

Correspondence Summary Q & A

March 13, 2007

SUBJECT: LDL-TECHNOLOGY - FCC ID: T45S106064

-
1. Test report page 6 of 13. Note 3. refers to 300ms burst, which appears to be in error. The plots and Operation description show a 14ms burst. Please revise and clarify the silent period between pulse train (or frame).

Answer:

The pulse train consists of three 14 ms bursts spaced of 120-160 ms what makes a total of 300 ms repeated every minute.

The silent period is thus of 59.958 s/min.
