Overview

This application has been submitted for original grant of a part RFID Radio operating in the 13.56 MHz band under 15.225. The applicant is requesting a single modular approval of the radio. The radio uses the MFRC522 contactless Reader IC manufactured by NXC. The radio is used in exercise equipment for user identification and workout personalization.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

A modular approval letter was submitted with the application stipulating compliance with the requirements for single modular approval.

Note: Requesting for Confidentiality

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
