SPEAK THE LANGUAGE[®]

Electronic Deer Call

Patent Pending

- Estrus™ Bleats, Grunts, Snort-Wheezes and Rattling Horns
- Remote works from 60 yards (180 feet) • Compact, easy-to-carry, lightweight
- Straps to trees, posts, bushes, etc. • Teaching Tool • Water resistant
- Replaceable batteries

Includes: Wireless Remote, Tree Strap, Batteries

All the advantages an electronic call can offer are yours with the e-DEER™. Place the e-DEER™ speaker set where you need the deer to go and set-up where you are concealed. The e-DEER™ remote works from as far as 60 yards (180 feet) away. Other electronic calls produce sounds that pale in comparison to the realism of the sounds of the e-DEER™. When you want an electronic call that actually "Speaks The Language®", you want the e-DEER™.

Speak The Language®,

INSTRUCTIONS

Simply press the designated button for the distinctive deer sound that you want to reproduce.

EXERCISES

Grunt - A call made by deer to announce their presence. Make this call when trying to attract a buck into range by making the buck think there is another buck invading his territory.

Doe Estrus™ Bleats - Estrus™ bleats are made by adult does to tell bucks they are ready to breed. Repeat two to three times every 10-15 minutes.

Snort-Wheeze - The snort-wheeze is an especially aggressive sound. It is like one buck calling another buck out for a fight. The ultimate challenge call, especially during mating season.

Rattle - The sound of a dominant buck fight. Their antlers crashing together as they struggle. This tends to call other bucks in to join in the action. Use this call in conjunction with the snort-wheeze and kick the dirt and bushes to add realism to the fight.

User Information

The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual

The Federal Communications Commission Radio Frequency Interference Statement includes the following paragraph.

This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 for the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate frequency energy and, if not installed and used in accordance with the instruction may cause interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.
