Subject: Requesting Class II permissive change for 150Mbps Wireless-N AP/
Repeater/ Router client with FCC ID: T58WF2412R

To Whom It May Concern:

The purpose of this letter is to request a Class II Permissive change for FCC ID:
T58WF2412R.

There is no hardware or electrical modification made to the applying transmitter itself.

The major changes filed under this application are

1. Ethernet port is reduced to 2 ports; the PCB layout is the same, just differ in quantity of the ports which disabled
2. The integral antenna is changed to dipole antenna with antenna gain is 5.71 dBi

Note: The original integral antenna with gain is 4.10 dBi.

3. Model name is changed (new model name is WF2414).

Please contact me if you have any questions or need further information regarding this application.

Best Regards
