Subject : Professional Installation Justification

Applicant : PARKEON  
Product : V2 Cless  
Model : V2 Cless  
FCC ID : T2X-V2-CLESS

Dear Sir/Madam,

The V2 Cless is a “contactless” system of validation, payment or identification which provides cardholders to validate , pay or identify with a RFID Card on a passive target.

V2 Cless is composed of :

- Module lect Cless is a RFID reader which includes the analog and digital parts to manage ISO 14443 RFID chip.
- A passive antenna
- Coaxial cable with SMB connectors to connect the module and the antenna

V2 Cless was developed by Parkeon for Parkeon’s machines.

It’s destined to be only integrated in Parkeon’s machines (non exhaustive) :

- Pay and Display Parking machine (On street Parking)
- Automatic Fare Collection
- Off street Parking
- ...

Like V2 Cless is only intended for Parkeon’s machine, we control :

- The integration of the system in different machines
- The installation by way of quality control in production
- The maintenance because it’s ensured by Parkeon or authorized person

If you have any queries, please do not hesitate to contact us :
