

12/8/2015

Dear Application Examiner:

Precor Incorporated is submitting this application for the full modular approval of their NFC / RFID module model 303750, FCC ID: SZNPRCR303750. It is a 13.56 MHz NFC radio that uses a T6NE2XBG Contactless Front End Chip manufactured by Toshiba. The radio is used in exercise equipment for user identification and workout personalization.

The radio utilizes a PCB loop antenna, permanently affixed to the radio. This configuration satisfies the requirements of 47 CFR 15.203.

The digital emissions of the product were verified to FCC part 15. In addition, technical reports and exhibits have been provided for the radio to demonstrate compliance with FCC rules 47 CFR 15.225.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

James Minahan
Compliance Engineer
