Enterprise IP Phone

SIP-T61 & T61P & T61G
**Quick Start Guide (V80.1)**

Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

| IP Phone | Handset | Handset Cord | Ethernet Cable | Quick Start Guide |
| Stand | Wall Mount Bracket | Power Adapter |

Note: The models displayed on the phone differ from each other. The packaging content "IP Phone" listed above takes a SIP-T61P IP phone as an example.

Assembling the Phone

**1. Attach the stand or the wall mount bracket, as shown below:**

(A)

Desk Mount Method

(B)

Wall Mount Method

2.Connect the handset and optional headset, as shown below:

Note: The headset should be purchased separately.

3. Connect the network and power, as shown below:

You have two options for network and power connections. Your system administrator will advise you on which one to use.

PC Connection (Optional)

Power Adapter (DC 5V)

PC   Internet   DC5V   📞   🎧

(A) AC Power Option

PC   Internet   DC5V   📞   🎧

(B) PoE (Power over Ethernet) Option

PC Connection (Optional)

IEEE 802.3af compliant PoE Hub/Switch

Note: If inline power (PoE) is provided, you do not need to connect the power adapter. Make sure the hub/switch is PoE-compliant.

Startup

After the IP phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the phone is ready for use. You can configure the phone via web user interface or phone user interfafce.

Configuring Your Phone

Configuring via web user interface

Accessing the web user interface:

1. Press ⟨✓⟩ when the phone is idle to obtain the IP address of the phone.
2. Open a web browser on your computer, enter the IP address into the address bar (e.g., "http://192.168.0.10" or "192.168.0.10") and then press **Enter.**
3. Enter the user name (default: admin) and password (default: admin) in the login page and click **Confirm.**

Network Settings: Click on **Network->Basic->IPv4 Config**

You can configure the network in the following ways:

DHCP: By default, the phone attempts to contact a DHCP server in your network to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

Static IP Address: If your phone cannot contact a DHCP server for any reason, you need to configure IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.

PPPoE: If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. Contact the ITSP for the PPPoE user name and password.

Note: Wrong network settings may result in inaccessibility of your phone and may have an impact on the network performance. Contact your system administrator for more information.

Account Settings: Click on **Account->Register->Account X** (X=1,2,3)

Parameters of the account:

Register Status:	It shows the register status of the current account.
Line Active:	You can select Enabled/Disabled to enable/disable the account.
Label:	It is shown on the LCD screen to identify the account.
Display Name:	It is shown as caller ID when placing a call.
User Name:	It is provided by ITSP for registration (required).
Register Name:	It is an authenticated ID for authentication provided by ITSP (required).
Password:	It is provided by ITSP for registration (required).
Server Host:	It is provided by ITSP for registration (required).

Register status icons on the LCD screen:

☏ Registered   ✆ Register Failed   ⊘ Registering

Note: Check with your system administrator if any error appears during the registration process or a specific configuration is required for your registration.

Configuring via phone user interface

Network Settings:

Press the **Menu** soft key when the phone is idle, select **Settings->Advanced Settings** (default password:admin)**->Network->WAN Port/VLAN/Webserver Type/802.1x Settings/VPN/LLDP/CDP/NAT** to configure the network.

Account Settings:

Press the **Menu** soft key when the phone is idle, select **Settings->Advanced Settings** (default password:admin)**->Accounts** to configure the account.

Note: For more information on account parameters, refer to **Configuring via web user interface.**

2. Press ▽ or △ to select **Common** or the desired account.
3. Press ▽ or △ to select the desired ring tone.
4. Press the **Save** soft key to accept the change.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.
