Assessment NO.: AN05T4617, Notice#1

Dear Helen,

#1: Attached please find revised test report and schematics.
The 433 MHz shown on the original schematics means the relating value for
European version. For US the frequency is 315MHz only.

#2: Attached please find revised confidentiality letter.

Best regards,

S. S. Liou

Subject: Outsource Industries, Inc., FCC ID: SZAOSI911PII, Assessment
NO.: AN05T4617, Notice#1

Question #1: The schematic diagram shows both 315 MHz and 433MHz. The test
plots also shows "CF step 433.572MHz", please explain what is the 433MHz for.

Question #2: Confidentiality requests must reference Section 0.459 at a
minimum because this section provides the authority for such a request.
Referencing Section 0.457 is not mandatory but it is suggested because this
section lists what information is normally held confidential in equipment
authorization filings. Please revise your confidentiality letter
accordingly.

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue
on the above referenced application. Failure to provide the requested
information within 30 days of the original e-mail date may result in
application dismissal and forfeiture of the filing fee. Also, please note
that partial responses increase processing time and should not be submitted.
Any questions about the content of this correspondence should be directed to

the e-mail address listed below the name of the sender.
