SAR report for 5000B7

Dear Sir/Madam,

All RF devices keep the same port/layout/circuitry/antenna/housing between 5000B7 & 5000B9 models. Both models have the same housing footprint and all RF devices/antenna keeps the same location within the handheld housing.

For the certification purpose we have chosen the most representative & complex combination which is the 5000B9 with GPRS/WIFI/BT/RFID modules. 5000B7 is just a depopulated version of the test model. The 5000B7 model doesn't have the WIFI/BT module.

It's our engineering judgement that 5000B7 model complies to RF exposure requirements by using 5000B9 model SAR report because the only difference is that WIFI/BT module option is not part of 5000B7 model.

Regards,
