Contact Information

For more information about the PlugLink 500 MIMO Pass-Through Adapter or any of Asoka's other leading-edge solutions, please contact us using any of the following methods:

• Voice calls: We welcome your calls Monday through Friday, from 9:00 am to 5:00 pm Pacific Time at (408) 550-8167. Voice mail is available during non-business hours.

• Email: If you prefer, you can send information requests to our e-mail address: sales@asokatech.com.

- Fax calls: You can also send your requests for information to our 24-hour fax number: (408) 884-2390.
- Web site: Our Web site contains valuable information about our products, solutions, and services. We encourage you to visit us at http://www.asokatech.com.

Getting Help

Asoka USA backs its products with unparalleled customer service and technical support for our valued customers.

Customer Service

Customer service, the customer-satisfaction arm of Asoka USA, is available Monday through Friday, from 9:00 am to 5:00 pm Pacific Time, by calling (408) 550-8167 or emailing custserv@asokatech.com

Technical Support

Technical support is available Monday through Friday, from 6:00 am to 6:00 pm Pacific Time, by calling (408) 550-8173 or through email at support@asokatech.com.

Please provide the following information about the problem:

- Product name, model number, part number (if applicable) and serial number
- System configuration, including a description of the devices connected to your PL9678
- The circumstances surrounding the error or failure
- A detailed description of the problem and what has been done to try to solve it

Simple Installation

Congratulations on your purchase of the PlugLink 500 MIMO Pass-Through Adapter !

This adapter allows you to network your home or office by plugging directly into an electrical outlet. With your PlugLink 500 MIMO Pass-Through Adapter, you can easily share your high-speed Internet, mp3s, video, and gaming throughout the home or office.

This manual describes how to connect your PlugLink 500 MIMO Pass-Through Adapter to a PC or cable/DSL Router.

Package Contents

- PlugLink 500 MIMO Pass-Through Adapter(PL9678-A5)
- 6-foot Ethernet cable
- Quick Installation Guide
- Installation Resource CD (for advanced users only)
- Warranty and Support Information Card

If any of the parts are incorrect, missing, or damaged, contact the retailer where you made your purchase. Keep the carton, including the original packing materials, in case you need to return the unit for repair.

Types of Connections

This section describes what you need to do to before installing the PlugLink 500 MIMO Pass-Through Adapter. You can set up a home or an office network or compliment your existing network by connecting to any device with a 10BaseT/100BaseT /1000BaseT Ethernet- capable device.

Simple Connection (Peer to Peer)

To share a simple connection between computers, attach one PL9678-A5 device to each computer.

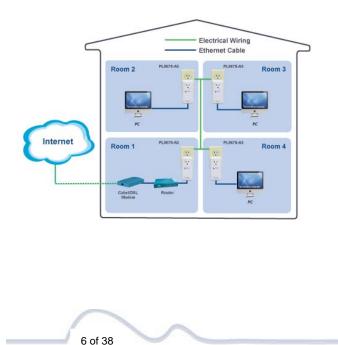

Room 1	PL9678-A5		PL9	578-A5	Room 2
		12	(1)		Room
		2	2		
			-		_

NOTE: Do not connect the PlugLink 500 MIMO Pass-Through Adapter into a power strip, extension cord, un-interruptible power supply (UPS), or surge protector. This may prevent the unit from working properly or degrade the network performance.

Simple Broadband Connection

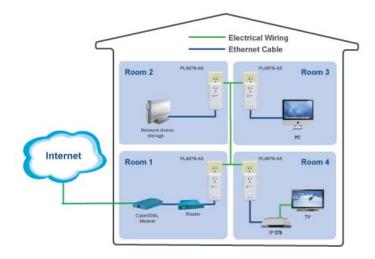

The following items are needed to share a Broadband connection with computers:

- One (1) PL9678-A5 device attached to a standard cable, DSL, or wireless router;
- One (1) PL9678-A5 device attached to each computer;

Other Connections

You can also use the PlugLink 500 MIMO Pass-Through Adapter with other Ethernet enabled devices, such as IP Cameras, IP set top box, game consoles, etc. "Up to eight (8) PL9678 can be placed on the same PLC (Powerline Communication) network."

Finding a Suitable Location

Find a suitable location to install your PlugLink 500 MIMO Pass-Through Adapter . Where you install the units can affect their performance. Find a location that is:

- Acceptable temperature and humidity ranges.
- Free of strong electromagnetic field generators (such as motors), vibration, dust, and direct exposure to sunlight.
- An electrical outlet for your PlugLink 500 MIMO Pass-Through Adapter . Outlet must be within six feet (1.82 meters) of the device you are connecting to.

Installing the Hardware

Connect each of your PlugLink 500 MIMO Pass-Through Adapter .

- 1. Connect the unit into a nearby wall outlet (Do not plug the adapter into a power strip).
- 2. Connect the enclosed Ethernet cable to the Ethernet port of the unit.
- 3. Connect the other end of the cable to the Ethernet port of the PC or device.

Congratulations! You have completed the installation of the PL9678 for normal use.

Advanced Configuration

(Expert Users Only)

This chapter provides information on installing and setting up the PlugLink 500 MIMO Pass-Through Adapter.

NOTE: Do not connect the PlugLink 500 MIMO Pass-Through Adapter into a power strip, extension cord, un-interruptible power supply (UPS), or surge protector. This may prevent the unit from working properly or degrade the network performance.

Installing the Software

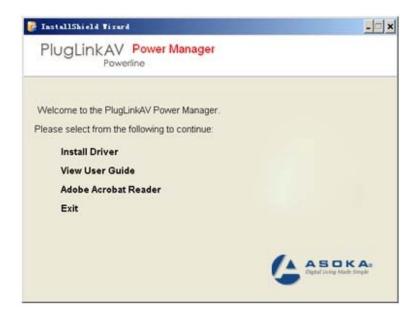

Following are software installation procedures for advanced users.

NOTE: Software installation is not required for normal use. The utility is used to change the security settings and view information about the network.

- Insert the enclosed Installation Resource CD into your CD-ROM drive If the PlugLink 500 MIMO Pass-Through Adapter Installation Utility does not appear within 30 seconds, select your CD-ROM drive and double-click the Setup.exe icon to start the Installation Utility.
- 2. Select the language preference, and click the Run button.

3. In the Start screen, click Install Driver to start the installation.

4. In the Welcome screen of the screen of the wizard, click Next to begin the installation.

Network Management

The PlugLinkAV Power Manager utility software allows you to manually configure a PlugLink HD AV Adapter that is directly connected to your Personal Computer or to any PlugLinkAV Adapters that are remotely residing on your PlugLinkAV Home network.

NOTE: The Power Manager Utility software is for all Asoka PlugLinkAV devices.

Viewing the Device Information (Profile)

Run the PlugLinkAV Power Manager and use the *Profile* screen to view information on your PlugLinkAV device attached directly to your PC and other PlugLinkAV devices on your network.

The Profile screen displays the following information:

- Device Name
- MAC Address
- Firmware version of your devices
- Estimated device transmission rate

To refresh the list of your PlugLinkAV devices, click the *Rescan* button.

NOTE: Devices set up with a different Network Encryption Key (NEK) also known as the network password will NOT appear on this list.

Profile Device(s)		Statistics			The columns to the left list your network, all network levices and their MAC addresses. Click on any levice to view individual device details.

DEVICE NAME

Changing your local device name:

- 1. Connect your PlugLinkAV adapter to your PC. For instructions on how to connect your PlugLinkAV to your PC, please refer to page 7 (Installing the Hardware).
- 2. Run the PlugLinkAV Power Manager software. If you have not installed the PlugLinkAV Power Manager software onto a PC, please refer to page 8 (Installing the Software).
- 3. From the Power Manager main menu, click "Device(s)".
- 4. A list of PlugLinkAV devices will appear on the left side of your Power Manager screen. Your Local Device will **always** be the first device in the list by default.
- 5. Select your local device, by clicking on the first device *MAC Address* from the list. Make sure that the device selected is highlighted in yellow. NOTE: It is not necessary to check the box to the left of the *Device Name*.
- 6. Enter the new name in the *New Device Name* field. The new name **must** be at least 4 characters long and can't have spaces.
- 7. Click "Update" to update the new name.
- 8. If the new name was accepted, the message "You have successfully changed your Device name." will appear.
- 9. Congratulations, you have successfully changed your local device name.

Changing your local device name

Changing your remote device name:

- 1. Connect your PC to one of your PlugLinkAV adapters. For instructions on how to connect your PlugLinkAV to your PC, please refer to page 7 (Installing the Hardware).
- 2. Run the PlugLinkAV Power Manager software. If you have not installed the PlugLinkAV Power Manager software onto a PC, please refer to page 8 (Installing the Software).
- 3. From the Power Manager main menu, click "Device(s)".
- 4. A list of PlugLinkAV devices will appear on the left side of your Power Manager screen. Your Remote Devices will always appear under the first device in the list by default.
- 5. Select your remote device, by clicking on the device *MAC Address* from the list. Make sure that the device selected is highlighted in yellow. NOTE: It is not necessary to check the box to the left of the *Device Name*.
- 6. Enter the new name in the *New Device Name* field. The new name **must** be at least 4 characters long and can not have spaces.
- 7. Click "Update" to update the new name.
- 8. If the new name was accepted, the message "You have successfully changed your Device name." will appear.
- 9. Congratulations, you have successfully changed your remote device name.

Changing your remote device name

DEVICE NETWORK ENCRYPTION KEY (NEK)

Understanding the Network Encryption Key: The Network Encryption Key (NEK) is similar to a domain name or work group. Only those devices encrypted with the same domain name or work group, will have access to your Powerline Network. All Asoka PlugLinkAV adapters are encrypted with the same default Network Encryption Key. The default Network Encryption Key is: HomePlugAV.

It is recommended to change your device default Network Encryption Key (NEK) to secure your Powerline Network from unauthorized access; especially if you live in an Apartment building.

Use caution when changing your device Network Encryption Key (also known as the Network Password). If you change the Network Encryption Key on one device, you **must** change the Network Encryption Key on all your PlugLinkAV adapters to the new Network Encryption Key.

You can change your device Network Encryption Key by:

- Using the PlugLinkAV Power Manager described in this section "Changing your local device Network Encryption Key" (bellow).
- Using the Network ID (SECURITY) button described on page 32 "SETTING A RANDOMIZED NETWORK PASSWORD".

Changing your local device Network Encryption Key (NEK):

WARNING: If you change your local device Network Encryption Key (Network Password) your local device will no longer be able to communicated with all your other PlugLinkAV adapters. You must change the Network encryption key on all your PlugLinkAV adapters to the new Network Encryption Key in order for them to communicate.

- 1. Connect your PlugLinkAV adapter to your PC. For instructions on how to connect your PlugLinkAV to your PC, please refer to page 7 (Installing the Hardware).
- 2. Run the PlugLinkAV Power Manager software. If you have not installed the PlugLinkAV Power Manager software onto a PC, please refer to page 8 (Installing the Software).
- 3. From the Power Manager main menu, click "Device(s)".
- 4. A list of PlugLinkAV devices will appear on the left side of your Power Manager screen. Your local Device will **always** be the first device in the list by default.

- 5. Select your local device, by clicking on the first device *MAC Address* from the list. Make sure that the device selected is highlighted in yellow. IMPORTANT: You **must** check the box to the left of the *Device Name*.
- 6. Enter the new Network Encryption Key (NEK) in the *New Network Password* field. The new Network Password **must** be at least 8 characters long and can not have spaces.
- 7. Click "*Update*" to update the new Network Password.
- 8. If the new Network Password was accepted, the message "*Network Encryption Key is successfully changed. The utility will now scan the powerline network*" will appear.
- 9. Congratulations, you have successfully changed your local device Network Password.

Changing your local device Network Encryption Key (NEK)

Changing your remote device Network Encryption Key (NEK):

WARNING: If you change your remote device Network Encryption Key (Network Password) your remote device will no longer be able to communicated with all your other PlugLinkAV adapters. You must change the Network encryption key on all your PlugLinkAV adapters to the new Network Encryption Key in order for them to communicate.

NOTE: When changing your remote device NEK, you will be prompted to enter the selected device 16-digit Password at least once. You can find the device password on the label. See image bellow.

- Connect your PC to one of your PlugLinkAV adapters. For instructions on how to connect your PlugLinkAV to your PC, please refer to page 7 (Installing the Hardware).
- 2. Run the PlugLinkAV Power Manager software. If you have not installed the PlugLinkAV Power Manager software onto a PC, please refer to page 8 (Installing the Software).
- 3. From the Power Manager main menu, click "Device(s)".
- 4. A list of PlugLinkAV devices will appear on the left side of your Power Manager screen. Your Remote Devices will **always** appear under the first device in the list by default.
- Select your remote device, by clicking on the device *MAC Address* from the list. Make sure that the device selected is highlighted in yellow. IMPORTANT: You must check the box to the left of the *Device Name*. If you are prompted; enter the 16 digits remote device password (Example Password: AIAI-AFZO-FMP-FLUI). See image above for your reference.
- 6. Enter the new Network Encryption Key (NEK) in the *New Network Password* field. The new Network Password **must** be at least 8 characters long and Can't have spaces.
- 7. Click "Update" to update the new Network Password.

- 8. If the new Network Password was accepted, the message "*Network Encryption Key is successfully changed. The utility will now scan the Powerline network*" will appear.
- 9. Congratulations, you have successfully changed your local device Network Password.

Resetting and Upgrading the PlugLink 500 MIMO Pass-Through Adapter

Run the PlugLinkAV Power Manager and use the *Upgrade* screen to:

- Reset your PlugLink 500 MIMO Pass-Through Adapter to Factory Defaults
- Reset (Reboot) your PlugLink 500 MIMO Pass-Through Adapter
- Upgrade the Firmware

How to reset your PlugLink 500 MIMO Pass-Through Adapter to its Factory Defaults, reboot and Upgrade the firmware.

- 1. Connect your PC to one of your PlugLinkAV adapters. For instructions on how to connect your PlugLinkAV to your PC, please refer to page 7 (Installing the Hardware).
- 2. Run the PlugLinkAV Power Manager software. If you have not installed the PlugLinkAV Power Manager software onto a PC, please refer to page 8 (Installing the Software).
- 3. From the Power Manager main menu, click "Upgrade".
- 4. A list of PlugLinkAV devices will appear on the left side of your Power Manager screen.
- 5. Select the device, by clicking on the device *MAC Address* from the list.
- 6. Select the option button that you want to perform (Factory Default, Reset Device or Upgrade).

NOTE: Asoka may, from time to time, create new firmware for your device. Visit <u>www.asokatech.com</u> for the latest firmware. - Resetting the PlugLinkAV to its Factory Defaults, will reset the Network Encryption Key (NEK or Network Password) to HomePlugAV.

Prioritizing the Network Traffic

Use the QoS screen to prioritize your traffic through the device. QoS requirements are different for various data types such as streaming video or music, voice and raw data. To provide higher QoS for streaming data, priority levels can be set using tags at the beginning of data frames.

The QoS level settings are: CAP3: Highest CAP2: Medium and CAP1: Lowest.

- IGMP management packets: (Default to CAP3) Sets the channel access priority for IGMP group management frames.
- Unicast packets: (Default to CAP1) Sets the default channel access priority for Unicast frames not matching any other classification or mapping.
- IGMP managed multicast stream: (Default to CAP2) Sets the default channel access priority for stream data belonging to a snooped IGMP multicast group.
- Other multicast or Broadcast packets: (Default to CAP3) Sets the default CAP for multicast frames not in a snooped group and for broadcast frames.

Rescanning your Powerline Network

Use the *Rescan* button to scan for your Powerline devices under the same Network Password in your HomePlug network. This option refreshes the information on your Power Manager.

Manually Resetting the Firmware and Network ID (NID)

You can use the buttons on your PlugLinkAV device to reset the firmware back to its factory defaults, and to create or associate your PlugLink 500 MIMO Pass-Through Adapter to a randomized Powerline Network. For details on how to use the buttons on your PlugLinkAV adapter, please refer to page 32 of this manual.

Note: The PlugLinkAV device must be plugged into an electrical outlet when using these buttons. If you have questions, please contact Asoka USA Technical Support at (408) 550-8173.

Troubleshooting

Following are solutions to a few situations you might encounter. If you do not find a solution in this chapter, contact Asoka USA Technical Support by phone at (408) 550-8173 or through email at support@asokatech.com.

Symptom: I can't connect to anything and there are no lights activated on my PL9678-A5.

Solution:

Unplug the device from the electrical outlet in question. Locate another available outlet in your home. Test the outlet by plugging in another electrical device such as a lamp or radio. Plug the PL9678-A5 into the working electrical outlet. Check to see if the lights work If the above does not work, the device might be defective. Please contact Technical Support for instructions on returning the device for repair or replacement.

Symptom: Some of my devices cannot connect to the Internet or other computers in my network. The lights seem to be functionally normally.

Solution #1:

Re-Initialize the PL9678-A5 device. Unplug the PL9678-A5 from the electrical outlet. Disconnect the Ethernet cable from the device Plug the PL9678-A5 back into the electrical outlet. Reconnect the Ethernet cable.

Solution #2:

The Network Encryption Key (NEK) may not be correct on your devices.

Reset the Network Encryption Key using the Factory Reset button located on the bottom of your PL9678-A5 device. This will reset the NEK back to the default of HomePlug.

Test your connection again. If this still does not work, perform the factory reset on all of your other PL9678-A5 devices in your network.

Solution #3:

It is possible some outlets in your home are not connect together.

Unplug the PL9678-A5 from the current electrical outlet.

Locate another outlet in the home.

Plug the PL9678-A5 into that outlet.

Attach a computer to the PL9678-A5.

Open the Power Manager Utility (located on the enclosed CD).

Under the Profile button, check if your PL9678-A5 is displayed (it Will be the first) and see if your other PL9678-A5 devices can be seen. If you can see other devices under the Profile screen, your PL9678-A5 device is functioning properly.

Solution #4:

Your broadband connection may have stopped working.

Power down your broadband router and/or DSL/cable modem (if applicable) for about 30 seconds and then power them back on.

If this step fails, please contact your ISP for assistance.

A

Specifications

This appendix lists the specifications for your PL9678-A5.

T	
Standards Compliance:	•HomePlug® AV • IEEE 802.3, IEEE 802.3x, IEEE 802.3u, IEEE1901
Software Utility	Microsoft Windows® 98 SE, 2000, ME, XP, Vista and windows 7(32bit)
System Requirements:	Windows 7 (64-bit) ; operating systems
Network Protocol:	TCP/IP, CSMA/CA, TDMA (supported in the future)
Network Interface:	One-port 10/100/1000M Ethernet (RJ-45) switch
PHY-Rate:	Up to 500 Mbps
Distance:	Over 300 meters
Operating Frequency:	2 to 70 MHz
Modulation Schemes:	Orthogonal Frequency Division Multiplexing (OFDM) • QAM
	4096/1024/256/64/16 • QPSK • BPSK
EMI and Safety:	• FCC Part 15 Class B •UL (US and Canada) •CE
Additional Protocols:	• Forward Error Correction (FEC) • Automatic Channel Adaptation
Power Supply:	• US Version: 100-120VAC • UK/EU Version: 220-240VAC
Surge Energy Rating:	4KV
Power Rating:	• US Version: 120VAC 0.1A max, 60Hz • UK/EU Version:
	220-240VAC 0.08A max, 50Hz
Security:	128-bit AES
t

Environmental	• Operating temperature: 32°F to 104°F (0°C to 40°C) • Operating			
Specifications:	humidity: 10% to 85% Non-condensing ${\mbox{\circ}}$ Storage temperature: -4 ${\mbox{\circ}}$ F to			
	158°F (-20°C to 70°C) • Storage humidity:			
	5% to 90% Non-condensing			
Quality of Service:	•ToS • 802.1q • TDMA (supported in the future)			
Warranty:	lifetime			

Components

Front Panel

Use the status lights on the front panel to verify connections.

Status Light	State	Indication
Power	Illuminated	Device is powered on
	Off	Devices has no power
	Red and Green illuminate alternately	Stand by mode (After 3 minutes no link)
PLC Activity	Blinking Red	low connection
	Blinking Yellow	good connection
	Blinking Green	excellent connection
	Off	no connection
Eth Link	Illuminated	Ethernet connectivity
	Blinking	Ethernet traffic
	Off	No Ethernet connectivity

The following table describes the status light functions in the front panel:

Bottom Panel

The bottom panel of the PL9678-A5 contains the following components:

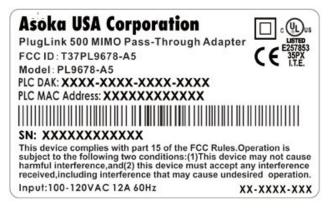

RJ-45 Ethernet port

The label on the rear panel of the PlugLink 500 MIMO Pass-Through Adapter contains the information listed below.

MAC address Model number Part number Serial number PLC DAK

Note: Write this information down in your Warranty Support Information card for future reference.

Buttons

The PlugLink 500 MIMO Pass-Through Adapter device has two hardware push buttons:

FW RST (Firmware Default Reset) button – Resets the PlugLink 500 MIMO Pass-Through Adapter back to factory default settings. Press and hold the button with a pin or sharp object for about 2 seconds until you see the lights on the device flash briefly.

SECURITY (Network ID) button - All PlugLink 500 MIMO Pass-Through Adapter devices have a default password Network Encryption Key (NEK) set to "HomePlugAV" allowing them to communicate to each other. The SECURITY button allows you to set a devices' password to a randomized Network Encryption Key (NEK) for maximum security. You can then set other devices to the same NEK by using their SECURITY button. Only units with the same NEK can communicate to each other.

SETTING A RANDOMIZED NETWORK PASSWORD

Ethernet light PLC ACT light Power light

ice A Device B

Select a PlugLink 500 MIMO Pass-Through Adapter (Device A) and plug into an AC outlet. The POWER light indicator should be lit solid green.

Press the SECURITY button BRIEFLY (1 second) and release. The POWER light should now be blinking green.

IMPORTANT: If the POWER light is not blinking green, repeat Step "a" until the power light blinks green.

This unit is now ready to create a new randomized NEK (Net Encryption Key) network. This unit will remain in this "adder" mode for about 2 minutes.

Select another PlugLink 500 MIMO Pass-Through Adapter (Device B) and plug into a second outlet.

Press the SECURITY button BRIEFLY (1 second) and release. The POWER light should now be blinking green.

IMPORTANT: If the power light is not blinking green, repeat Step "a" until the power light is blinking green.

In about 15 seconds the POWER light will change from flashing green to solid green and the PLC ACT (Power line Communication Activity) light will turn solid green (flashing green when there is data traffic) indicating they are synchronized with the same NEK. Congratulations, you are done!

ADDING A THIRD OR MORE PLUGLINK HD AV DEVICES

Ethernet light PLC ACT light Power light

Plug your new PlugLink 500 MIMO Pass-Through Adapter (Device C) into an AC outlet. The POWER light indicator should be lit solid green.

Press the SECURITY button BRIEFLY (1 second) and release. The POWER light should now be blinking green.

IMPORTANT: If the POWER light is not blinking green, repeat Step "a" until the power light is blinking green.

This unit is now ready to join the existing HD AV network. This unit will remain in this "adder" mode for about 2 minutes.

From your existing devices (either device A or device B) press the SECURITY button BRIEFLY (1 second) then release. The POWER light should now be blinking green.

IMPORTANT: If the power light is not blinking green, repeat Step "2" until the power light is blinking green.

In about 15 seconds the POWER light will change from flashing green to solid green and the PLC ACT (Power line Communication Activity) light will turn solid green (flashing green when there is data traffic) indicating they are synchronized with the same NEK.

To add more PlugLink devices; simple repeat this process per device.

Congratulations, you are done!

33 of 38

Notes:

The other devices already in the Power line network with the proper NEK are not affected and do not need to be reconfigured.

If you disconnect power from any device, its NEK value will remain and will not default back to "HomePlugAV" NEK.

An adapter can only generate a private key once. To replace a private key, first reset the unit back to its factory defaults by pressing the Firmware Default Reset (FW RST) button for 1 second, then follow the procedure above.

The use of the SECURITY (Network ID) button is optional. You may also use the application software described in the manual to set NEK's as well.

C

Warranty

Asoka warrants that (a) the hardware components of the product will be free from defects in materials and workmanship under normal use from the date of purchase when used within the limits set forth in the Specifications section of the User Guide, and (b) the software components will perform substantially in accordance with Asoka's published specifications for ninety (90) days from the date of purchase, but does not warrant that the software will be error-free or free of all defects.

Should a product fail to perform as described in the User Guide, it will be repaired or replaced with the same or functionally equivalent product by Asoka, at its discretion, free of charge provided that you: (a) return the failed product to an Asoka designated repair facility with shipping charge prepaid, and (b) provide Asoka with proof of the original date of purchase. Repaired or replacement products will be returned to you with shipping charges prepaid. Asoka warrants any replaced or repaired product or component for the life of the product.

This warranty extends only to you, the original purchaser and is not transferable to any subsequent purchasers.

This warranty does not apply if, in the judgment of Asoka, the product fails due to damage from shipment, handling, storage, accident, abuse, misapplication or misuse, or if it has been used or maintained in a manner not conforming to product manual instructions, has been modified in any way, or has had any serial number removed or defaced. Repair by anyone other than Asoka or an approved agent will void this warranty. The maximum liability of Asoka under this warranty is limited to the purchase price of the

product covered by the warranty. Prior to returning any defective product, the purchaser or the authorized merchant from whom the purchaser originally bought the product must obtain a Return Material Authorization (RMA) number from Asoka. All defective products should be returned to Asoka with shipping charges prepaid. Asoka will not accept collect shipments.

WHILE ASOKA HAS MADE EVERY EFFORT TO PROVIDE CLEAR AND ACCURATE TECHNICAL INFORMATION ABOUT ITS PRODUCTS, ASOKA ASSUMES NO LIABILITY FOR ANY EVENTS ARISING OUT OF THE USE OF THE TECHNICAL INFORMATION OR THE PRODUCT, EXCEPT AS SPECIFICALLY PROVIDED IN THIS AGREEMENT OR AS REQUIRED BY LAW. THE WARRANTIES AND REMEDIES STATED ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHERS, ORAL OR WRITTEN, EXPRESS OR IMPLIED. ANY AND ALL OTHER WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT OF THIRD PARTY RIGHTS ARE EXPRESSLY EXCLUDED. ASOKA SHALL NOT BE LIABLE, UNDER ANY CIRCUMSTANCES, TO ANY PERSON OR ENTITY FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION, DAMAGES RESULTING FROM THE USE OR MALFUNCTION OF THE PRODUCTS, LOSS OF PROFITS OR REVENUES, BUSINESS INTERRUPTION, OR COSTS OF REPLACEMENT GOODS, EVEN IF ASOKA IS INFORMED IN ADVANCE OF THE POSSIBILITY OF SUCH DAMAGES.

D

FCC Notice

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct

The interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions:

This device may not cause harmful interference, and

This device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement

37 of 38

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. such modifications could void the user's authority to operate this equipment.
