Dear,

Kindly let you know we take product VTB-50 sample for testing to get the FCC-ID T56VTB-50 in 2012. But this product has never been produced and sold in any market after we get the FCC certification. Recently we apply FCC for our new product(refer FCC-ID 2AF3S),but we got know could not apply cause of we did not submit samples for test in 2012. It 's not we don't want to submit samples,we really do not receive any order for this product,so that we stopped the production soon. Also we never received a third party laboratory sampling inspection notice.Now we cannot contact with the previous laboratory which handle of this case.So I'm writing this for request your help.

We promise we really do not sell any one of this product in market,and do not have any effect on the American market. We really hope if can cancel the FCC-ID T56,accept our new FCC-ID 2AF3S to instead?This is very important for us.

Many thanks for your kindly help in advance!
