May 17, 2010

John Compton, President
Point Six
161 Prosperous Place, Suite 200
Lexington, KY 40509

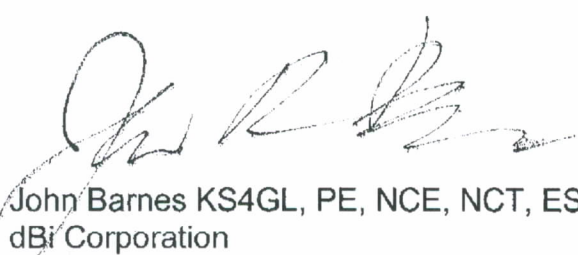

John,

All of the Radiated Emission measurements on the BAPI BAWFP-S and BAPI BAWFP-B were performed at a nominal 3 meter (3m) distance between the receiving antenna and the equipment-under-test (EUT).

This is documented on page 12 of test reports 10dBi002 and 10dBi002a. The line right under "Test Location: 5m semianechoic chamber"

says

"Test Distance: 3m".
