signifies successful pairing). Open your favorite music streaming application and play music.

Multiple Bulb Pairing Instructions

1. Power on up to 10 bulbs at the same time. The bulbs will automatically initiate pairing mode.

2. Using a compatible Bluetooth device, search for "10-SYNC SPEAKER BULB". One bulb will default to the primary bulb.

3. Wait for the primary bulb to blink twice (that signifies successful pairing). Then wait for the other bulb(s) to automatically connect to the primary bulb.

4. Open your favorite music streaming application and play music.

NOTE: If the primary bulb loses power or Bluetooth connection, no audio will be outputted by the secondary bulbs. Power must be restored to the primary bulb or a different bulb must be assigned as primary via the Bluetooth menu on the mobile device.

Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled controlled environment. This device should be installed and operated with a minimum distance of 20cm between the radiator and your body.
