**Subject : Professional Installation Justification.**

Applicant : PARKEON  
Product : EPSUM C40 C-LESS  
Model : EPSUM C40 C-LESS  
FCC ID : T2X-C40-C-LESS

Dear Sir/Madam,

EPSUM C40 C-less is a "contactless" payment system that provides cardholders to pay by tapping a payment card (or other payment device) on a passive target.

EPSUM C40 C-less composed of:

- EPSUM MR40. It is an hybrid card reader (credit car reader), PCI approved, which includes an embedded Cless Reader.
- ESPUM A40. It is a passive integrated antenna, which includes Read Status Indicators. ESPUM A40 was specifically developed to works with MR40 and vice-versa.
- Two specific cables: a coaxial cable with SMB connectors and a cable with five wires for Read Status Indicators.

EPSUM C40 C-less was developed by Parkeon for Parkeon's machines.

It is destined to be only integrated in Parkeon's machines(non exhaustive):

- Pay and Display Parking machine (On Street Parking)
- Ticket Vending machine
- Automatic Fare Collection
- Off street Parking
- Etc...

Like EPSUM C40 C-less is only intended for Parkeon's machines, we control:

- integration of the system in different machines.
- installation by way of quality control in production.
- maintenance because it is ensured by Parkeon or authorized person .

If you have any queries, please do not hesitate to contact us by our:

- Phone: +33 (0)381544874
