Dear sung-kyu Cho

The application review is complete. There are a few items that need to be done before the application is processed. Please note that you will receive two notices, one for each application. The items are as follows:

1. The internal photo document is required to have view of the both sides of the circuit boards. The photo document must show what is shown. FCC requires this even if there are no components or traces on the other side. Please provide a photo document with views of both sides of all circuit boards.

2. The following statement must be added to page 3 of the user manual to comply with 15.240(f)

The user of the device shall be responsible for submitting updated information in the event of any changes in the device or other information changes after the initial registration by the grantee. The information to be submitted by the user to the Commission shall include the name, address, telephone number and e-mail address of the user, the address and geographic coordinates of the operating location, and the FCC identification number of the device. The material shall be submitted to the following address:

Experimental Licensing Branch,
OET, Federal Communications Commission,
445 12th Street, SW., Washington,
DC 20554, ATTN: RFID Registration.

3. We understand that the normal transmission period is 2.7 s. Please confirm also with the following operational requirement from 15.240(b)

Additionally, devices authorized under these provisions shall be provided with a means of retransmission so that the duration of each transmission shall not be greater than 60 seconds. The device shall be able to reinitiate an interrogation in the case of a transmission error. Absent such a transmission, the period between transmissions shall not be less than 10 seconds.

4. The antenna connector must comply with the provisions of 15.203. It must be a "n type" connector like an R-SMA or R-TNC or the user manual must include a statement like: "Professional installers are responsible for ensuring that the proper antenna is used as described in the instructions. The manufacturer shall provide additional information about the connector or a revised user manual."

Best regards,

Tim Dwyer
CCS Technical Reviewer

The items indicated above must be submitted before processing can continue on the application. Failure to provide the requested information within 30 days of the original application submission will result in the forfeiture of the filing fee. Also, please note that partial responses are not accepted and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
