RE: Asoka USA Corporation

FCC ID: T37PL9560-WAP

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please confirm that there is no Confidentiality Request associated with this filing.
- 2.) Please review your Agent Authorization letter. Who is Stanley Lu and under what authority does he speak for Asoka Corp?
- 3.) Please provide a Block Diagram of the RF module used with this product.
- 4.) Please provide schematics of the mini-PCI card associated with this device.
- 5.) Please review the schematics already provided. We must have component values for all symbols shown in the schematics. Some sheets do not provide values of these discrete components.
- 6.) Please review your Operational Description. What is required is some idea as to how this device creates, modulates and amplifies RF energies. Kindly enlarge your existing description.
- 7.) Kindly show me in the Manual where I can find the required 15.21 'Information to User' statement.
- 8.) Please provide an MPE estimation for this product at a distance of 20cm.
- 9.) Please review the Manual on page 3-4. It appears that the end user can set the region or country of operation. This is illegal and not permitted under rule 15.15(b).
- 10.) It is well known that RF power for all WiFi devices varies over data rates. Typically, FCC is requiring data showing the RF power measured across three channels and across all data rates in both 802.11b and 802.11g modes – especially when RF Exposure is a concern. Please provide this information (a table of values is sufficient). Generally, the highest RF power seen in both 802.11b and 802.11g modes defines the test case used for all subsequent tests. Kindly review your test results.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Except as described in §0.459, correspondence and responses should be considered part of the permanent submission and may be viewed from the Internet once a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
