Model differences for 8900K1

Dear Sir/Madam,

Find below a summary of model differences for Dap Technologies 8900K1 tablet. 8900K1 model doesn't have the 850/900/1800/1900/2100 MHZ MULTI-BAND MODULE.

Here are the models/options combinations :

	Tablet model	GPS	Camera	Laser	RJ45	USB/DB9 expansion bay	CPU	Tablet marketing models
1	8900K1						X86	8900KS
2	8900K1		√				X86	8900KS
3	8900K1			√			X86	8900KS
4	8900K1				√		X86	8900KS
5	8900K1					√	X86	8900KS
6	8900K1		√			√	X86	8900KS

GPS/CAMERA/LASER/RJ45/USB+DB9 Expansion bay are options available for both marketing models (8900KS & 8900KM). Marketing models are driven by the CPU type. CAMERA/LASER/RJ45 options are exclusive. Only one of the CAMERA/LASER/RJ45 option can be mounted at the time.

All RF devices keep the same port/layout/circuitry/antenna/housing between 8900KS & 8900KM marketing models. Both marketing models have the same housing footprint and all RF devices/antenna keeps the same location within the tablet housing. This is mainly due to the mainboard that is common between 8900KS & 8900KM models; the mainboard provides common connectors for the CPU modules (ARM & X86). There are no RF components on the CPU module; only a processor, RAM, Flash memory, Ethernet transceiver and glue logic.

For the certification purpose we have chosen the most representative & complex combination which is the 8900KS with GPS/CAMERA/850,900,1800,1900,2100 MHZ MULTI-BAND MODULE/ USB+DB9 Expansion bay model. 8900K1 is just a depopulated version of the test model. The 8900K1 model doesn't have the 850,900,1800,1900,2100 MHZ MULTI-BAND MODULE.

Regards,
