# **USER'S MANUAL**

# MOBILE RADIO

Nice Housing, Stoutness & Stability, Advanced and Reliable functions, Perfect & Valuable. ( Approval. 5888UV mobile radio especially designs for drivers and it pursues company philosophy of innovation and practicality.

We only do best radio!

When programming the transceiver, read the factory initial data firstly, then rewrite the frequency and signaling etc., otherwise errors may occur because of different frequency band etc..

5888UV Mobile Radio Applicable Software: QPS5888UV Model Apply To This Manual: 5888UV Mobile radio

# MOBILE RADIO

Thank you for choosing this mobile transceiver, which always provide high quality products, and this transceiver is no exception 5888UV is a ruggedly-built, high quality Dual Band FM transceiver providing 50 Watts of power output on the VHF band and 40 Watts on the UHF band. It owns many advanced characters like cross band repeat function, built with a direct-flow heat sink and thermostatically-controlled cooling fan maintaining a safe temperature for the transceiver's circuit.

5888UV has four independent receiving bands, consist of UU, UV, VU, VV for dual receive and dual output, plus receiving for AM/FM signal of air band, marine band, PMR, etc.also able to receive FM/TV radio and analogue TV signal. It owns 758 memory channels, full duplex operation with independent volume and squelch controls, optional compander and builtin CTCSS/ DCS, DTMF, 5TONE,2TONE signaling, detachable front panel for flexible installation.

Though friendly design for user, this transceiver is technically complicated and some features may be new to you. Consider this manual to be a personal tutorial from the designers, allow the manual to guide you through the learning process now, then act as a reference in the coming years.

#### **Precautions**

Please observe the following precautions to prevent fire. personal injury, or transceiver damage:

- Do not attempt to configure your transceiver while driving it is dangerous.
- This transceiver is designed for a 13.8V DC power supply. Don't use a 24V battery to power on the transceiver.
- ♠ Do not place the transceiver in excessively dusty, humid or wet
- areas, nor unstable surfaces.

Please keep it away from interferential devices (such as TV, generator etc.)

Do not expose the transceiver to long periods of direct sunlight nor

place it close to heating appliances.

If an abnormal odor or smoke is detected coming from the transceiver, turn OFF the power immediately. Contact an

Anytone service station or your dealer.

Do not transmit with high output power for extended periods; the transceiver may overheat.

#### New and Innovative Features

5888UV Mobile Radio has nice housing, stoutness & stability, advanced and reliable functions, perfect & valuable. This amateur mobile radio especially designs for drivers and it pursues company philosophy of innovation and practicality. More functions as follows:

- ▼ 758 memory channels, full duplex operation with independent volume and squelch controls
- ▼ 50 Watts of power output on the VHF band and 40 Watts on the UHF band with cross band repeater function.
- ▼ Four independent receiving bands, consist of UU, UV,VU,VV for dual receive and dual output, plus receiving for AM/FM signal of air band, marine band, PMR, etc; able to receive FM/TV radio and analogue TV signal.
- ▼ Display on a large LCD with adjustable brightness, convenient for nighttime use. There are Amateur operation mode and Professional operation mode for option.
- ▼ Distribute buttons reasonably, convenient for operation. Adopt superior quality material, better technology and direct-flow heat sink to ensure stable and durable operation.
- ▼ 758 programmable memory channels, identified by editing name.
- ▼ Programming different CTCSS, DCS, 2Tone, 5Tone in per channel, rejecting extra calling from other radios.
- ▼ Various scan functions including CTCSS/DCS Scan function.
- ▼ Using 5Tone to send Message, Emergency alarm, Call all, ANI, Remotely kill, Remotely Waken, etc.
- ▼ Automatic calling Identification function by DTMF--ANI or 5Tone--ANI .
- ▼ Multi groups of fix scrambling and 2 groups of self define scrambling.
- Compander function for decrease the background noise and enhance audio clarity, it can set compander ON/OFF per channel.
   12.5K for narrow band.
- ▼ Theft alarm provides extra safety.

#### **FREQUENCY RANGE**

136~174MHz and 400~520 MHz

1

## Supplied Accessories/Optional Accessories

#### SUPPLIED ACCESSORIES

After carefully unpacking the transceiver, identify the items listed in the table below. We suggest you keep the box and packaging.

- Transceiver
- Microphone (QHM-04) (with DTMF keyboard)
- Mobile Mounting Bracket (QMB-01)
- DC Power Cable with Fuse Holder(QPL-01)
- · Hardware Kit for Bracket

Black screws (M4X8mm) 4PS(QSS-01A) Tapping screws (M5X8mm) 4PS(QSS-01B) (4) J222222

S-Washer (QSS-01D)

· Spare Fuses

(OF-01)

2

#### OPTIONAL ACCESSORIES

• 3 meter extending cable for attachable panel/ Cloning Cable(CP52)

 USB Programming Cable (PC51)

• External Speaker (SP-02)

 Cigar-Plug Connection Line (QCC-01)

 Programming Software (QPS-5888UV)

• Power supply (QRP-01)

 Microphone (QHM-02)

 Car Antenna (QCA-02)

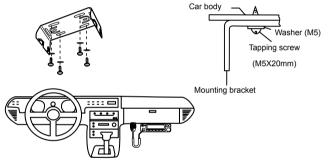

5888UV

#### **MOBILE INSTALLATION**

To install the transceiver, select a safe, convenient location inside your vehicle that minimizes danger to your passengers and yourself while the vehicle is in motion. Consider installing the unit at an appropriate position so that knees or legs will not strike it during sudden braking of your vehicle. Try to pick a well ventilated location that is shielded from direct sunlight.

 Install the mounting bracket in the vehicle using the supplied selftapping screws (4pcs) and flat washers (4pcs).

- Position the transceiver, then insert and tighten the supplied hexagon SEMS screws.
  - ▼ Double check that all screws are tightened to prevent vehiclevibration from loosening the bracket or transceiver.

▼ Determine the appropriate angle of the transceiver, using the 3 screw hole positions on the side of the mounting bracket.

#### Initial Installation

#### DC POWER CABLE CONNECTION

**□** 

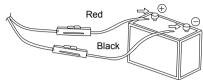

Locate the power input connector as close to the transceiver as possible.

#### **<b>** ■ MOBILE OPERATION

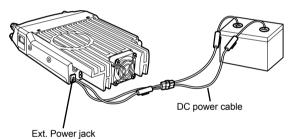

The vehicle battery must have a nominal rating of 12V. Never connect the transceiver to a 24V battery. Be sure to use a 12V vehicle battery that has sufficient current capacity. If the current to the transceiver is insufficient, the display may darken during transmission, or transmitting output power may drop excessively.

- Route the DC power cable supplied with the transceiver directly to the vehicle's battery terminals using the shortest path from the transceiver.
  - ▼ We recommend you do not use the cigarette lighter socket as some cigarette lighter sockets introduce an unacceptable voltage drop.
  - The entire length of the cable must be dressed so it is isolated from heat, moisture, and the engine secondary (high voltage) ignition system/ cables.
- After installing cable, in order to avoid the risk of damp, please use heat-resistant tap to tie together with fuse box. Don't forget to reinforce whole cable.
- In order to avoid the risk of short circuit, please cut down connection with negative (-) of battery, then connect with radio.
- 4. Confirm the correct polarity of the connections, then attach the power cable to the battery terminals; red connects to the positive (+) terminal and black connects to the negative (-) terminal.
  - Use the full length of the cable without cutting off excess even if the cable is longer than required. In particular, never remove the fuse holders from the cable.

5. Reconnect any wiring removed from the negative terminal.

- Connect the DC power cable to the transceiver's power supplyconnector.
  - ▼ Press the connectors firmly together until the locking tab clicks. If the ignition-key on/off feature is desired(optional feature),use the

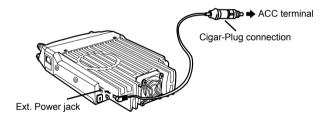

optional QCC-01(For Cigar-Plug connection) cable. Connect one of the cables between the ACC terminal or a Cigar-Plug that operates with the vehicle ignition or ACC switch on the vehicle and EXT POWER jack on the rear side of the unit.

 $\mathbb{R}_{\text{NOTE}}$  In many cars,the cigar-lighter plug is always powered. If this is the case, you cannot use it for the ignition key on/off function.

#### Initial Installation

3

- 7. When the ignition key is turned to ACC or ON(Start) position with the radio turned off, the power switch illuminates. The illumination will be turned off when the ignition key is turned to the off position. To turn on the unit, press the power switch manually while it is illuminated. (While ignition key is at ACC or ON position)
- 8. When the ignition key is turned to ACC or ON position with the radio's power switch on, the unit turns on automatically and the power switch will be lit. Turn the ignition key to OFF position or manually turn the power switch off to shut down the radio.
- 9. Using extra cable, power consumption: 5MAH.
- 10. Without this function, user can turn on/off radio by Power knob.

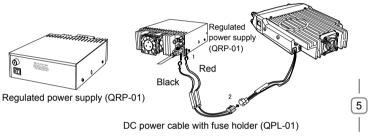

#### **¥FIXED STATION OPERATION**

In order to use this transceiver for fixed station operation, you will need a separate 13.8V DC power supply (not included), power supply( QRP-01) as optional accessories. Please contact local dealer to require.

The recommended current capacity of your power supply is 12A.

- Connect the DC power cable to the regulated DC power supply and ensure that the polarities are correct. (Red: positive, Black:negative).
  - ▼ Do not directly connect the transceiver to an AC outlet.
  - ▼ Use the supplied DC power cable to connect the transceiver to a regulated power supply.
  - ▼ Do not substitute a cable with smaller gauge wires.

- Connect the transceiver's DC power connector to the connector on the DC power cable.
  - Press the connectors firmly together until the locking tab clicks.
- $\blacktriangledown$  Before connecting the DC power to the transceiver, be sure to switch the transceiver and the DC power supply OFF.
  - ▼ Do not plug the DC power supply into an AC outlet until you make all connections.

#### Initial Installation

#### \* REPLACING FUSES

If the fuse blows, determine the cause, then correct the problem. After the problem is resolved, replace the fuse. If newly installed fuses continue to blow, disconnect the power cable and contact your authorized dealer or an authorized servicecenter for assistance.

Fuse Location	Fuse Current Rating
Transceiver	15A
Supplied Accessory DC power cable	20A

Only use fuses of the specified type and rating, otherwise the transceiver could be damaged.

**□**()) NOTE

If you use the transceiver for a long period when the vehicle battery is not fully charged, or when the engine is OFF, the battery may become discharged, and will not have sufficient reserves to start the vehicle. Avoid using the transceiver in these conditions.

#### **ANTENNA CONNECTION**

Before operating, install an efficient, well-tuned antenna. The success of your installation will depend largely on the type of antenna and its correct installation. The transceiver can give excellent results if the antenna system and its installation are given careful attention.

Use a  $50\Omega$  impedance antenna and low-loss coaxial feed-line that has a characteristic impedance of  $50~\Omega$ , to match the transceiver input impedance. Coupling the antenna to the transceiver via feed-lines having

an impedance other than  $50\Omega$  reduces the efficiency of the antenna system and can cause interference to nearby broadcast television receivers, radio receivers, and other electronic equipment.

- Transmitting without first connecting an antenna or other matched load may damage the transceiver. Always connect the antenna to the transceiver before transmitting.
- All fixed stations should be equipped with a lightning arrester to reduce the risk of fire, electric shock, and transceiver damage.

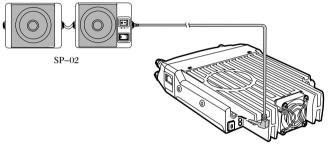

The possible locations of antenna on a car are shown as following:

#### ACCESSORIES CONNECTIONS

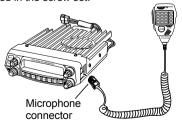

#### **■ EXTERNAL SPEAKER**

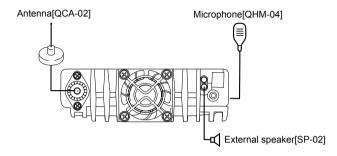

If you plan to use an external speaker, choose a speaker with an impedance of 8  $\Omega$ . The external speaker jack accepts a 3.5 mm (1/8") mono (2-conductor) plug.

#### \* MICROPHONE

For voice communications, connect a microphone equipped with an 8-pin modular plug into the modular socket on the front of the main unit. Press firmly on the plug until the locking tab clicks. Attach the supplied microphone hanger in an appropriate location using the screws included in the screw set.

#### **\* PC CONNECTING**

To untilize the QPS5888UV software, you must first connect the transceiver to your PC then using an optional programming cable PC50 (via Data socket ).

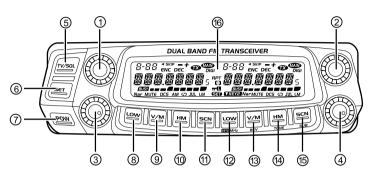

Please use QPS-5888UV software for programming.

Ask your dealer about purchasing a Programming Cable PC51.

## Getting Acquainted

#### FRONT PANEL

8 • Basic Functions

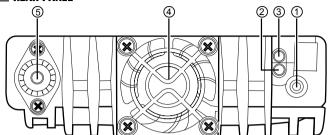

NO.	KEY	FUNCTION
1	Left Dial Knob	Rotate it to choose frequency /channel. Press it to set the left band as "Main Band"; In VFO mode, press it to choose the frequency band; In function setup as confirm key; in scan mode, rotate it to change scan direction
2	Right Dial Knob	Rotate it to choose frequency /channel. Press it to set the right band as "Main Band"; In VFO mode, press it to choose the frequency band; In function setup as confirm key; in scan mode, rotate it to change scan direction

[11

#### SWITCHING THE POWER ON/OFF

#### **≫** POWER ON

Press key to switch the transceiver ON, the LCD displays "WELCOME ANYTONE", then display current frequency or channel.

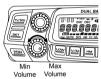

#### **⇒** POWER OFF

Press we key for over 0.5 Second to switch the transceiver OFF.

#### **■ ADJUSTING THE VOLUME**

Rotate the [VOLUME] knob of selected band clockwise to increase the volume, counterclockwise to decrease the volume.

Hold [wo], keep press Monitor the background noise after the transceiver emits a DU beep, meanwhile adjust the [VOLUME] knob. During communication, volume can be adjusted more accurate.

#### SWITCH BETWEEN VFO AND CHANNEL MODE

In standby, press correspondent when key to switch between Frequency and channel mode, when the transceiver is in channel mode, the LCD will displays current channel.

155. 150	•	445.	15Ø	

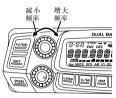

136 125

หติด เอร

#### ADJUSTING FREQUENCY

#### \* ADJUSTING FREQUENCY THROUGH SELECTOR KNOB

In frequency (VFO) mode, turn the selector knob clockwise to increase frequency; counterclock-wise to decrease frequency. Every gear will increase or decrease frequency by one step. To adjust the Main band frequency, press corre-spondent selector knob, the left side of decimal point will flash. In this status, turn the

selector knob will increase or decrease frequency quickly by 1MHz step

**□**√) NOTE

The microphone [ UP/DOWN ] key also able to adjust frequency. Press [ UP/DOWN ] key will increase(decrease) the frequency by one step size. Hold [ UP/DOWN ] key will adjust the frequency continuously.

#### **₩ INPUT FREQUENCY THROUGH MICROPHONE NUMBER KEY**

In VFO mode, you can input the frequency by the microphone numeric key. It is invalid to input frequency out of the frequency band.

For example:

to input 150.125Mhz, press 1, 5, 0, 1, 2, 5 continuously. to input 152 MHz, press1, 5, 2, # continuously.

**□** 

When the Band lockout function is on, the input or adjusting of frequency band. The right band only limited in 136-174Mhz and 400-470Mhz.

#### **ADJUSTING CHANNEL**

#### **☀** ADJUSTING CHANNEL THROUGH SELECTOR KNOB

In the channel mode, you can adjust the channel directly by the channel knob. Turn clockwise to increase one channel; turn counterclockwise to decrease one channel. To adjust the Main band channel, press

- We only do best radio!

#### **Basic Operations**

correspondent selector knob, the channel number flashes in this situation, the channel number will increase 10 channels by each gear of selector knob. Press microphone [ UP/DOWN ] key also able to adjust the channel

next channel

If there is any empty channel, the adjustment will ignore it and jump to

#### **Ⅲ** INPUT CHANNEL THROUGH MICROPHONE NUMBER KEY

In channel mode, you can switch to desired channel by press 3 of the microphone numeric key (001-758). For example input 001 get channel 1; input 030 is channel 30; input 512 is channel 512. If the input channel is not programmed with frequency, the transceiver will emit a warning beep and return to last channel.

#### SWITCH BETWEEN MAIN BAND AND SUB BAND

This transceiver is default on dual receive. a "MAIN" icon will displays in the top right of the working frequency. The transmitting is only on the Main band. When the left Band is Main band, press the right selector knob will switch

136, 125 4ØØ 125 135 125 4ØØ. 125

the right Band to Main band. Then press the left selector knob will switch the left Band to Main band

#### **SELECTING THE FREQUENCY BAND**

- 1. Choose for Left band: press the left side which it to VFO mode, press the left selector knob over 1 second then repeater above operation will switch the left band
- 2. Choose for right band; press the right side will key to switch it to VFO mode, press the right selector knob over 1 second then repeater above operation will switch the right band

NOTE

This transceiver can be set working on 2 UHF band or 2 VHF band.

#### RECEIVING

In standby, both left band and right band 4<u>00</u>. 125 *136. 1*25 able To receive. When they receive any signal, the BUSY icon and signal strength icon will appear in the correspondent area of the LCD. And you can hear the calling.

If the transceiver has set at higher squelch level, it may fail to hear the calling. If the Busy and signal strength icon display inleft band or right band, but can not hear the calling, means the signal is with matching carrier but dis-matching signaling.

#### SQUELCH OFF/SQUELCH OFF MOMENTARY

Long press of [15/55] key can be programmed as Squelch Off or Squelch Off Momentary to monitor the weak signal.

- 1. Squelch Off: Hold week key until hear "Du" beep, the squelch is off, repeat the above operation to resume squelch.
- 2. Squelch Off Momentary: Keep hold key to disable squelch, Release the key to resume squelch.

In standby, press the microphone \* to cancel squelch, press it again to turn on the squelch.

#### TRANSMITTING

Hold PTT key, the transceiver change to transmitting. Please hold the mic-rophone approximately 2.5-5.0cm from your mouth, and then speak into the microphone in your normal voice to get best timbre.

The transmitting only available on Main band, the TX icon will display in NOTE the top right corner of the Main band frequen

## 5888U\

## Shortcut Operations

In channel mode, this operation is for temporary use only

6

**■ SQUELCH LEVEL SETUP** 

his function is used to setup the strength of receiving signal, when the stren gth reach a certain level, the calling can be heard, otherwise, the transceiver will keep mute.

In standby, press and hold key, meanwhile switch the selector knob to adjust the squelch level of Main band.

**1-20:** Total 20 squelch levels available.

136. 1375 SOL 05

OFF: turn off squelch. The background noise always on.

—∰ NOTE

The squelch level shall setup separately for right band and left band.

#### ■ TRANSMIT DTMF/2TONE/5TONE SIGNALING

If the current channel is with DTMF/2TONE/5TONE signaling, hold PTT and [ UP ] key will transmit selected Pre-programmed signaling

#### HIGH/MID/LOW POWER SWITCH

In standby, repeat press wey to choose power levels as following: When LCD displays HIGH, the power on current channel is high. When LCD displays MID1, the power on current channel is middle 1 When LCD displays MID2, the power on current channel is middle 2. When LCD displays LOW, the power on current channel is low. Output power for each level:

HIGH	MID1	MID2	LOW
VHF ( 50W )	VHF ( 20W )	VHF ( 10W )	VHF (5W)
UHF (40W)	UHF ( 20W )	UHF ( 10W )	UHF (5W)

#### FREQUENCY REVERSE

In standby, hold key for over 0.5second to turn On/ Off frequency reverse function. When reverse function is on, the TX frequency will change to RX frequency and RX frequency change to TX frequency.

 $_{\rm N}$ He signaling will also be reversed if CTCSS/DCS signaling existed in this channel.

This function is valid only when current channel setup with offset frequency and offset direction

#### ND-WIDTH SELECTION

This transceiver has 1 band widths
In standby, hold key for over 0.5 second to choose the 1 band widths
When LCD displays **NARROW**, current channel is work on narrow |
band 12 5KHz

#### HOME CHANNEL

In standby, press [ key to switch to HOME channel, and commnicatte on HOME channel. repeat press it to return to last channel.

145. ISØ 4ØØ. 125

#### **SUPER CHANNEL SELECT**

In standby, press the left or right volume knob will switch the radio work on super channel 1 or supper channel 2.

- We only do best radio!

## 6

#### **Shortcut Operations**

#### **DUAL WATCH**

In standby, hold wkey for over 0.5 second to enter Dual Watch mode. The radio will scan the channel in every 5 seconds. When the radio receives match signal, it pause scanning until the signaling disappear. Repeat above operation to exit Dual watch.

#### **EMERGENCY ALARM**

To start emergency alarm, hold the right volume knob until the trans-ceiver displays **ALARM** and emit alarm. Re-power on the transceiver to exit alarm. This transceiver has 4 kind of alarm which can be setup by programming software.

#### **■ CHANNEL/FREQUENCY SCAN**

#### \* FREQUENCY SCAN

In VFO mode, this function is designed to monitor signal of every communicative frequency point of "step size" you have set.

- 1. In VFO mode, press the Main Band [SCN] key to enter channel scan.
- During the scanning adjust the Main band selector knob or press microphone [ UP/DOWN ] key will change the scan direction.
- 3. Press key to exit scan.

#### **₩ CHANNEL SCAN**

- 1. In channel mode, press the Main Band (see key to enter channel scan.
- During the scanning, adjust the Main band selector knob or press microphone [ UP/DOWN ] key will change the scan direction.
- 3. Press key to exit scan.

#### CHANNEL SCAN SKIP

In channel mode, switch selector knob to choose the channel, then hold

for over 0.5 second, the radio prompts "DU DU", and LCD displays "SKIP", and now the current channel is Scan Skip.

1 Sop	15 500	
135. 125	400. 125	

#### CHANNEL EDIT

- 1. In VFO mode, turn selector knob to select the desired frequency or input frequency by MIC's numeric keys.
- 2. Hold set key until the transceiver prompt DU and the display of channel number flashes.
- 3. Turn selector knob to select the channel number to store. (If the storage has data , the LCD will display the frequency, otherwise will display-------)
- 4. Press set key, the LCD display MEN- IN, the channel edit completed.

#### SCAN RANGE LIMIT

You can set the VFO scan frequency range by this function:

- Choose upper limit and lower limit frequency, there are L1/U1- L5/ U5, five couple of limit frequency for selection. L stands for lower limit and U stands for the upper limit, the upper limit must over the lower limit frequency. Please refer the Channel Edit to setup the limit frequency.
- 2. In VFO mode, set the VFO frequency in the range between upper and lower limit.

3. Press key to start scan in Imited range.

#### CHANNEL COPY

- 1. In channel mode, turn the selector knob to choose the channel.
- Hold set key until the transceiver prompt a Du and channel number display flashes.
- 3. Turn selector knob to choose channel number for storage. ( If the

#### **Shortcut Operations**

storage has data , the LCD will display the frequency, otherwise will display-----)  $\,$ 

4. Press key, the LCD displays **MEN-IN**, channel copy completed.

#### **CHANNEL DELETE**

- 1. In standby, hold set key until the transceiver prompt DU, and channel number flashes.
- Turn selector knob to choose channel number for delete. (If the storage has data, the LCD will display the frequency, otherwise will display-----)
- Hold Main band volume knob, until the transceiver emit DU DU prompt and LCD displays MEN-OUT, the channel delete completed.

#### operation steps of Function menu

- 1. Press set key to enter function menu.
- 2. Turn the Main band selector knob to choose wanted function.
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.
- Press the Main band selector knob to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### APO (AUTOMATIC POWER OFF)

Once APO is activated, the transceiver will be automatically switched off when the pre-set timer running out.

- Press set key to enter function menu.
   Turn the Main band selector knob to
  - APO 445. 150
- choose No. 01 menu. the LCD displays "APO"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value. Available Values: 0.5-12 hours, OFF
- 0.5 HF .445.150
- Press the Main band selector knob or set key to store value and back to function menu.
  - Press key or hold selector knob for over 0.5 second to store setup and exit.

#### **AUTOMATIC OFFSET**

16

This transceiver has automatic offset function. When this function is on, the transceiver will automatically transmitting with RX frequency  $\pm$  offset frequency. The operation as following:

- Press (SET) key to enter function menu.
- Turn the Main band selector knob to choose No. 02 menu. the LCD displays "ARS"

- 3. Press the Main band selector knob to enter function setup
- 4. Switch the Main band selector knob to choose wanted value.
  - **ON:** Auto Offset function is turned on.

ARS. ON 6445.150

**OFF** Auto Offset function is turned off.

 Press the Main band selector knob or set key to store value and back to function menu.

Press  $\[ \]$  key or hold selector knob for over 0.5 second to store setup and exit.

When the Automatic offset is ON, the offset for 136-174Mhz is default on NOTE 0.6Mhz, and for 400-490 is default on 5Mhz.

#### **FREQUENCY CHANNEL STEP SETUP**

Only in frequency (VFO) mode, this function is valid. Turn selector knob to to select frequency or frequency scanning which is restricted by frequency step size.

- Press key to enter function menu.
- 57EP 6445.150
- Turn the Main band selector knob to choose No. 03 menu. the LCD displays "STEP"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

Available Values: 2.5K, 5K, 6.25K, 10K, 12.K, 15K, 20K, 25K, 30K, 50K.

 Press the Main band selector knob or set key to store value and back to function menu.

Press  $\begin{tabular}{ll} \end{tabular}$  key or hold selector knob for over 0.5 second to store setup and exit.

This function is auto-hidden in channel mode

#### VFO BAND LOCKOUT

In VFO mode, when this function is on, the scanning or input of frequency will restricted within the current VFO frequency band.

- Press (SET) key to enter function menu.
  - BAND 。445.15Ø Turn the Main band selector knob to choose No. 04 menu, the LCD displays "BAND"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

ON: Turn on VFO band lockout function OFF: Turn off VFO band lockout function

5. Press the Main band selector knob or (SET) key to store value and back to function menu. Press kev or hold selector knob for over 0.5 second to store setup and exit.

#### **BEEP FUNCTION**

Press (SET) key to enter function menu.

- Turn the Main band selector knob to choose No. 05 menu. the LCD displays "BEEP"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

ON: Turn on Beep function. **OFF:** Turn off Beep function

5. Press the Main band selector knob or set key to store value and back to function menu. Press kev or hold selector knob for over 0.5 second to store setup and exit.

#### CPU CLOCK FREQUENCY CHANGE

When any harmonic or image frequency in the CPU clock disturbs the working frequency, turn on this function will cut the disturbing

- Press kev to enter function menu.
- Turn the Main band selector knob to choose No. 06 menu, the LCD displays "CLK.SFT"

- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to ON 6445.150 choose wanted value

ON: Turn on CPU Clock frequency Change

OFF: Turn off CPU Clock frequency Change

Press the Main band selector knob or set key to store value and back to function menu. Press wey or hold selector knob for over 0.5 second to store setup and exit.

#### **2TONE ENCODE SELECT**

Press key to enter function menu.

17

- 2. Turn the Main band selector knob to choose No. 07 menu. the LCD displays "2TN ENC"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

Available Values: 0-23, total 24 groups.

- 喊動 if the 2TONE encode are programmed with name, the LCD will display NOTE correspondent name.
- 5. Press the Main band selector knob or set key to store value and back to function menu. Press [w/sou] key or hold selector knob for over 0.5 second to store setup and exit.
- After choose the 2TONE encode group. Press PTT will transmit selected NOTE code.

#### **STONE ENCODE SELECT**

Press (SET) key to enter function menu.

SIN ENE 400.125

Turn the Main band selector knob to choose No. 08 menu, the LCD displays "5TN ENC"

- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

400 125

Available Values: 0-99, total 100 groups.

- if the 5TONE encode are programmed with name, the LCD will display NOTE correspondent name.
- 5. Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

NOTE code.

18

After choose the 5TONE encode group. Press PTT will transmit selected

#### ADD OPTIONAL SIGNALING

This transceiver has 3 optional signaling: DTMF/5Tone/2Tone, those signaling function similar as CTCSS/DCS signaling. When the receiver adds an optional signaling, the caller shall transmit matching signaling. DTMF and 5Tone signaling can be applied for other advanced features such as ANI, PTT ID, group call, select call, remotely stun, remotely kill waken...etc

- Press set key to enter function menu.
- Turn the Main band selector knob to choose No. 09 menu. the LCD displays "TON DEC"

TON DEC 400.125

3. Press the Main band selector knob to enter function setup.

Switch the Main band selector knob to choose wanted value

DTMF: means DTMF signaling is added.

2TONE: means DTMF signaling is added

5TONE: means DTMF signaling is added.

**OFF:** Turn off optional signaling

Press the Main band selector knob or SET kev to store value and back to

function menu. Press level key or hold selector knob for over 0.5 second to store setup and exit.

The working of optional signaling shall be work associated with the squelch NOTE mode setup. (Refer to Squelch Mode setup in page 19)

#### CTCSS ENCODE SETUP

Press (SET) key to enter function menu. Switch the Main band selector knob to

忒沙》 The working of CTCSS/DCS decode shall be work associated with the NOTE squelch mode setup. (Refer to Squelch Mode setup in page 19)

#### SUB BAND DISPLAY SETUP

- 1. Press key to enter function menu.
- Turn the Main band selector knob to choose No. 12 menu, the LCD displays "DSP SUB"
- to <u>15 5 5 1 1 4 0 0.125</u>
- 3. Press the Main band selector knob to enter function setup
- 4. Switch the Main band selector knob to choose wanted value.

FREQ: display sub band frequency,

**DC-IN:** display sub bad voltage.

OFF: turn off display for sub Band

5. Press the Main band selector knob or key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### DTMF ENCODE PRE-LOADING TIME

- Press key to enter function menu.
- 2. Turn the Main band selector knob to choose No. 13 menu. the LCD displays "DTMF D"
- JIMF J 400.125

19

- 3. Press the Main band selector knob to enter function setup
- 4. Switch the Main band selector knob to choose wanted value.

**100MS:** The Pre-Loading time is 100MS **300MS:** The Pre-Loading time is 300MS

**300MS:** The Pre-Loading time is 300MS **600MS:** The Pre-Loading time is 500MS

**800MS:** The Pre-Loading time is 800MS

1000MS: The Pre-Loading time is 1000MS

5. Press the Main band selector knob or set was to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

4ØØ. 125

#### **NTMF ENCODE TRANSMITTING TIME**

- Press [SET] key to enter function menu.
  - 400.125 DIME 5 Turn the Main band selector knob to choose No 14 menu. The LCD displays "DTMF S"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value

**30MS:** The time for transmit a single DTMF encode and the interval is 30MS. **50MS:** The time for transmit a single DTMF encode and the interval is 50MS. **80MS:** The time for transmit a single DTMF encode and the interval is 80MS. **100MS:** The time for transmit a single DTMF encode and the interval is 100MS. **150MS:** The time for transmit a single DTMF encode and the interval is 150MS. 200MS: The time for transmit a single DTMF encode and the interval is 200MS. **250MS:** The time for transmit a single DTMF encode and the interval is 250MS.

Press the Main band selector knob or key to store value\_and back to function menu. Press kev or hold selector knob for over 0.5 second to store setup and exit.

#### DTMF ENCODE SETUP

- Press (set) to enter function menu
- DIME W 400. I25 Switch the Main band selector knob to choose No 15 menu, the LCD displays DTMF W
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose DTMF group. Then key back to DTMF menu. Press PTT will transmit with selected DTMF code

06-16: total 16 group of DTMF code.

400. I25

When the selected group is empty, the LCD displays '----"

- 6. Press the selector knob to enter the DTMF signaling edit. The LCD display "-- -- -- --, the last character flashes.
- 7. Switch the selector knob to choose wanted character. Press the selector knob to confirm selected value and start edit for next character.
- Press set key to store value and exit code editing. Press set key again to store setup and exit. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### SQUELCH MODE SETUP

This transceiver has 5 squelch modes available. Squelch function is used for increase the level of filtering unwanted signal, and free from disturb.

Press set key to enter function menu. Turn the Main band selector knob to

- choose No 16menu. The LCD displays "SGN SQL"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value

**SQ**: You can hear the calling once receives matching carrier.

CTSS/DCS: You can hear the calling when receives matching carrier and CTCSS/DCS code

- CT\*TO: You can hear the calling when receives matching carrier + optional signaling.
- TONE 400.125 TONE: You can hear the calling when receives matching carrier + CTCSS/DCS + optional signaling.
- CT/TO: You can hear the calling when receives any matching carrier or CTCSS/DCS or optional signaling.

5. Press the Main band selector knob or set key to store value and back to function menu. Press kev or hold selector knob for over 0.5 second to store setup and exit.

Only when the transceiver is set with CTCSS/DCS or optional NOTE DTMF/5TONE/TONE signaling, the values will be available.

#### COMPANDER

Compander function will decrease the background noise and enhance audio clarity, especially in long range communication.

- Press [SET] key to enter function menu
  - COMP 400.125 Turn the Main band selector knob to
- choose No 17 menu. The LCD displays "COMP"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

**ON:** Compander function is turn on **OFF:** Compander function is turn off

Press the Main band selector knob or set key to store value and back to function menu. Press [10/50] key or hold selector knob for over 0.5 second to store setup and exit.

When using compander, to avoid distortion during communications, both NOTE radios need turn on this function.

#### **SCRAMBLER SETUP**

This special audio process can offer a more confidential communication; other radio with at same frequency will receive only disordered noises.

Press set key to enter function menu.

- 2. Turn the Main band selector knob to choose No 18 menu. The LCD displays "SCR"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted group
  - 1-9 (9 fix groups)U1,U2 (2 self defined scrambler groups)
- Press the Main band selector knob or set key to store value and back to function menu. Press [1/50] key or hold selector knob for over 0.5 second to store setup and exit.

To enable commutation with scrambler, 2 transceivers shall set with same NOTE group.

#### ■ TONE BUST (PILOT FREQUENCY)

This function uses to start repeater .lt needs certain intensity Pilot Frequency to start a dormant repeater. As usual, no need to send pilot frequency again once repeater started.

- Press set key to enter function menu.
  - I 95 I Turn the Main band selector knob to choose No 19 menu. The LCD displays "TBST"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted frequency.

1000: Pilot Frequency is 1000Hz.

1450: Pilot Frequency is 1450Hz.

1750: Pilot Frequency is 1750Hz.

2100: Pilot Frequency is 2100Hz.

400.125

400.125

5. Press the Main band selector knob or set key to store value and back to function menu. Press set yor hold selector knob for over 0.5 second to store setup and exit.

 $\mathbb{L}_{s}^{1}$  After the above setup, hold microphone PTT key and [ DOWN ] key, the NOTE radio will transmit selected tone.

#### **■ KEYPAD MODE SETUP**

- 1. Press key to enter function menu.
- Turn the Main band selector knob to choose No 20 menu. The LCD displays "KEYMOD"

- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted mode.

**KEY1:** key1 mode, Normal mode, the left 4 keys have same functions as the right 4 keys.

**KYE2:** the left 4 keypads will shared by both band. And the right 4 key pads will re-defined.

 Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

Notice: Definition of 4 Right band Keypad in KEY2 mode:

- Short press: In VFO mode, short press this key, the frequency step size changes to 1Mhz,in channel mode, adjust selector knob will jump 10 channels.
- long press: In standby, long press this key to ad/delete optional signaling, repeat the long press it, will set optional signaling DTMF,5TONE or 2TONE. When the LCD displays

DT means DTMF, displays 5T means 5TONE, displays 2T means 2TONE. In VFO mode, long press this key, the step size change to 10Mhz.

- 3. short press: Frequency reverse function, when current channel is setup with offset direction and offset frequency, press this key will turn on frequency reverse function. When frequency reverse function the TX frequency turns to RX frequency & RX frequency changes to TX frequency. The signaling will also be reversed if CTCSS/DCS signaling existed in this channel. Repeat shot press it will turn off Frequency reverse function.
- 4. long press: In stand by, hold this key until the LCD displays JUL, means the compander function is on, repeater above operation to turn off compander function.
- short press: In standby, press this key to set the CTCSS/DCS code for current channel.

When the LCD displays ENC, the current channel is with CTCSS encode function.

When the LCD displays ENC and DEC, the current channel is with CTCSS /DCS code function.

When the LCD displays DCS and DCS icon, the current channel is with CTCSS code function.

When the LCD displays OFF, the current channel is without CTCSS /DCS function.

6. long press: In standby, long press this key to enter CTCSS/DCS scan, when find matching CTCSS/DCS signal, the scan will pause in the way fllowing Scan Dwell time.

The scan direction can be changed by corresponding channel selector knob.

Note:To enable this function, the channel shall be programmed with CTCSS/DCS decode.

22

7

- 7. short press, shot press this key, the sub band will display "MAIN" and flashes.
  - ong press, choose scrambler group for Main band. In
- 8. standby, hold this key,the LCD displays SCR X and icon. X stands for the group number, repeater above operation to choose wanted group.

#### KEYPAD LOCKOUT

1. Press key to enter function menu.

- Turn the Main band selector knob to choose No 21 menu. The LCD displays "LOCK"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted mode.

ON: The keypad lockout function is turn on all keys beside set and band switch knob is valid.

**OFF:** The keypad lockout function is turn off.

Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### TX OFF (PTT LOCKOUT)

1. Press key to enter function menu.

- Turn the Main band selector knob to choose No 22 menu. The LCD displays "LOCKT"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted mode.

 $\ensuremath{\mathsf{BAND}}\ \ensuremath{\mathsf{R}},$  lock the right band PTT. Only able to transmit by left band.

**BAND L**, lock the left band PTT. Only able to transmit by right band.

**BAND BOTH**, lock both band PTT. Not able to transmit by any side.

OFF: PTT no lock.

Press the Main band selector knob or set value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### SQUELCH LEVEL SETUP

1. Press set key to enter function menu.

- Turn the Main band selector knob to choose No 23 menu. The LCD displays "SQL"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value

1-20: total 20 squelch levels

**OFF:** Turn of squelch function, the background noise keep on.

 Press the Main band selector knob or setup key to store value and . Press key or hold selector knob for over 0.5 second to store setup and exit.

#### TALK AROUND

With this function on, the transceiver will able to communicate with a trans ceiver in same network without through a repeater.

1. Press key to enter function menu.

- Turn the Main band selector knob to choose No 24 menu. The LCD displays "REV"
- 3. Press the Main band selector knob to enter function setup.

# 7

#### **General Setting**

4. Switch the Main band selector knob to choose wanted value.

ON: Talk Around is turn on, The TX and RX frequency will be exchanged, the CTCSS DCS signaling also will be exchanged if existed in current channel.

OFF: Turn off Talk Around

Press the Main band selector knob or store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### ■ SUB BAND MUTE SETUP

To avoid the receiving of sub band disturbing the communication of the main band, you can turn on this function. The RX of the sub band will be mute during the RX or TX of the main band.

1. Press 🖭 key to enter function menu.

- Turn the Main band selector knob to choose No 25 menu. The LCD displays "MUTE"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.
  - **TX:** When the Main band is transmitting, the sub band receiving will be mute.
  - **RX:** When the Main band is receiving, the sub band receiving will be mute.

RX/TX: the sub band receiving always mute.

Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### **■ EDITING CHANNEL NAME**

After edit a name for a channel, if the display mode is channel name, the will displays the name edited in this menu. Otherwise it will display the frequency.

1. Press (SET) key to enter function menu.

- Switch the selector knob to choose NO 26 function menu, the LCD displays "NAME C".
- 3. Press the Main band selector knob to enter function setup.
- Switch the selector knob to choose wanted character.

- Press the selector knob to confirm current character and start edit next character, after editing all 7 characters, press the selector knob to edit and back to function menu.
- If the editing not reach 7 characters, press set key back to function menu, then press key or hold selector knob for over 0.5 second to store setup and exit.

#### CHANNEL FUNCTION AUTO STOREAGE SETUP

When this function is on, all channel operation in channel mode will be stored until next change, otherwise, when change channel or repower on radio, all the channel operation will be resumed to pre-store state

- 1. Press (set / to enter function menu
- 2. Turn the Main band selector knob to choose NO27 menu, The LCD displays "HYPER"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Mian band selector knob to choose wanted value.

**MANUAL:** Auto storeage is turn off. **AUTO:** Auto storeage is turn on.

7

5. Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to sore setup and exit.

#### **MICROPHONE PA,PB, PC,PD KEY SETUP**

- 1. Press (set) key to enter function menu.
- 2. Turn the Main band selector knob to choose No 28-31 menu. The LCD displays "PG PA" PG PB, PG PC, P5 PA 400.125 PG PD.
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.
  - **TX:** When the Main band is transmitting, the sub band receiving will mute. **RX:** When the Main band is receiving, the sub band receiving will mute. **RX/TX:** the sub band receiving always mute.
- Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

For Menu details, please refer to Page 30-31, Microphone Operation.

#### ■ RF SQUELCH LEVEL SETUP

When squelch level function is on, you can cancel squelch only when the signal strength reach the level setup by users.

- 1. Press key to enter function menu.
- Turn the Main band selector knob to choose No32 menu. The LCD displays "RF SQL"

- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.
   S-2: Able to hear the calling when the power meter reach 1 bar.

**S-5:** Able to hear the calling when the power meter reach 4 bar.

5-FULL 400.125

**S-9:** Able to hear the calling when the power meter reach 8 bar.

S-FULL: Able to hear the calling when the power meter reach full bar.

 Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### OFFSET DIRECTION SETUP

- 1. Press key to enter function menu.
- ?. Turn the Main band selector knob to

897 MOI 400.125

choose No33 menu. The LCD displays "RPT  $\mathbf{MOD}$ "

- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted Offset direction.
  - -: Minus offset, means transmitting frequency lower than receiving frequency.
  - +: Plus offset, means transmitting frequency higher than receiving frequency.

**OFF:** OFFSET is turn off. Transmitting frequency is same as receiving frequency.

Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### SCAN DWELL TIME SETUP

1. Press set key to enter function menu.

- Turn the Main band selector knob to choose No34 menu. The LCD displays "SCAN"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

**TIME:** it pauses 5s once scanning a matching signal, then resume scan.

34 400.125 3054 400.125

**BUSY:** it pauses once scanning a matching signal, then resume scan after the signal disappeared for 2 seconds.

SECEDE: It Stops once scanning a matching signal, and exit scan.

Press the Main band selector knob or store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### PRIORITY CHANNEL SCAN

- 1. Press set key to enter function menu.
- SEAN M 400.125
- Turn the Main band selector knob to choose No35 menu. The LCD displays "SCAN M"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

MEN: Channel Scan, the transceiver will scan all the channel after enter channel scan.

MSN: Priority Channel Scan, the transceiver will only scan the priority channel after enter channel scan.

- Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.
- Egys Before using Priority channel scan function.the edited channel shall be NOTE programmed as P SCAN or refer to the PRI instrunction in page 29 to add or delete priority channel.

#### OFFSET FREQUENCY SETUP

1. Press key to enter function menu.

- Turn the Main band selector knob to choose No36 menu. The LCD displays "SHIFT"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.
   Available Offset frequency for this transceiver is 0-100MHz.
- Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### **■ DISPLAY MODE SETUP**

- 1. Press key to enter function menu.
- 2. Turn the Main band selector knob to choose No37 menu. The LCD displays "DISPLAY"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

FREQ: The radio displays channel number + frequency in channel mode, if press key,it will change to VFO mode.

FREO 400.125

31 CH JACKSON

31 NAME JACKSON

CH: Displays only channel number.

NAME: In channel mode, It displays the channel number and channel name if the current channel is programmed with a name. Otherwise, it display the channel number and frequency. If press key, it will change to VFO mode.

Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### BUSY CHANNEL LOCKOUT

With this function on, the transceiver will not transmitting on a busy channel, to avoid disturbing other transceiver using same frequency. Once the channel is busy and you press PTT, the transceiver will beep as warning and return to receiving.

- Press (set) key to enter function menu.
- Turn the Main band selector knob to choose No38 menu. The LCD displays "REPLOCK"
- PEPLOCK 400.125
- ${\it 3.}$  Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

RLORP: Signaling busy channel lockout, transmitting is inhibited when current channel receives a matching carrier but dis-matching CTCSS/DCS

RLOBU: Channel busy channel lockout, tran smitting is inhibited when current channel receives a matching carrier; RLORP 400.1375

400.125

400. 125

00 1

OFF: Busy channel lockout is disabled. \_\_\_\_\_\_Transmitting is allowed in any receiving status.

Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### RADIO'S DTMF SELF ID ENOUIRY

- 1. Press key to enter function menu.
- Switch the selector knob to choose No 39 function. The LCD displays "DTMF ID"
- Press the Main band selector knob to enter function setup. The LCD will show the DTMF self ID.
- 4. Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### ■ STONE SELF ID ENQUIR

- 1. Press set key to enter function menu.
- Switch the selector knob to choose No40 function. The LCD displays "5TONE ID"

- 3. Press the Main band selector knob to enter function setup. The LCD will show the DTMF self ID.
- 4. Press the Main band selector knob or store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### TOT (TIME-OUT TIMER)

The time-out timer limits the amount of continuous transmitting time.

When the transmitting reaches the time limit which has been programmed, the transmission will be cut off and emit warning beep.

Press (SET) key to enter function menu.

27

- Turn the Main band selector knob to choose No41 menu. The LCD displays "TOT"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

**1-30 MIN**, total 30 levels, **OFF**: TOT is turn off.

MIN 400.125

Press the Main band selector knob or set level key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### **VFO FREQUENCY LINKAGE**

Enable this function, the adjustment any band of VFO frequency, will bring same frequency change to both bands. Adjust one gear, the frequency for both band will increase or decrease one step size value.

- Press [SET] key to enter function menu.
- VFBIR400.125 Turn the Main band selector knob to choose No42 menu. The LCD displays "VFOTR"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

Available Values: ON. OFF.

400.125

- 5. Press the Main band selector knob or
  - key to store value and back to function menu. Press or hold selector knob for over 0.5 second to store setup and exit

28

This function only valid when both bands work on VFO mode.

#### **WIDE/NARROW BAND**

- Press [SET] key to enter function menu.
  - 4ØØ. 125 Turn the Main band selector knob to choose No43 menu. The LCD displays "WINNAR"
- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

WIDE: Wide band (25KHz)

MIDDLE: Middle band (20KHz)

NARROW: Narrow band (12.5KHz)

5. Press the Main band selector knob or key to store value\_and back to function menu. Press kev or hold selector knob for over 0.5 second to store setup and exit.

HI DE 400.125 400.125 MIJJIL NARRON

#### CROSS BAND REPEAT

Set the left band and right band as VHF (136~174MHz) and UHF(400~470MHz)then turn of this function will enable Cross Band repeater function.

- Press [SET] key to enter function menu.
- Switch the selector knob to choose No 44 function. The LCD displays "X-RPT"
- 400. I25
- 3. Press the Main band selector knob, the LCD displays "XSTART".
- 4 Press the Main band selector knob, the radio prompt "DU" and the LCD displays "RPT", the corss band repeat function is on.

#### LCD BACKLIGHT

- Press key to enter function menu.
- 2. Turn the Main band selector knob to choose No. 45-47 menu. The LCD displays "COL RED". "COL GRN". "COL BLU"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value. Each color (Red. blue, Green) with 32 brightness levels.
- 5. Press the Main band selector knob or key to store value and back to function menu. Press we key or hold selector knob for over 0.5 second to store setup and exit.

400.125

### 5888U

#### KEYPAD BACKLIGHT BRIGHTNESS

- 1. Press key to enter function menu.
- 2. Turn the Main band selector knob to LCD displays "DIMMER"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.
   Available value: 32 brightness levels.
- 5. Press the Main band selector knob or key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

#### CALLING RECORD

The transceiver offers enquiry of calling record.

- 1. Press set key to enter function menu.
- 2. Turn the Main band selector knob to Choose No. 49 menu. The LCD displays "NOTE"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.
   This transceiver able to record 16 calling at most.
- 5. Press the Main band selector knob or key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

400 125

400.125

#### **AM FUNCTION**

- 1. Press (set) key to enter function menu.
- Turn the Main band selector knob to choose No. 50 menu. The LCD displays "AM"

- 3. Press the Main band selector knob to enter function setup.
- 4. Switch the Main band selector knob to choose wanted value.

**ON**: turn on AM function.

50 ON 400.125

OFF: turn off AM function.

- Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.
- This function is only valid when the Main band frequency is VHF 118-NOTE 174MHz, the function is invalid when the right band is set as Main band.

#### **AUTOMATIC AM FUNCTION**

The radio will automatically boot AM function when the VHF frequency is under 136Mhz

- 1. Press (SET) key to enter function menu.

29

- . Turn the Main band selector knob to choose No. 51 menu. The LCD displays "AUT AM"
- 3. Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

ON: turn on auto AM function.

OFF: turn off auto AM function.

- Press the Main band selector knob or set key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.
- To enable Automatic AM function, the AM function shall be turned on first.

#### VHF EXTERNAL SPEAKER PORT

When the function setup as external (EXT), an external Dual Track speaker (SP-02) must be connected in order to hear the calling on VHF. The calling from VHF and UHF are separated in 2 tracks

- Press (SET) key to enter function menu.
- 400 I25
- Turn the Main band selector knob to choose No. 52 menu. The LCD displays "VSPCONT"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

**INT**: Internal speaker, VHF and UHF band share one speaker

EXT: External speaker, the calling on VHF only audible through the external Dual Track speaker.

5. Press the Main band selector knob or set key to store value and back to function menu. Press [wsa] key or hold selector knob for over 0.5 second to store setup and exit.

#### **BEEP VOLUME CONTROL**

- Press [SET] key to enter function menu.
- Turn the Main band selector knob to choose No. 53 menu. The LCD displays "BP-VOL"
- Press the Main band selector knob to enter function setup
- Switch the Main band selector knob to 400. I25 choose wanted value LOW: BFFP volume is low

HIGH: BEEP volume is high.

- 400. I25
- 5. Press the Main band selector knob or 55 key to store value and back to function menu.
- Press key or hold selector knob for over 0.5 second to store setup and exit.

#### PASSWORD FUNCTION

Press (SET) key to enter function menu.

- choose No. 54 menu. The LCD displays "PASSWD"
- Press the Main band selector knob to enter function setup.
- Switch the Main band selector knob to choose wanted value.

ON: Turn on password function. OFF: Turn off password function.

Press the Main band selector knob or key to store value and back to function menu. Press key or hold selector knob for over 0.5 second to store setup and exit.

When password function is on, correct password shall be input after power NOTE on The password shall be programmed before using this function.

30

### Microphone Operation

MIC UP -DOWN 723 @ 456 @ Numeric Kevs \* 0 # @ Main/Sub band switch

You can operate the transceiver by keypad or input desired frequency and channel through the QHM-04 microphone.

#### SEND DTMF SIGNALING

Hold the PTT key; input the desired DTMF signaling by the numeric keys.

#### MAIN/SUB BAND SWITCHING

This transceiver is defaulted on dual receive, in this status, a MAIN icon will displayed in the top right corner of the Main band frequency transmitting only available on the Main band. In standby, you can switch Main band and sub band by the A/B key.

#### FUNCTION OPERATION THROUGH PA-PD KEYS

The PA,PB,PC,PD, keys are programmable, they can be endowed with the following functions.

RPTR: OFFSET direction setup, in standby. 400.125 press the key programmed as RPTR function will change the offset direction, when LCD displays"+", means plus offset. when the LCD displays"-", means minus offset.

This function is valid only when current channel set with offset frequency.

PRI: Add or delete priority channel: In 400. I25 channel mode, press the key programmed as PRI function to set priority channel, when the LCD displays ◀ the current channel is set as priority channel, repeat above operation, the disappear, the curent channel is not set as priority channel.

LOW: Output power setup, in standby, press the key programmed as as LOW function will change the lower level. When LCD displays HIGH. the transmitting power on current channel is high. When LCD displays MID1, the transmitting power on current channel is middle1. When LCD displays MID2, the transmitting power on current channel is middle 2. When LCD displays LOW, the transmitting power on current channel is low.

TONE: CTCSS/DCS code setup. In standby, press the key programmed as TONE function will able to setup CTCSS/DCS code. when the LCD key to choose CTCSS encode. When the LCD displays "ENC". "DEC" and CTCSS frequency press the microphone [ UP/DOWN ] key to choose CTCSS decode. When the LCD displays "DCS" and DCS code, press microphone displays "ENC" and CTCSS frequency, press the microphone [ UP/DOWN ] key to choose DCS code. 400.125

MHZ: In VFO mode, press the key programmed as MHZ function, the megabit digital in the LCD flashes, now turn the channel know or microphone [ UP/DOWN ] key to adjust

frequency by 1Mhz step. In channel mode. press this key, the channel number flashes,

400.125

We only do best radio

#### Microphone Operation

now adjust selector knob or microphone [ UP/DOWN ] key to adjust channel.

**REV:** In standby, press the key programmed as "REV" function to turnon or turn off Talk Around function

HOME: HOME channel switch, in standby press the key programmed as "HOME" function press the key programmed as HOME function to switch between HOME channel and current channel

MAIN: Main band switch, in standby press the key programmed as "MAIN" function to cho ose left band or right band as Main band.

400.125

[32]

VFO/MR: Working mode switch, in standby, press the key programmed as "VFO/MR" function to switch between channel mode and frequency mode.

SCAN: scan function in standby, press the key programmed as "SCAN" function to start channel scan or frequency scan.

**SQL OFF:**Turn off Squelch, in standby, press the key programmed as "SQL OFF" function to turn off squelch, you can hear very weak signal, repeat the above function to turn on squelch.

TBST: Transmit tone burst, in standby: press the key programmed as "TBST" function

to transmit selected tone burst. This function is use to wake sleeping repeater.

CALL OUT: Calling, in standby, press the key programmed as "CALL OUT" function to transmit pre-programmed DTMF. 2TONE. 5TONE code.

**COMP:** Compander function in standby. press the key programmed as "COMP" to turn on or turn off Compander function.

4ØØ. 125

SCR: Scrambler function, in standby, press the key programmed as "SCR" function to turn on or turn off Scrambler function. And choose optional scrambler groups (from 9 fixed groups SER 400.125 and 2 self defined groups).

TONE DEC: Add Optional Signaling, in standby press the key programmed as "TONE DEC" function to choose DTMF(DT), 2TONE(2T), 5TONE(5T)or OFF.

TONEBEL 400.125

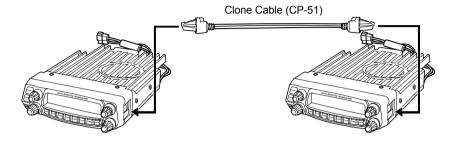

W/N: Wide narrow band setup in standby, press the key programmed as "W/N" function to choose Wide band, middle and narrow band

OFF: No function.

This feature will copy the programmed data and parameters in the master unit to slave units. It copies the parameters and memory program settings.

- 1. Use optional CP51 cloning cable, connect the cable between the data jacks on both master and slave.
- 2. Press and hold right band wey, then hold this key until the LCD displays "CLONE".

3. Hold the Main band key. the Master unit and Slave unit both display "CLONE XX", "XX" stands for the data amount being cloned, when the Master unit displays "CLONE" again, the Slave unit repower on, means the come completed. Turn off the Slave unit, and change another slave unit. then repeat step 3 to clone next radio.

When the Master unit enter clone mode, repeater step 3 will able to clone multi radios.

NOTE If the data is not successfully transmitted, turn off both units, make sure the cable connection is correct and repeat the entire operation from the beginning.

#### **■ RESUME FACTORY DEFAULT**

If your radio seems to be malfunctioning becuase of wrong operation or setup, this function will able to resume all setup and channels to factory default. Hold the right band while power on the radio, all channel and function setup will resume to factory default.

33

#### Programming Software Installing and Starting (in windows XP system)

Double click "QPS5888UV setup.exe", then follow the installing instruction.

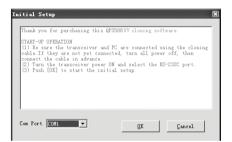

#### INSTALL USB CABLE DRIVER PROGRAMME

- Click start menu in computer, under "ALL PROGRAMS" menu, choose and click "USB To Com port" in QPS5888UV program, install "USB To Com port" driver by indication.
- Connect the optional PC50 USB Programming cable to USB port in PC with transceiver.(As pic 1)
- Double click QPS5888UV shortcut or click QPS5888UV in procedure index of start menu, choose serial com port as indicated then click OK to start programming software. (As pic 2)
- According to instruction, select correct"COM Port"(As pic 3), then click "OK" to start programming software.

**NOTE:** Even in same computer, the selective COM Port is different when USB cable connects with different USB port.

You shall install software before connecting the USB cable line. Switch on transceiver before writing frequency. You had better not switch on or off the power supply of transceiver when it is connected with computer, otherwise, it will make transceiver unable to read or write frequency. In this case, you have to turn off programming software, pull out USB cable. then reinsert USB cable and open software, then rechoose COM Port, it will turn into normal operation. Therefore, please connect transceiver with computer after switching on the transceiver. Don't restart transceiver power when it is connected with computer.

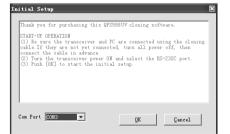

图3

**□** 

This software has product identify system, so when firstly installing the software, you have to connect the transceiver, otherwise you can not start the software.

#### **TROUBLE SHOOTING**

Problem	Problem Possible Causes and Potential Solutions
(a) Power is on, nothing appears on Display.	+ and - polarities of power connection are reversed. Connect red lead to plus terminal and black lead to minus terminal of DC power supply.
(b) Fuse is blown.	Check and solve problem resulting in blown fuse and replace fuse with new fuse.
(c) Display is too dim.	Dimmer setting is "LAMP-L". Please make the dimmer setting "LAMP-H".
(d) No sound comes from speaker.	Squelch is muted. Decrease squelch level.     Tone or CTCSS/DCS squelch is active. Turn CTCSS or DCS squelch off.
(e) Key and Dial do not function.	Key-lock function is activated. Cancel Key-lock function.
(f) Rotating Dial will not change memory channel.	Transceiver is in CALL mode. Press the VFO or memory mode.
(g) PTT key is pressed but transmission does not occur.	Microphone connection is poor. Connect microphone properly.     Antenna connection is poor. Connect antenna properly.

#### SAFETYTRAINING INFORMATION

Your Qixiang Electron Science & Technology Co., Ltd radio generates RF electromagnetic energy during transmit mode. This radio is designed for and classified as "Occupational Use Only", meaning it must be used only during the course of employment by individuals aware of the hazards, and the ways to minimize such hazards. This radio is NOT intended for use by the "General Population" in an uncontrolled environment.

This radio has been tested and complies with the FCC RF exposure limits for "Occupational Use Only". In addition, your Qixiang Electron Science & Technology Co., Ltd radio complies with the following Standards and Guidelines with regard to RF energy and electromagnetic energy levels and evaluation of such levels for exposure to humans:

FCC OET Bulletin 65 Edition 97-01 Supplement C, Evaluating Compliance with FCC Guidelines for Human Exposure to Radio Frequency Electromagnetic Fields.

American National Standards Institute (C95.1-1992), IEEE Standard for Safety Levels with Respect to Human Exposure to Radio Frequency Electromagnetic Fields, 3 kHz to 300 GHz.

American National Standards Institute (C95.3-1992), IEEE Recommended Practice for the Measurement of Potentially Hazardous Electromagnetic Fields—RF and Microwave.

The following accessories are authorized for use with this product. Use of accessories other than those (listed in the instruction) specified may result in RF exposure levels exceed the FCC requirements for wireless RF exposure.

The information listed above provides the user with the information needed to make him or her aware of RF exposure, and what to do to as-sure that this radio operates with the FCC RF exposure limits of this radio.

#### **Electromagnetic Interference/Compatibility**

During transmissions, your Qixiang Electron Science & Technology Co., Ltd radio generates RF energy that can possibly cause interference with other devices or systems. To avoid such interference, turn off the radio in areas where signs are posted to do so. **DO NOT** operate the transmitter in areas that are sensitive to electromagnetic radiation such as hospitals, aircraft, and blasting sites.

#### Occupational/Controlled Use

The radio transmitter is used in situations in which persons are exposed as consequence of their employment provided those persons are fully aware of the potential for exposure and can exercise control over their exposure.

In order to comply with RF exposure requirements, a minimum distance of 200cm must be maintained between the antenna and all persons

We only do best radio!
