TCM515U MODULAR TRANSMITTERS SUBJECT TO § 15.212 RULES ATTESTATION

The TCM515U single-modular transmitter is a self-contained, physically delineated, component for which compliance was demonstrated independent of the host operating conditions, and which complies with all eight requirements of § 15.212(a)(1) as summarized below:

Requirement	Statement
1) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly;	TCM515U is a completely shielded module. No external, unshielded components are present.
2) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal;	All inputs on the TCM515U module are buffered and module will comply with Part 15 for any type of input signals.
3) The module must contain power supply regulation on the module;	TCM515U is equipped with an internal voltage regulator.
4) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific	TCM515U antenna must be connected through its unique antenna connector (solder pads) and is marketed for operating with

antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);	specific antennas only.
5) The module must demonstrate compliance in a stand-alone configuration;	TCM515U did demonstrate compliance in a stand-alone configuration during the testing at the VPI laboratories.
6) The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748);	TCM515U is labeled with its permanently affixed FCC ID label.
7) The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee;	TCM515U complies with all applicable specific rules.
8) The module must comply with RF exposure requirements	TCM515U complies with RF exposure requirements.

Sincerely,

Armin Anders
