

## Enterprise IP Phone

SIP-T27P & T27G

## Quick Start Guide (V80.1)

# Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

IP Phone

Handset

Handset Cord

Ethernet Cable

Stand

Quick Start Guide

Power Adapter  
(Optional)

Wall Mount Bracket  
(Optional)

Note: The models displayed on the phone differ from each other. The packaging content "IP Phone" listed above takes a SIP-T27G IP phone as an example.

# Assembling the Phone

1. Attach the stand, as shown below:

A

B

Desk Mount Method

Note: You can also mount the phone to a wall. For more information on how to attach the wall mount bracket, refer to Yealink Wall Mount Quick Installation Guide for Yealink IP Phones.

2. Connect the handset and optional headset, as shown below:

Wireless Headset Adapter EHS36

Note: The headset and wireless headset adapter EHS36 should be purchased separately. The EXT port can also be used to connect the expansion module EXP39. For more information on how to use the EHS36 and EXP39, refer to Yealink EHS36 User Guide, Yealink EXP39 User Guide.

### 3. Connect the network and power, as shown below:

You have two options for network and power connections. Your system administrator will advise you on which one to use.

**Note:** If inline power (PoE) is provided, you don't need to connect the power adapter. Make sure the hub/switch is PoE-compliant.

## Startup

After the IP phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the phone is ready for use. You can configure the phone via phone user interface or web user interface.

# Configuring Your Phone

## Configuring via web user interface

### Accessing the web user interface:

1. Press the **OK** key when the phone is idle to obtain the IP address of the phone.
2. Open a web browser on your computer, enter the IP address into the address bar (e.g., "http://192.168.0.10" or "192.168.0.10") and then press **Enter**.
3. Enter the user name (default: admin) and password (default: admin) in the login page and click **Confirm**.

### Network Settings: Click on **Network->Basic->IPv4 Config**

You can configure the network settings in the following ways:

**DHCP:** By default, the phone attempts to contact a DHCP server in your network to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

**Static IP Address:** If your phone cannot contact a DHCP server for any reason, you need to configure the IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.

**PPPoE:** If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. Contact the ITSP for the account and password.

Note: The IP phone also supports IPv6, but IPv6 is disabled by default. Wrong network settings may result in the inaccessibility of your phone and may have an impact on the network performance. Contact your system administrator for more information.

### Account Settings: Click on **Account->Register->Account X (X=1,2,3,4,5,6)**

Parameters of the account:

Register Status:	It shows the register status of the current account.
Line Active:	You can select Enabled/Disabled to enable/disable the account.
Label:	It is shown on the LCD screen to identify the account.
Display Name:	It is shown as caller ID when placing a call.
User Name:	It is provided by ITSP for registration (required).
Register Name:	It is an authenticated ID for authentication provided by ITSP (required).
Password:	It is provided by ITSP for registration (required).
Server Host:	It is provided by ITSP for registration (required).

### Register status icons on the LCD screen:

Registered

Register Failed

Registering

Note: Check with your system administrator if any error appears during the registration process or a specific configuration is required for your registration.

## Configuring via phone user interface

### Network Settings:

Press the **Menu** soft key when the phone is idle, select **Settings->Advanced Settings** (default password: admin)->**Network->WAN Port/VLAN/Webserver Type/802.1x Settings/VPN/LLDP/CDP/NAT** to configure the network.

### Account Settings:

Press the **Menu** soft key when the phone is idle, select **Settings->Advanced Settings** (default password: admin)->**Accounts** to configure the account.

Note: For more information on account parameters, refer to **Configuring via web user interface**.

## Basic Call Features

### Placing a Call

#### Using the handset:

1. Pick up the handset.
2. Enter the number, and then press the **Send** soft key.

#### Using the speakerphone:

1. With the handset on-hook, press  .
2. Enter the number, and then press the **Send** soft key.
