

3-Series Smart Switch

3131-C

QUICK START GUIDE

Device Overview

Included in Box:

- 1x - Smart Switch
- 1x - CR 2450 Battery (pre-installed)
- 1x - Back plate (for non-switch locations)
- 1x - Rocker-style Mounting Bracket
- 1x - Toggle-style Mounting Bracket
- 1x - Quick Start Guide
- 2x - Mounting Screws
- 2x - Back plate Screws

Getting Started

Note: It is recommended that you join the Smart Switch to your home system before attaching to a wall switch.

Powering Up and Pairing

1. Pull and remove the white "Pull to Pair" tab from the Smart Switch. The device will power up and begin searching for a ZigBee network to join.
2. Initiate pairing on the home gateway/hub.
3. The Smart Switch should start the joining process automatically. While the switch is searching for a network, the status LED will periodically blink blue. Once the Smart Switch has successfully joined the network, the status LED will turn solid blue for 2 seconds, then turn off.
4. Finish pairing setup from your home gateway/hub.

Installation

1. Using a standard slotted screwdriver, remove the screws to the wallplate (do not remove the wallplate itself).
2. Two brackets are included in the package, toggle-style (traditional) and rocker-style. Attach the appropriate bracket to the wallplate using the screws included in the package.
3. While holding the Smart Switch battery-side down, slide the SmartSwitch into the bracket, then slide the cover over until it snaps into place.

LED Light Patterns

| Pattern | Description |
|----------------------|--------------------------------|
| Blue Blinking | Establishing Connect / Joining |
| Blue Pulsing | Dimming |
| Blue Short | Command Received |
| Green Short | Joining Successful |
| Red 3 Blink Series | Low Battery |

Controls

| | |
|--------------------|--|
| On/Off | Single-tap |
| Dim Up/Down | Press and hold |
| Full On/Off | Double-tap button |
| Color Cycle Mode | Double-tap button |
| Factory Defaulting | Hold any button while inserting battery, release when LED illuminates. |

Replacing Batteries

1. Remove the Smart Switch's cover pulling bottom of the cover away from the wall then lifting.
2. With the cover removed, slide the Smart Switch out of the bracket and remove old battery.
3. Replace the battery using a new CR2450 battery.
4. Slide the Smart Switch into the bracket and reattach cover.

Approvals & Safety

RF warning for mobile device:

- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

- This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Conforms to FCC Part 15B

FCC ID: T3L-SS045

IC: 1219A-SS045

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help

Industry Canada licence-exempt RSS Standards. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

This equipment complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment. This equipment is in direct contact with the body of the user under normal operating conditions. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Changes or modifications not expressly approved by CentralLite Systems, Inc. could void the user's authority to operate the equipment.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.
