2.12 FAQ

Problem 1

There is no ring can be heard or the ring tone is too low.

Solution

You can go to Skype, choose "Tools-> Options->Sounds", click "Play sound", click "Import Sounds". Under the default installation catalogue, for example: C:\\program\skypemate, you choose"RINGWAV". Then, you should choose RING.WAV beside of "Play sound", click" Save".

Problem 2

I am not able to hear any sound through the earphone? Solution

Please execute the "Control Panel->Sound and Video (->Audio", set **Sound Playback** and **Sound Recording**'s preference device to your sound card. See below:

Problem 3

I can't play music through the USB Phone?

Solution

Please execute the "Control Panel->Sound and Video (->Audio", set **Sound Playback** and **Sound Recording**'s preference device to "USB Audio Device".

Problem 4

The voice is played from the PC's sound card instead of the USB VoIP Phone when I make/answer a call?

Solution

Execute "Tools->Options->Sound Devices" to open the window as below:

Set "Audio In" and "Audio Out" to "USB Audio Device".

Problem 5

Skype is running, but the icon of SkypeMate still show as

(the phone is green and the outside is grey)?

Solution

You have selected the wrong option, go to Skype, execute choose "Tools-> Options-> Privacy-> "Manage other programs' access to Skype", choose the needed option, click "Change" button to open the "Manage API Access Control" windows, and make another selection.

Problem 6

The base station is running, but the phone's keyboard has been invalid for many seconds.

Solution

You must register the phone to the base station. See 2.3 Registration Phone to the base station.

CE Mark Warning:

This is a Class B product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

FCC Statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- \cdot Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modification made to this equipment not expressly approved by the manufacturer. May void the FCC authorization to operate this equipment.
